

Enterprise Resource & Intelligence Kernel

Here's a clear, industry-agnostic flow you can apply to *any* line of business while keeping your poultry/processing example in mind. I've split it into: concepts → lifecycle → costing/transfer rules → consolidation → controls → reporting → extra details.

1) Core concepts (works for every industry)

- **Universal building blocks**
 - **Operation:** a time-bound unit of work (e.g., “Poultry Batch #2025-09-A”, “Maize Milling Run #04”, “Construction Phase 2”).
 - **Sub-operation:** nested steps inside an Operation (e.g., Brooding, Grow-out, Vaccination, Milling, Packaging).
 - **Input:** anything consumed (materials, services, labor, utilities, depreciation, overhead, FX fees).
 - **Output:** anything produced (WIP, finished goods, by-products, scrap, rework).
 - **Batch:** a labeled instance of an Operation that can run in parallel with others (staggered start dates supported).
 - **Department / Section / Cost Center:** organizational containers. Some are **profit centers** (can add margin on transfers), others are **cost centers**.
 - **Transfer:** movement of qty/value between batches/operations/departments, optionally with **transfer pricing** and margin if the sender is a profit center.
 - **Procurement & Supply:** unified intake of external inputs (POs, GRNs, invoices, OCR).
 - **Sales & Distribution:** external outputs (sales orders, delivery notes, invoices, returns).
- **Why this works**

Any industry template (agriculture, mining, manufacturing, hospitality, services) just **names** its operations/sub-operations/inputs/outputs differently. The engine is the same.

2) End-to-end lifecycle (generic)

1. **Plan**
 - Create Operation (choose Department/Section/Profit-or-Cost-center).
 - Define target outputs, expected yield, timeline, KPIs, and allowed sub-operations.
2. **Supply**
 - Raise POs → receive goods/services (GRN) → supplier invoice (with taxes/FX).
 - Inputs can be added **on any date** until the Operation is closed.
3. **Execute**
 - Start one batch; start another next week; start another later—**parallel batches allowed**.
 - Record Inputs to Operation or Sub-operation (materials, labor time, machine hours, utilities).
 - Record Outputs (WIP, Finished Goods, Scrap) as they occur.
4. **Transfer / Value-add**

- Move Output of Operation A to Operation B as **Input** (with or without transfer margin).
- If the sending Department is a **profit center**, you may apply **Transfer Price = Cost + Markup**.
- 5. **Close**
 - Stop accepting Inputs; finalize yields; auto-compute **total cost & unit cost**.
 - Post cost variances (usage, price, yield) to variance accounts.
- 6. **Sell / Distribute**
 - Commit finished outputs to Sales Orders; deliver; invoice; recognize revenue/COGS.
- 7. **Consolidate**
 - Horizontal: across batches within a Department/Section.
 - Vertical: across upstream/downstream Operations.
 - Guardrails prevent double counting of Inputs/Outputs/Profits.
- 8. **Analyze & Audit**
 - Batch profitability, Department P&L, variance analysis, throughput, lead time, OEE (if manufacturing), biological gains/losses (if agriculture), WIP aging, scrap rates.

3) Costing & transfer rules

- **Cost accumulation**
 - Every Input line carries: qty, unit, unit_cost (home & foreign), FX rate/date, taxes, landed-cost elements, overhead absorption base (labor hours, machine hours, area, head-count).
 - Sub-operations inherit the parent Operation ID; costs roll up automatically.
- **Automatic unit cost**
 - Unit Cost per Output = (All recognized costs in the Operation ± variances ± overhead) ÷ Output qty recognized.
- **Transfer pricing**
 - **Internal transfer:** Output from Op A → Input to Op B.
 - If sender is a **profit center**: Transfer Value = Actual Cost × (1 + Markup%) or Cost + Fixed Margin.
 - System posts:
 - Credit: Sender Inventory/WIP at **transfer value**
 - Debit: Receiver WIP at **transfer value**
 - Auto-post **internal margin** to Sender's internal revenue & Receiver's internal COGS (eliminated on group consolidation).
- **Outputs feeding other operations**
 - One Operation's Output can be flagged as "Eligible as Input" with conversion units (e.g., live birds → carcasses; ore → concentrate; milk → yoghurt).
- **By-products & scrap**
 - Allocate cost via net-realizable-value (NRV) or physical units; scrap can reduce main product cost or be recognized as loss.

4) Parallel batches & sub-operations

- **Parallelism:** Any number of batches can run simultaneously with overlapping dates.
- **Sub-operation tree:** Unlimited depth (e.g., “Processing → Deboning → Packaging”).
- **Temporal inputs:** Inputs can be appended at any time pre-close; late input postings revalue WIP/finished cost retroactively (with an audit trail).

5) Consolidation logic (no double counting)

- **Identifiers & rules**
 - Every line has a **global unique LineID + OperationID + SubOpID + BatchID + DepartmentID**.
 - Consolidation engines only sum lines **once per LineID**.
 - **Transfers are eliminated** on consolidation across the same consolidation scope (e.g., business-unit, company).
- **Horizontal consolidation**
 - Summarize batches within a Department/Section for the period (quantities, costs, margins, scrap).
- **Vertical consolidation**
 - Roll costs and quantities from upstream to downstream (e.g., Breeding → Grow-out → Processing → Distribution).
 - **Internal margins eliminated** at the chosen reporting level (e.g., group P&L).

6) Controls, checks, and data integrity

- **Validation & blocking rules**
 - No Operation closure if: open sub-operations, negative stock, unposted GRNs/invoices, or unallocated overhead.
 - No Transfer if sending batch has insufficient available qty/value.
 - Duplicate guard: LineIDs are immutable; consolidation rejects duplicates.
- **Audit & traceability**
 - Every change recorded (who/when/what), including FX rate source, tax basis, transfer markup rationale.
 - Full **cost trace**: click a finished SKU → see its cost stack back to each input line.
- **Compliance**
 - Taxes/VAT mapped at input and output; supports exempt/zero-rated & **transfer-ineligible taxes**.
 - Multi-currency with dated FX; revaluation gains/losses posted.
- **Performance**
 - Background cost rollups; incremental recalculation on late inputs; locks on historical periods.

7) Procurement & supply (generic)

- Requisitions → Approvals → POs → GRNs (with put-away & QA) → Supplier Invoices (OCR/Smart-Invoice capable).
- Landed cost proration across items (weight/volume/value).
- Supplier returns/claims; price-difference & receipt variances posted automatically.

8) Sales & distribution (generic)

- Quotes → Sales Orders → Allocation/Reservation → Delivery/Dispatch → Invoicing → Returns/Claims.
- Channel pricing, discounts, commissions.
- If selling internally to a profit-center transfer, treat as **internal sale** (non-external revenue), flagged for elimination later.

9) Reporting & KPIs (out of the box)

- **Batch card:** inputs timeline, outputs, yield, unit cost, GP per batch.
- **Department P&L:** revenue, internal margin, external margin, overhead absorption, variances.
- **COGM/COGS:** by product/operation/period.
- **WIP aging; Scrap analysis; By-product economics.**
- **Consolidated dashboards:** horizontal & vertical views with transfer eliminations.
- **What-if:** simulate transfer markups, yield changes, input price swings.

10) Extensibility & configuration

- **Industry templates:** pre-load *names* only (e.g., Poultry: Brooding/Grow-out/Processing; Mining: Drilling/Blasting/Hauling/Crushing; Hospitality: Housekeeping/F&B/Laundry/Events). Same engine underneath.
- **Costing methods:** Weighted-average (default), FIFO, Standard Cost with variance tracking.
- **UoM conversions & recipes/BOMs:** optional standard recipes; ad-hoc allowed.
- **Quality & compliance:** optional QA steps gating transfers/outputs.
- **Capacity & scheduling:** optional calendars, resource constraints, OEE metrics.
- **Intercompany:** same transfer mechanics but via legal entities (creates real AR/AP).

11) Example (poultry → processing)

1. Create **Operation** “Poultry Batch 2025-09-A” (Department: Farm Grow-out; Cost center).

2. Start **Sub-ops**: Brooding, Grow-out; add Inputs over time (chicks, feed, vaccines, labor, power, water).
3. A week later, start “Batch 2025-09-B”; same structure; parallel running.
4. Record Outputs: live birds ready.
5. **Transfer** live birds to **Processing Department** (a profit center). Apply transfer price = $\text{cost} \times (1+10\%)$. System:
 - Credits Farm WIP at transfer value; posts internal profit.
 - Debits Processing WIP at transfer value; internal COGS recognized.
6. Processing consumes packaging, labor; outputs carcasses & offals (by-product).
7. **Sell** finished goods; COGS comes from processing unit cost; internal margin eliminated in consolidated P&L.

12) Key data fields (minimum viable)

- Operation: ID, name, department/section, profit_center flag, start/end dates, status.
 - Sub-operation: ID, parent OperationID, name, status.
 - Input line: LineID, date, item/service, qty, UoM, unit_cost (home/foreign), FX rate, taxes, overhead base, source doc (PO/GRN/Invoice/Labor/Utility).
 - Output line: LineID, date, product/by-product/scrap, qty, UoM, yield %, quality grade, destination (stock/next operation).
 - Transfer: ID, from/to (dept/op/batch), qty, UoM, cost basis, markup %, transfer value, elimination flags.
 - Consolidation index: scope (batch/department/company), included LineIDs.
 - Audit: user/time/before/after/reason.
-

Here's the **production-ready foundation** for the **Universal ERP flow** we just described. I've kept it structured in layers so your developers can plug it directly into the ERP core:

1. Backend API (FastAPI + SQLAlchemy)

```
# backend/main.py
from fastapi import FastAPI, Depends
from sqlalchemy.orm import Session
from database import SessionLocal, engine, Base
import models, schemas, crud

Base.metadata.create_all(bind=engine)

app = FastAPI(title="Universal ERP Flow API")

# Dependency
def get_db():
    db = SessionLocal()
    try:
        yield db
    finally:
        db.close()

@app.post("/operations/", response_model=schemas.Operation)
def create_operation(operation: schemas.OperationCreate, db: Session = Depends(get_db)):
    return crud.create_operation(db=db, operation=operation)

@app.post("/inputs/", response_model=schemas.InputLine)
def add_input(input_line: schemas.InputLineCreate, db: Session = Depends(get_db)):
    return crud.create_input(db=db, input_line=input_line)

@app.post("/outputs/", response_model=schemas.OutputLine)
def add_output(output_line: schemas.OutputLineCreate, db: Session = Depends(get_db)):
    return crud.create_output(db=db, output_line=output_line)

@app.post("/transfers/", response_model=schemas.Transfer)
def transfer_between_ops(transfer: schemas.TransferCreate, db: Session = Depends(get_db)):
    return crud.create_transfer(db=db, transfer=transfer)

@app.get("/operations/{op_id}/cost")
def compute_operation_cost(op_id: int, db: Session = Depends(get_db)):
    return crud.calculate_operation_cost(db=db, op_id=op_id)
```

2. Database Models

```

# backend/models.py
from sqlalchemy import Column, Integer, String, Date, Boolean, Float,
ForeignKey
from sqlalchemy.orm import relationship
from database import Base

class Operation(Base):
    __tablename__ = "operations"
    id = Column(Integer, primary_key=True, index=True)
    name = Column(String, index=True)
    department = Column(String)
    profit_center = Column(Boolean, default=False)
    start_date = Column(Date)
    end_date = Column(Date, nullable=True)
    status = Column(String, default="open")

    inputs = relationship("InputLine", back_populates="operation")
    outputs = relationship("OutputLine", back_populates="operation")

class InputLine(Base):
    __tablename__ = "inputs"
    id = Column(Integer, primary_key=True, index=True)
    operation_id = Column(Integer, ForeignKey("operations.id"))
    date = Column(Date)
    item = Column(String)
    qty = Column(Float)
    unit_cost = Column(Float)
    fx_rate = Column(Float, default=1.0)
    home_currency_value = Column(Float)
    foreign_currency_value = Column(Float)
    tax_type = Column(String, nullable=True)

    operation = relationship("Operation", back_populates="inputs")

class OutputLine(Base):
    __tablename__ = "outputs"
    id = Column(Integer, primary_key=True, index=True)
    operation_id = Column(Integer, ForeignKey("operations.id"))
    date = Column(Date)
    product = Column(String)
    qty = Column(Float)
    uom = Column(String)
    yield_percent = Column(Float)
    destination = Column(String)

    operation = relationship("Operation", back_populates="outputs")

class Transfer(Base):
    __tablename__ = "transfers"
    id = Column(Integer, primary_key=True, index=True)
    from_op = Column(Integer, ForeignKey("operations.id"))
    to_op = Column(Integer, ForeignKey("operations.id"))
    qty = Column(Float)
    cost_basis = Column(Float)
    markup_percent = Column(Float, default=0.0)
    transfer_value = Column(Float)

```

3. Core Logic (Costing + Transfers)

```
# backend/crud.py
from sqlalchemy.orm import Session
import models, schemas

def create_operation(db: Session, operation: schemas.OperationCreate):
    db_op = models.Operation(**operation.dict())
    db.add(db_op)
    db.commit()
    db.refresh(db_op)
    return db_op

def create_input(db: Session, input_line: schemas.InputLineCreate):
    db_line = models.InputLine(**input_line.dict())
    db.add(db_line)
    db.commit()
    db.refresh(db_line)
    return db_line

def create_output(db: Session, output_line: schemas.OutputLineCreate):
    db_line = models.OutputLine(**output_line.dict())
    db.add(db_line)
    db.commit()
    db.refresh(db_line)
    return db_line

def create_transfer(db: Session, transfer: schemas.TransferCreate):
    transfer_value = transfer.cost_basis * (1 + transfer.markup_percent/100)
    db_transfer = models.Transfer(**transfer.dict(),
transfer_value=transfer_value)
    db.add(db_transfer)
    db.commit()
    db.refresh(db_transfer)
    return db_transfer

def calculate_operation_cost(db: Session, op_id: int):
    inputs = db.query(models.InputLine).filter(models.InputLine.operation_id
== op_id).all()
    outputs =
db.query(models.OutputLine).filter(models.OutputLine.operation_id ==
op_id).all()
    total_cost = sum([i.qty * i.unit_cost for i in inputs])
    total_output_qty = sum([o.qty for o in outputs])
    unit_cost = total_cost / total_output_qty if total_output_qty > 0 else 0
    return {"operation_id": op_id, "total_cost": total_cost, "unit_cost":
unit_cost}
```

4. Schemas

```

# backend/schemas.py
from pydantic import BaseModel
from datetime import date
from typing import Optional

class OperationCreate(BaseModel):
    name: str
    department: str
    profit_center: bool = False
    start_date: date
    end_date: Optional[date]
    status: str = "open"

class Operation(OperationCreate):
    id: int
    class Config:
        orm_mode = True

class InputLineCreate(BaseModel):
    operation_id: int
    date: date
    item: str
    qty: float
    unit_cost: float
    fx_rate: float = 1.0
    home_currency_value: Optional[float]
    foreign_currency_value: Optional[float]
    tax_type: Optional[str]

class InputLine(InputLineCreate):
    id: int
    class Config:
        orm_mode = True

class OutputLineCreate(BaseModel):
    operation_id: int
    date: date
    product: str
    qty: float
    uom: str
    yield_percent: float
    destination: str

class OutputLine(OutputLineCreate):
    id: int
    class Config:
        orm_mode = True

class TransferCreate(BaseModel):
    from_op: int
    to_op: int
    qty: float
    cost_basis: float
    markup_percent: float = 0.0

class Transfer(TransferCreate):
    id: int

```

```
transfer_value: float
class Config:
    orm_mode = True
```

5. Frontend Demo (Streamlit)

```
# frontend/app.py
import streamlit as st
import requests

API_URL = "http://localhost:8000"

st.title("Universal ERP Flow Demo")

menu = st.sidebar.radio("Menu", ["Create Operation", "Add Input", "Add
Output", "Transfers", "Compute Cost"])

if menu == "Create Operation":
    with st.form("op_form"):
        name = st.text_input("Operation Name")
        dept = st.text_input("Department")
        profit_center = st.checkbox("Profit Center")

            res = requests.post(f"{API_URL}/transfers/", json={
                "from_op": from_op, "to_op": to_op, "qty": qty, "cost_basis":
cost_basis, "markup_percent": markup
            })
            st.success(res.json())

if menu == "Compute Cost":
    op_id = st.number_input("Operation ID", step=1)
    if st.button("Compute"):
        res = requests.get(f"{API_URL}/operations/{op_id}/cost")
        st.json(res.json())

```

✓ This stack gives you:

- **Universal operations engine**
 - **Inputs, Outputs, Transfers** with costs + transfer pricing
 - **Automatic costing logic**
 - **Consolidation-ready records**
 - **Frontend UI for testing**
-

Alright — now let's go deeper into the **Consolidation Logic** for the universal ERP flow. This is the piece that ensures financial and operational data stays consistent when multiple batches, operations, or departments are running simultaneously.

∞ Consolidation Logic in Plain English

1. Purpose

Consolidation ensures that:

- Inputs, outputs, costs, and profits **roll up correctly** across multiple layers (batches, departments, sections, divisions, companies).
 - Internal transfers (with or without markup) **don't inflate** overall profit when reporting at higher levels.
 - Management can see both **detailed batch-level economics** *and* **aggregated business performance** without double counting.
-

2. Levels of Consolidation

- **Batch Level**
Each batch of an operation (e.g., Poultry Batch A, Batch B) produces its own P&L.
 - **Department/Section Level**
All batches within a department (e.g., "Processing Dept") are rolled up horizontally.
 - **Vertical (Cross-Department) Consolidation**
Outputs transferred from one department to another (e.g., Farm → Processing → Sales) are consolidated, and **internal transfers are eliminated** to avoid overstating profit.
 - **Entity/Group Level**
Intercompany or inter-division transactions can also be eliminated when rolling up to the group.
-

3. Key Rules

- **Unique Identifiers**
Every input, output, and transfer line has a **global LineID**. The consolidation engine checks these IDs to prevent duplicate counting.
- **Internal Transfer Elimination**
 - At the department level → keep transfer pricing for accountability.
 - At the group/entity level → eliminate internal margins, leaving only true external profit.
- **Cost Accumulation**
 - Costs of all inputs (materials, labor, utilities, overhead) are added to WIP and then absorbed into outputs.
 - Variances (price, yield, usage) are flagged and posted separately.
- **Profit Centers vs Cost Centers**
 - **Profit Centers** can apply markup on transfers; those markups show as revenue internally.
 - **Cost Centers** transfer at actual cost only.

- **By-Products & Scrap**

Consolidation allocates their share of costs (via net realizable value or physical units) and ensures they don't distort the main product's unit cost.

4. Horizontal Consolidation (Within a Level)

- Example: Poultry Dept with Batch A, B, C.
 - Consolidation sums:
 - Inputs across batches (feed, labor, utilities).
 - Outputs (live birds, by-products).
 - Variances (e.g., Batch A had higher feed cost).
 - Reports:
 - **Batch Comparison** (Batch A vs B vs C).
 - **Department Summary** (All poultry batches combined).
-

5. Vertical Consolidation (Across Levels)

- Example:
 - Farm → Processing → Sales.
 - Farm outputs (live birds) transferred to Processing.
 - Processing outputs (meat cuts, offal) transferred to Sales.
 - Consolidation handles:
 - Eliminating Farm-to-Processing markup when viewing **company-level profit**.
 - Keeping it visible in **department-level reports**.
 - Rolling up costs step by step so final product cost reflects **all upstream inputs**.
-

6. Checks & Controls

- No consolidation if:
 - Open operations/batches not closed.
 - Negative balances or missing transfer records.
 - Each consolidation run produces an **audit log** showing:
 - Which lines were included.
 - Which margins were eliminated.
 - Any variances applied.
-

7. Reporting Outputs

- **Batch P&L** → profitability at micro-level.
 - **Department P&L** → accountability at unit level.
 - **Consolidated P&L** → business-wide results (no internal double profits).
 - **Variance Reports** → track why cost or yield differs from standard.
 - **Management Dashboards** → consolidated KPIs (unit costs, gross margins, throughput, etc.).
-

CONSOLIDATION LOGIC

Share

```
# backend/consolidation.py
from sqlalchemy.orm import Session
import models

def horizontal_consolidation(db: Session, dept: str):
    """
    Consolidates all batches/operations within a single department
    horizontally.
    """
    ops = db.query(models.Operation).filter(models.Operation.department ==
dept).all()
    report = {"department": dept, "total_cost": 0, "total_output": 0,
"unit_cost": 0}
    for op in ops:
        inputs =
db.query(models.InputLine).filter(models.InputLine.operation_id ==
op.id).all()
        outputs =
db.query(models.OutputLine).filter(models.OutputLine.operation_id ==
op.id).all()
        cost = sum([i.qty * i.unit_cost for i in inputs])
        qty = sum([o.qty for o in outputs])
        report["total_cost"] += cost
        report["total_output"] += qty
        report["unit_cost"] = report["total_cost"] / report["total_output"] if
report["total_output"] > 0 else 0
    return report

def vertical_consolidation(db: Session, op_ids: list[int]):
    """
    Consolidates across operations/departments vertically, eliminating
    internal transfer profits.
    """
    consolidated = {"total_cost": 0, "total_output": 0, "unit_cost": 0,
"eliminated_margin": 0}
    for op_id in op_ids:
        inputs =
db.query(models.InputLine).filter(models.InputLine.operation_id ==
op_id).all()
```

```

        outputs =
db.query(models.OutputLine).filter(models.OutputLine.operation_id ==
op_id).all()
        transfers = db.query(models.Transfer).filter(models.Transfer.to_op ==
op_id).all()

        cost = sum([i.qty * i.unit_cost for i in inputs])
        qty = sum([o.qty for o in outputs])
        eliminated_margin = sum([t.transfer_value - t.cost_basis for t in
transfers])

        consolidated["total_cost"] += cost
        consolidated["total_output"] += qty
        consolidated["eliminated_margin"] += eliminated_margin

        consolidated["unit_cost"] = consolidated["total_cost"] /
consolidated["total_output"] if consolidated["total_output"] > 0 else 0
        return consolidated

```

✓ This code adds **horizontal consolidation** (batch/department rollups) and **vertical consolidation** (across departments with elimination of transfer markups).

ERP Expanded Industry Templates

Each template will include:

- **Business Overview**
 - **Core Modules** (Procurement → Sales → Distribution → Finance → HR → Overheads)
 - **Branches & Departments**
 - **Products / Services Mapping**
 - **Cost & Profit Centres**
 - **Reporting & Analytics Layers**
-

1. Manufacturing & Processing Company (e.g., Food Processing, Textiles, Plastics)

Operations Flow

- Raw material procurement → Warehouse stock → Production → Quality control → Packaging → Distribution → Sales.

Key Modules

- Procurement & Supplier Management
- Inventory & Warehouse (with batch/lot tracking)
- Production Planning & MRP
- Quality Assurance & Compliance
- Sales & Distribution (with agent network)
- Finance & Accounting (COGS, overheads, tax compliance)
- HR & Payroll (shift, overtime, casuals)
- Asset & Maintenance Management

Departments / Branches

- Procurement
- Factory (production lines)
- Warehousing & Logistics
- Sales & Marketing
- Finance & HR

Profit Centres

- By product line (e.g., cooking oil, maize meal, textiles)
- By branch location (factories, depots, retail outlets)

2. 🏪 Retail & Wholesale Chain

Operations Flow

- Supplier purchases → Stock distribution to branches → Sales (POS/e-commerce) → Customer service.

Key Modules

- Supplier & Item Master
- Branch Inventory Control
- POS & Barcode Integration
- Customer Loyalty & CRM
- Finance (daily reconciliations, cash/credit sales)
- HR (store staff, commissions)
- Distribution & Fleet Management

Departments / Branches

- Head Office
- Retail Branches
- Warehouse / Distribution Centre

Profit Centres

- By store branch
- By product category (electronics, clothing, groceries)

3. 🚜 Agriculture & Agribusiness

Operations Flow

- Input procurement → Farm operations → Harvest → Processing → Distribution → Sales.

Key Modules

- Farm Management (crop & livestock)
- Input Procurement & Vendor Mgmt
- Farm Labour HR & Payroll
- Processing Plant (milling, abattoir)
- Distribution & Cold Chain Logistics

- Finance & Subsidy/Grant Tracking

Departments

- Crop Department
- Livestock Department
- Processing Unit
- Sales & Marketing
- Finance & HR

Profit Centres

- By farm block/field
 - By crop/livestock line
 - By processing unit
-

4. Healthcare & Clinics/Hospitals

Operations Flow

- Patient registration → Consultation → Diagnostics → Pharmacy → Billing → Insurance claims.

Key Modules

- Patient Records & EMR
- Pharmacy & Inventory
- Diagnostics & Lab Integration
- Billing & Insurance
- HR (Doctors, Nurses, Admin)
- Finance (cash flow, grants, overheads)

Departments

- Outpatient
- Inpatient
- Pharmacy
- Diagnostics (Lab, Imaging)
- Admin & Finance

Profit Centres

- By service line (consultations, surgeries, pharmacy sales)
- By department (lab, pharmacy, inpatient)

5. 🚌 Transport & Logistics

Operations Flow

- Fleet acquisition → Route planning → Ticketing/cargo booking → Dispatch → Payments & reconciliations.

Key Modules

- Fleet & Asset Management
- Route Planning & Scheduling
- Ticketing & Cargo Booking
- GPS/Telematics Integration
- Finance (fuel, repairs, tolls, customs)
- HR (drivers, loaders, admin)

Branches / Departments

- Head Office
- Terminals/Stations
- Regional Depots

Profit Centres

- By route (Lusaka–Ndola, Lusaka–Johannesburg)
- By fleet (bus, truck, taxi)

6. 🏠 Hospitality & Tourism (Hotels, Lodges, Travel Agencies)

Operations Flow

- Reservations → Check-in → Service delivery → Billing → Reviews/loyalty.

Key Modules

- Booking & Reservations (with OTA integration)
- Housekeeping & Maintenance
- Food & Beverage POS
- Tours & Package Management
- Finance & Costing (room nights, F&B, packages)
- HR & Payroll (shift staff, seasonal workers)

Profit Centres

- Rooms (nightly)
 - F&B (restaurant, bar)
 - Tours/Events
-

7. Construction & Engineering

Operations Flow

- Tendering → Procurement → Site execution → Billing → Project closure.

Key Modules

- Project & Contract Management
- Material Procurement & Tracking
- Site Labour HR & Payroll
- Equipment & Asset Management
- Finance (job costing, client billing, VAT)

Profit Centres

- By project (road project, housing estate)
 - By client contract
-

8. Education & Training Institutions

Operations Flow

- Student enrollment → Learning delivery → Exams → Certification → Alumni management.

Key Modules

- Student Information System (SIS)
- Timetable & Scheduling
- eLearning & Exam Mgmt
- Finance (fees, scholarships, grants)
- HR (lecturers, support staff)

Profit Centres

- By school/college branch
 - By program (primary, secondary, university courses)
-

ERP Expanded Industry Template – Manufacturing & Processing

1. Business Overview

Covers factories, food processing, textiles, plastics, beverages, and similar industries. Operations span **raw material procurement** → **production** → **quality** → **distribution** → **sales**.

2. Core ERP Modules

◆ Procurement & Supply Chain

- Vendor registration & contracts
- Raw material ordering (with MOQ & lead times)
- Supplier evaluation & compliance
- Smart Invoice & OCR scanning for supplier invoices
- Import duties, customs clearance

◆ Inventory & Warehouse

- Multi-warehouse tracking (raw materials, WIP, finished goods)
- Batch/lot management & expiry tracking
- Stock reconciliations & adjustments
- Barcode/QR integration
- Automated stock alerts

◆ Production Planning & MRP

- Bill of Materials (BOM) configuration
- Work Order scheduling
- Machine maintenance planning
- Labour allocation & shift tracking
- Wastage & scrap monitoring

◆ Quality Control & Compliance

- Raw material QC before production
- In-process inspections
- Finished product certifications

- Compliance with industry standards (ISO, HACCP, ZABS)

◆ Sales & Distribution

- B2B & B2C sales channels
- Distributor & agent networks
- Sales orders, quotations, and invoicing
- Delivery challans & dispatch notes
- Route/fleet optimization

◆ Finance & Accounting

- Cost of Goods Sold (COGS) automation
- Multi-currency, FX gains/losses
- Taxation (VAT, PAYE, excise, customs, withholding)
- Journals, ledgers, trial balance, financial statements
- Smart Invoice compliance

◆ HR & Payroll

- Permanent & casual workforce management
- Overtime & allowances
- Union deductions, gratuity, NAPSA & NHIMA
- Shift/attendance integration with payroll

◆ Overheads & Utilities

- Electricity, water, fuel usage tracking
- Overhead allocation to production units
- Cost centre distribution

3. Branches & Departments

- **Head Office** – Finance, HR, Admin
 - **Factory 1** – Production Line A (e.g., edible oils)
 - **Factory 2** – Production Line B (e.g., maize meal)
 - **Warehouse 1** – Raw materials storage
 - **Warehouse 2** – Finished goods depot
 - **Distribution depots** – Lusaka, Ndola, Kitwe, Livingstone
-

4. Products & Services Mapping

- **Product Lines:** Cooking oil, maize meal, beverages, textiles
 - **By-products:** Packaging waste, animal feed (from husks)
 - **Services:** Transport, private label processing
-

5. Cost & Profit Centres

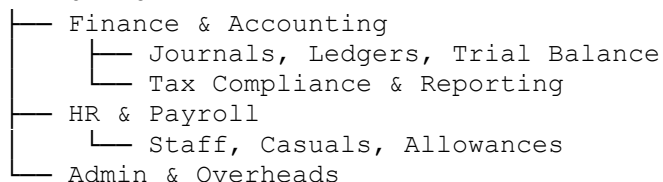

- **Cost Centres:** Procurement, HR, Production Line A, Production Line B, Warehousing, Distribution
 - **Profit Centres:**
 - By product line (Oil, Maize Meal, Textiles)
 - By branch (Factory 1, Factory 2, Depots)
 - By customer segment (wholesale, retail, exports)
-

6. Reporting & Analytics Layer

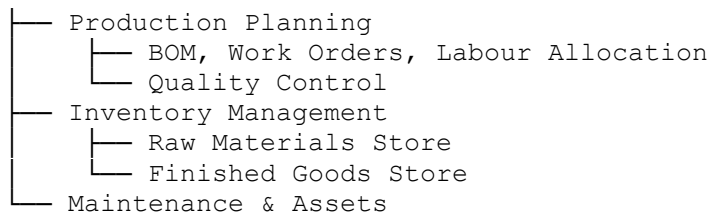

- Daily production vs. capacity utilization
 - Sales & distribution by region
 - Cost per unit produced
 - Profitability by product line
 - Overhead absorption into product costing
 - Branch-wise performance dashboard
-

7. Visual ERP Flow (Text Representation)

HEAD OFFICE

FACTORIES

DISTRIBUTION & SALES

- └ Agent/Distributor Sales
- └ Fleet & Route Optimization
- └ Customer Service & CRM

COST & PROFIT CENTRES

- └ Cost Centres: HR, Procurement, Production Lines
 - └ Profit Centres: Product Lines, Branches, Regions
-

ERP Expanded Industry Template – Agriculture & Agribusiness

1. Business Overview

Designed for **smallholder, medium, and large-scale farms** as well as **agribusiness enterprises** (crop farming, livestock, milling, abattoirs, agro-shops). Covers end-to-end: **input procurement** → **farming** → **harvesting/processing** → **storage** → **distribution** → **sales**.

2. Core ERP Modules

◆ Input Procurement

- Vendor management (seeds, fertilizers, pesticides)
- Farm equipment procurement
- Subsidy/credit tracking (e.g., CEEC, FISP, grants)
- OCR/Smart Invoice for input invoices

◆ Farm Operations

- Crop planning (per block/field)
- Livestock management (breeding, feed, vaccination)
- Labour allocation & attendance (casual workers, seasonal)
- Equipment usage logs

◆ Processing & Value Addition

- Milling, abattoir, dairy, oil pressing
- Quality & safety compliance (HACCP, ZABS)
- Packaging & branding integration

◆ Storage & Warehousing

- Silo/warehouse management
- Cold chain logistics for perishables
- Grain moisture & pest control tracking
- Batch/lot assignment for produce

◆ Distribution & Sales

- Wholesale to retailers/distributors
- Agro-shop retail sales
- Export tracking (customs, duties, certifications)
- Fleet & logistics

◆ Finance & Accounting

- Crop/livestock costing
- Subsidies, grants, donor fund reporting
- FX for exports (multi-currency)
- Tax compliance (VAT, PAYE, WHT)
- Profit & loss by farm block, product line

◆ HR & Payroll

- Seasonal worker payroll
 - Contract labour & casuals
 - Deductions: NAPSA, NHIMA, union fees
 - Health & safety compliance training
-

3. Branches & Departments

- **Farm Blocks** – Crop A (maize), Crop B (soya), Crop C (vegetables)
 - **Livestock Units** – Cattle, Poultry, Pigs, Goats
 - **Processing Units** – Milling, Abattoir, Oil pressing
 - **Warehouses** – Silos, Cold Storage
 - **Distribution Points** – Agro-shops, depots
-

4. Products & Services Mapping

- **Products:** maize meal, soya oil, beef, milk, poultry, eggs
 - **By-products:** manure, husks, animal feed
 - **Services:** custom milling, veterinary services, transportation
-

5. Cost & Profit Centres

- **Cost Centres:** Inputs, Farm Operations, Labour, Processing, Distribution
- **Profit Centres:**

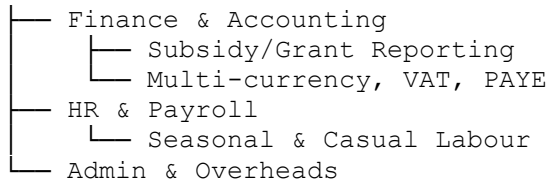

- By crop (maize, soya, vegetables)
 - By livestock (cattle, poultry, dairy)
 - By processing unit (milling, abattoir, oil press)
 - By retail outlet (agro-shops, depots)
-

6. Reporting & Analytics

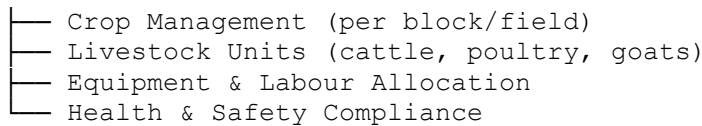

- Yield per hectare by crop
 - Livestock mortality & productivity
 - Input vs output cost analysis
 - Farm block profitability
 - Distribution & export revenue tracking
-

7. Visual ERP Flow (Text Representation)

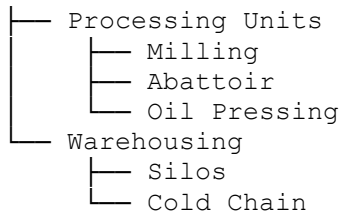

HEAD OFFICE

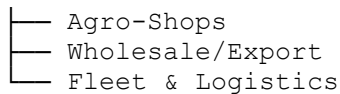

FARM OPERATIONS

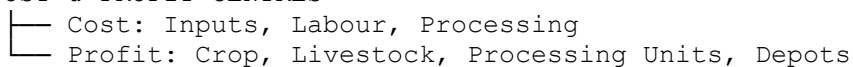

PROCESSING & STORAGE

COST & PROFIT CENTRES

ERP Expanded Industry Template – Agriculture & Agribusiness

(Expanded by Branches & Departments)

1. Head Office

Finance & Accounting

- General Ledger, Journals, Trial Balance
- Crop costing (seed → harvest cost)
- Livestock costing (feed, vet, mortality rates)
- Grant/subsidy fund management (FISP, CEEC, donor-funded)
- Tax compliance: VAT, PAYE, NHIMA, WHT, Customs
- Multi-currency handling (export FX, hedging)
- Automated Smart Invoice & OCR scanning

HR & Payroll

- Seasonal & casual workers onboarding
- Permanent staff management (farm managers, vets, drivers)
- Biometric attendance & shift tracking
- Payroll with NAPSA, NHIMA, Union deductions
- Training records (health & safety, pesticide handling)
- Housing/meal allowances for farm staff

Admin & Overheads

- Land lease/rental agreements
 - Utilities (electricity, water, fuel)
 - Communication costs (satellite internet, radio)
 - Legal & regulatory compliance (ZEMA, council permits)
 - Insurance (livestock, crops, equipment)
-

2. Farm Operations

Crop Management (per Block/Field)

- Land mapping & GPS integration
- Crop rotation planning
- Planting schedules
- Irrigation & fertilization tracking
- Pest & disease control logs
- Yield monitoring (expected vs actual)

Livestock Units

Cattle

- Breeding cycles, artificial insemination records
- Vaccination schedules
- Feed consumption & cost tracking
- Dairy yield (per cow, daily)
- Mortality logs

Poultry

- Broiler & layer batch management
- Feed & water automation logs
- Egg collection & grading
- Mortality & disease outbreak reports

Goats/Sheep/Pigs

- Herd management
- Breeding records
- Feed and medication logs

Equipment & Labour Allocation

- Tractors, ploughs, irrigation systems usage logs
- Maintenance schedules (farm machinery)
- Labour shift allocation (planting, weeding, harvesting)
- Cost allocation per field or herd

Health & Safety Compliance

- Protective gear issuance (gloves, boots, masks)
 - Pesticide handling certifications
 - First-aid/clinic reports
 - Audit trail of accidents/incidents
-

3. Processing & Value Addition

Milling Unit

- Maize/sorghum/soya input tracking
- Yield conversion ratios
- Bagging & packaging automation
- Quality tests (moisture %, contamination)
- Distribution to depots

Abattoir

- Animal intake & vet clearance
- Slaughtering line logs
- Meat grading & certification
- By-products (hides, bones, manure) management
- Cold storage allocation

Oil Pressing/Dairy

- Oil extraction yield & refining logs
 - Dairy processing (milk pasteurization, cheese, yoghurt)
 - Batch testing & safety compliance
 - Packaging & branding
-

4. Storage & Warehousing

Silos & Dry Warehouses

- Grain intake & grading (moisture % checks)
- Lot/batch assignment
- Pest control fumigation schedules
- Automated weighbridge integration
- Stock reconciliations

Cold Chain Warehousing

- Freezer/chiller temperature logs
 - Meat & dairy storage compliance
 - Expiry & best-before tracking
 - Distribution allocation to markets
-

5. 🚚 Distribution & Sales

Agro-Shops (Retail Outlets)

- POS integration (cash, credit, mobile money)
- Agro-input sales (fertilizers, pesticides)
- Finished products retail (maize meal, soya oil, eggs)
- Loyalty & customer rewards

Wholesale & Export

- Distributor/agent management
- Export certifications (ZABS, ZRA, COMESA/SADC)
- Customs, duties, and cross-border taxes
- Contract-based B2B sales

Fleet & Logistics

- Vehicle allocation (tractors, trucks, refrigerated vans)
 - Route optimization (farm → depot → wholesale)
 - Fuel consumption tracking
 - Maintenance & service logs
 - GPS tracking & delivery confirmations
-

6. 💰 Cost & Profit Centres

Cost Centres

- Inputs (seeds, feed, fertilizer, pesticides)
- Labour (seasonal, permanent)
- Processing (energy, equipment, packaging)
- Logistics (fuel, customs, repairs)

Profit Centres

- By crop (maize, soya, vegetables, tobacco)
 - By livestock (dairy, beef, poultry, pigs)
 - By processing unit (milling, abattoir, oil pressing)
 - By outlet (farm gate sales, agro-shops, export contracts)
-

7. Reporting & Analytics Dashboards

- Yield per hectare (by crop & season)
 - Livestock mortality vs productivity rates
 - Cost per kg of maize/litre of milk/ton of meat
 - Overhead absorption (utilities, logistics into unit cost)
 - Branch/profit centre profitability matrix
 - Donor/grant compliance reporting
-

Livestock ERP Expanded Industry Templates

1. Cattle (Beef & Dairy)

Procurement & Supply

- Purchase of breeding stock (bulls, cows, calves)
- Feed procurement (hay, silage, concentrates)
- Veterinary drugs, vaccines, supplements
- Equipment (milking machines, crush pens, water troughs)

Farm Operations

- Breeding (natural, AI, embryo transfer)
- Calf rearing
- Daily feeding & water supply logs
- Vaccination & veterinary care
- Health monitoring (weight, temperature, disease alerts)

Processing & Manufacturing

Beef:

- Abattoir intake with vet clearance
- Slaughtering, grading, packaging
- By-products: hides, bones, manure

Dairy:

- Milk collection & cooling tanks
- Pasteurization, homogenization
- Packaging into sachets, bottles, cartons

Value Addition

- Beef: processed sausages, canned beef, minced meat
- Dairy: cheese, yoghurt, butter, ice cream, milk powder

Sales & Distribution

- Wholesale to supermarkets, butcheries, distributors
- Exports (COMESA, SADC markets)
- Dairy sales (milk, yoghurt, cheese shops, retailers)
- Direct sales to consumers at farm outlets

Cost & Profit Centres

- **Cost:** Feed, veterinary care, labour, processing equipment, utilities
- **Profit:**
 - Beef sales (wholesale, retail, export)
 - Dairy products (milk, yoghurt, cheese, ice cream)
 - By-products (hides to leather, manure to fertilizer)

Reporting & Analytics

- Milk yield per cow per day
- Feed conversion ratio (kg feed → kg meat/milk)
- Mortality & disease rates
- Profitability by beef vs dairy operations
- By-product revenue contribution

Cattle ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └─ Breeding Stock (bulls, cows, calves)
- └─ Feed (hay, silage, concentrates)
- └─ Veterinary Supplies & Vaccines
- └─ Equipment (milking machines, pens, troughs)

FARM OPERATIONS

- └─ Breeding & Calf Rearing
- └─ Daily Feeding & Water Logs
- └─ Veterinary Care & Vaccinations
- └─ Health Monitoring (weight, temperature, disease)

PROCESSING & MANUFACTURING

- └─ Beef (slaughter, grading, packaging)
- └─ Dairy (milk collection, pasteurization, packaging)

VALUE ADDITION

- └─ Beef Sausages, Canned Beef
- └─ Dairy Products (cheese, yoghurt, butter, ice cream)

SALES & DISTRIBUTION

- └─ Wholesale to supermarkets, butcheries
- └─ Exports (regional markets)
- └─ Dairy sales to shops/retailers
- └─ Farm Outlet Sales

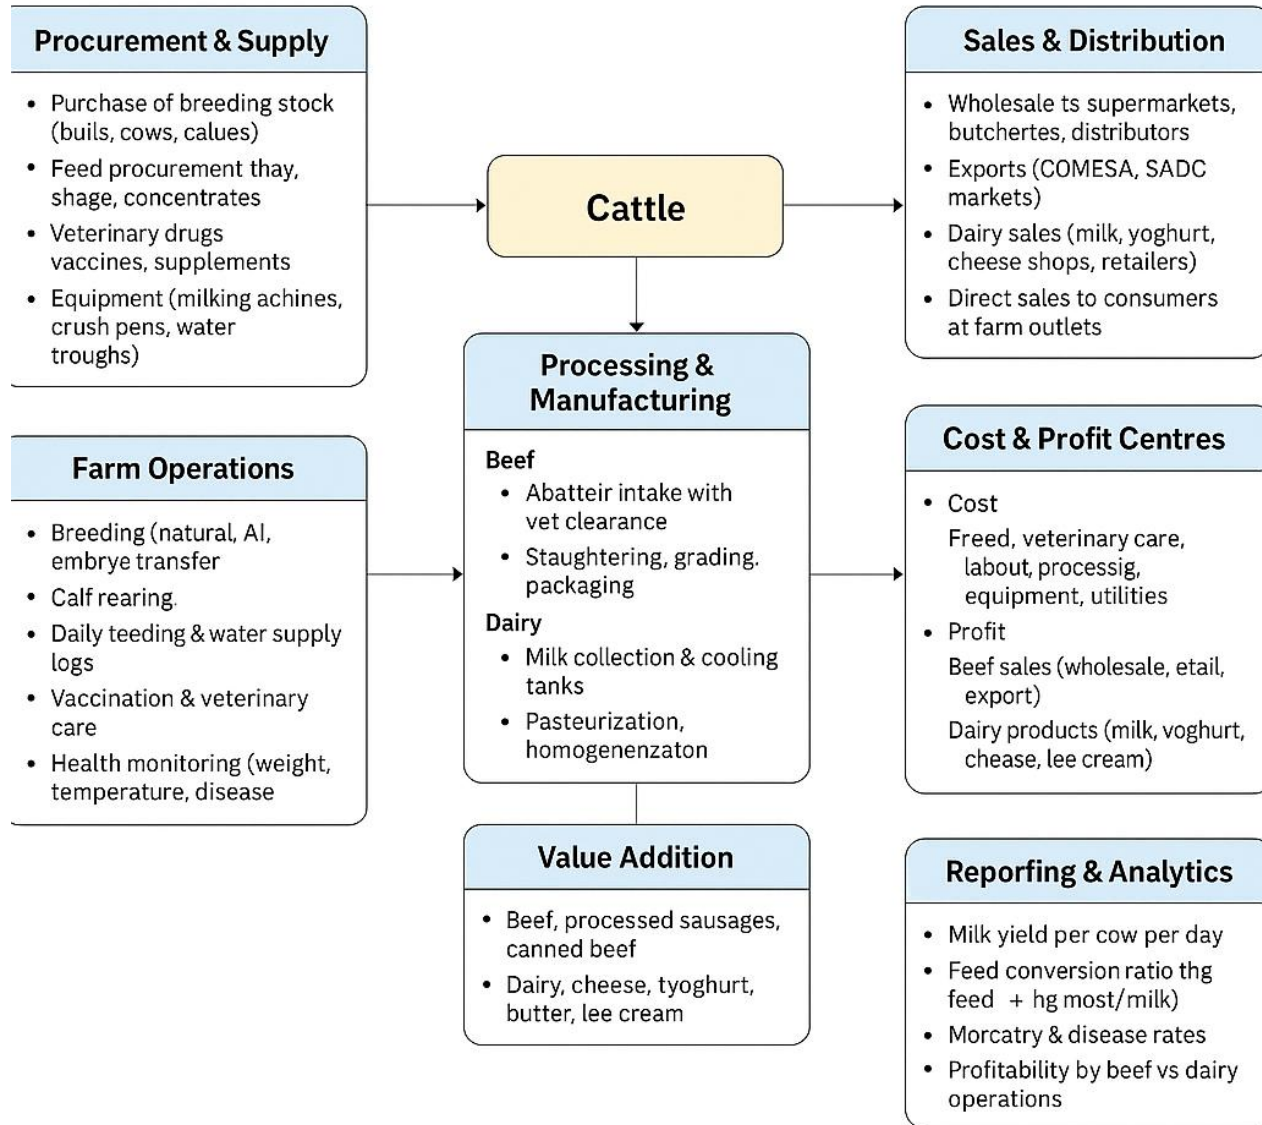

COST & PROFIT CENTRES

- └─ Cost: Feed, Vet, Labour, Processing
- └─ Profit: Beef, Dairy, By-products (hides, manure)

REPORTING & ANALYTICS

- └─ Milk Yield per Cow
- └─ Feed Conversion Ratio
- └─ Mortality & Disease Rates
- └─ Profitability by Beef vs Dairy

ERP Expanded Industry Template - Cattle

2. 🐔 Poultry (Broilers & Layers)

Procurement & Supply

- Day-old chicks (DOCs)
- Feed (starter, grower, finisher)
- Vaccines & supplements
- Housing materials (cages, deep litter, heaters)

Farm Operations

- Broilers: 6–8 week cycles (batch management)
- Layers: egg production (18 months cycle)
- Feed & water logs (automated feeding systems)
- Temperature & lighting management
- Mortality tracking & vet care

Processing & Manufacturing

Broilers:

- Slaughter, defeathering, dressing
- Packaging (whole chicken, portions)
- By-products: feathers (pillow filling, feed)

Layers:

- Egg grading (sizes, quality)
- Packaging (trays, cartons)
- Cold storage for eggs

Value Addition

- Processed chicken: smoked chicken, nuggets, sausages
- Eggs: powdered eggs, liquid eggs, mayonnaise, pastries

Sales & Distribution

- Wholesale to supermarkets, restaurants, hotels
- Exports (processed chicken, eggs to neighbouring countries)
- Retail sales (farm outlets, kiosks)

Cost & Profit Centres

- **Cost:** Chicks, feed, vaccines, housing, labour
- **Profit:**
 - Broiler sales (live, dressed, processed)
 - Egg sales (raw, graded, processed)
 - By-products (feathers, manure)

Reporting & Analytics

- Mortality rate per batch (%)
- Feed conversion ratio (kg feed → kg weight gain)
- Egg production per bird per year
- Cost per kg of chicken / per tray of eggs
- Profitability per cycle (broilers) and per year (layers)

Poultry ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └ Day-old Chicks
- └ Feed (Starter, Grower, Finisher)
- └ Vaccines & Supplements
- └ Housing Materials (cages, heaters)

FARM OPERATIONS

- └ Broilers (6-8 week cycles)

- └ Eggs (powdered, liquid, mayonnaise)

SALES & DISTRIBUTION

- └ Wholesale to supermarkets & restaurants
- └ Exports (eggs & processed chicken)
- └ Farm Outlet Sales

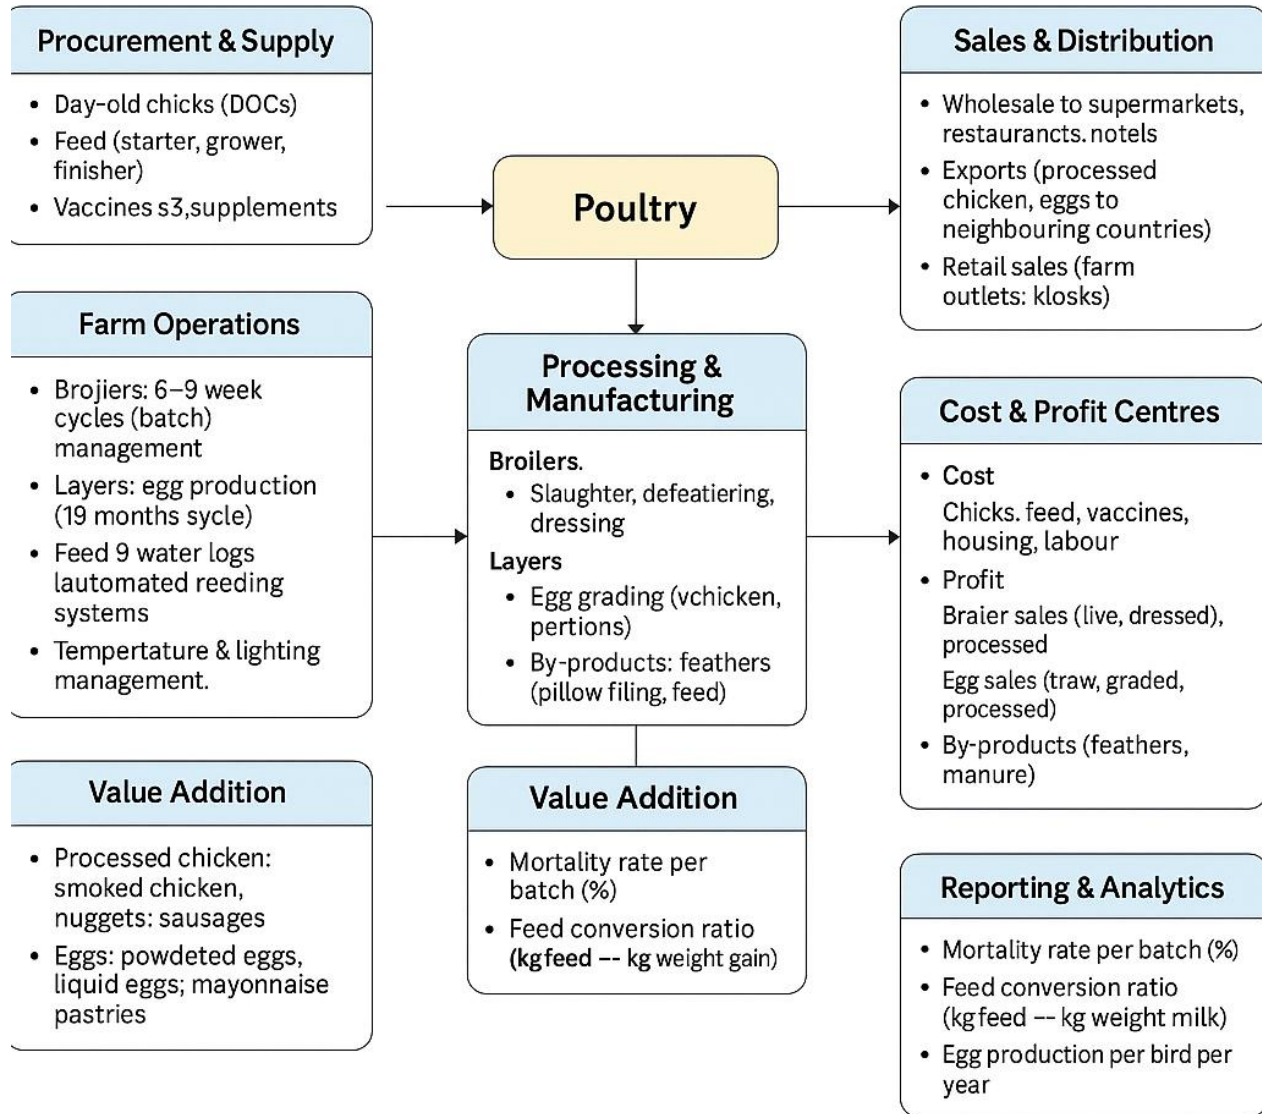

COST & PROFIT CENTRES

- └ Cost: Chicks, Feed, Housing, Labour
- └ Profit: Broilers, Eggs, Processed Products

REPORTING & ANALYTICS

- Mortality Rate per Batch
- Feed Conversion Ratio
- Egg Production per Bird
- Cost per Tray/Kg Produced

ERP Expanded Industry Template – Poultry

3. 🐐 Goats (Meat & Milk)

Procurement & Supply

- Breeding stock (bucks, does, kids)
- Feed (pasture, hay, supplements)
- Veterinary drugs & vaccines
- Housing & fencing materials

Farm Operations

- Breeding & kidding records
- Feed & grazing management
- Disease management (PPR, worms)
- Daily milk yield logs (if dairy goats)

Processing & Manufacturing

Meat:

- Slaughtering & dressing
- Meat cuts (legs, ribs, chops)
- By-products: skins (leather), manure

Dairy:

- Milk collection & cooling
- Cheese (goat cheese), yoghurt, ice cream

Value Addition

- Packaged goat meat (fresh, frozen)
- Smoked goat meat, sausages
- Dairy products: cheese, yoghurt, ice cream

Sales & Distribution

- Butcheries, supermarkets, restaurants
- Exports (Middle East, Africa)
- Dairy product retail sales

Cost & Profit Centres

- **Cost:** Feed, vet, labour, processing
- **Profit:**
 - Meat sales
 - Dairy sales (cheese, yoghurt)
 - By-products (skins for leather, manure as fertilizer)

Reporting & Analytics

- Kidding rates (kids per doe per year)
- Mortality rates
- Milk yield per goat per day
- Profit margins by meat vs dairy goats

Goats ERP Flow (Text Representation)

ERP Expanded Industry Template –Goats

4. 🐷 Pigs (Pork & Processed Products)

Procurement & Supply

- Breeding stock (boars, sows, piglets)
- Feed (maize bran, concentrates, premixes)
- Veterinary supplies & vaccines
- Housing (pens, waterers, feeders)

Farm Operations

- Breeding cycles (gestation, farrowing)
- Piglet rearing & weaning
- Feeding schedules & feed conversion tracking
- Vet care (swine fever, worm control)

Processing & Manufacturing

- Slaughter & dressing
- Pork cuts (ribs, chops, belly, trotters)
- By-products: fat (lard), bones, skin

Value Addition

- Bacon, ham, sausages, canned pork
- Smoked pork, packaged pork chops
- Lard processing (soap, cooking fat)

Sales & Distribution

- Butcheries, supermarkets, restaurants
- Wholesale to hotels & food chains
- Export (processed pork, bacon)
- Farm outlet sales

Cost & Profit Centres

- **Cost:** Feed, vet care, labour, utilities
- **Profit:**
 - Pork sales (fresh, frozen)
 - Processed pork products (bacon, ham, sausages)
 - By-products (lard, manure for biogas/fertilizer)

Reporting & Analytics

- Feed conversion ratio (kg feed → kg pork)
 - Litter size & mortality rates
 - Cost per kg of pork produced
 - Revenue share: fresh pork vs processed products
-

Pigs ERP Flow (Text Representation)

ERP Expanded Industry Template - Pigs

Cross-Livestock Reporting & Analytics Layer

- Yield dashboards (milk, meat, eggs)
 - Cost per kg/litre per livestock type
 - Mortality & disease trends
 - Profitability by livestock unit (beef, poultry, goats, pigs)
 - By-product revenue contribution %
 - Export vs local market sales ratio
-

Sequence for crops:

1. 🌽 Maize
 2. 🌱 Soya
 3. 🥬 Vegetables (tomatoes, onions, cabbages)
 4. 🌾 Cash Crops (tobacco, cotton, sugarcane)
-

🌽 ERP Expanded Industry Template – Maize

1. Procurement & Supply

- Seed procurement (hybrid, open-pollinated varieties)
 - Fertilizers (basal dressing, top dressing)
 - Pesticides & herbicides
 - Farm equipment (tractors, planters, harvesters)
 - Irrigation systems (if commercial scale)
 - Bags & packaging materials for storage/marketing
-

2. Farm Operations

- **Land preparation** (ploughing, harrowing, ridging)
 - **Planting** (seeding density, mechanized/manual)
 - **Crop maintenance:**
 - Fertilizer application
 - Weed control (manual, chemical)
 - Pest control (fall armyworm, maize streak virus)
 - **Harvesting:**
 - Manual or mechanical
 - Moisture content measurement
 - Drying for storage
-

3. Processing & Manufacturing

- **Primary processing:**
 - Shelling, drying, cleaning

- Bagging in silos/warehouses
 - **Value chain processing:**
 - Milling into mealie meal (breakfast meal, roller meal, bran)
 - Cornflakes, maize flour, starch, glucose syrup, ethanol
 - By-products: animal feed (bran, husks)
-

4. Value Addition

- Fortified maize meal (vitamins, minerals)
 - Packaged maize snacks (corn puffs, roasted maize)
 - Alcohol production (breweries, distilleries)
 - Biofuel (ethanol from maize)
 - Bran as livestock feed or commercial sale
-

5. Sales & Distribution

- **Domestic:** supermarkets, wholesalers, retailers, agro-dealers
 - **Institutional:** schools, hospitals, prisons, army supplies
 - **Exports:** regional markets (COMESA, SADC, cross-border trade)
 - **Contracts:** Government strategic food reserves (FRA in Zambia)
 - **Direct sales:** farm gate, agro-shops
-

6. Cost & Profit Centres

- **Cost centres:**
 - Inputs (seeds, fertilizers, pesticides)
 - Labour (seasonal workers, machine operators)
 - Processing costs (milling, packaging, utilities)
 - Transport & distribution
 - **Profit centres:**
 - Grain sales (local & export)
 - Processed maize meal sales
 - Value-added maize products (starch, cornflakes, ethanol)
 - By-products (bran for feed)
-

7. Reporting & Analytics

- Yield per hectare (tons/ha vs expected)
- Cost per ton of maize produced

- Storage losses vs processed output
 - Milling conversion ratio (grain → mealie meal % yield)
 - Market sales by channel (domestic, institutional, export)
 - Profit margins by product line (raw grain vs processed products)
 - Forecasting (rainfall vs yield models)
-

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └─ Seeds, Fertilizers, Pesticides
- └─ Farm Equipment
- └─ Packaging & Bags

- └─ Yield per hectare
 - └─ Milling conversion ratio
 - └─ Sales by channel
 - └─ Profit margins by product line
-

ERP Expanded Industry Template – Soya (Soybeans)

1. Procurement & Supply

- Certified seed procurement (early-maturing, high-protein varieties)
 - Fertilizers (lime, inoculants, foliar feeds)
 - Pesticides & herbicides (weed, pest, fungal control)
 - Farm machinery (planters, sprayers, combine harvesters)
 - Storage bags (airtight, fumigation bags)
-

2. Farm Operations

- **Land preparation:** liming, ploughing, ridging
 - **Planting:** row spacing, seed density, inoculant application
 - **Crop maintenance:**
 - Weeding (manual or herbicide spraying)
 - Fertilizer & inoculant top-ups
 - Pest control (aphids, rust, pod borer)
 - **Harvesting:**
 - Moisture monitoring (optimal 13–15%)
 - Mechanical or manual harvesting
 - Drying and shelling
-

3. Processing & Manufacturing

- **Primary processing:**
 - Cleaning, drying, shelling
 - Bagging & storage
 - **Industrial processing:**
 - Edible oil extraction (soybean oil)
 - Soybean meal production (animal feed)
 - Soy protein concentrates (for food industry)
 - Soy flour, textured vegetable protein (TVP)
-

4. Value Addition

- Cooking oil (refined, packaged)
 - Protein-rich foods: soy milk, tofu, soy yoghurt
 - Industrial uses: biodiesel from soybean oil
 - By-products: soybean cake (animal feed), lecithin (emulsifier)
-

5. Sales & Distribution

- **Domestic markets:** supermarkets, wholesalers, agro-shops
 - **Institutional buyers:** feed manufacturers, bakeries, breweries
 - **Exports:** edible oil, soybean meal, raw soybeans
 - **Government & NGOs:** food security, school feeding programs
 - **Direct sales:** agro-dealer networks, farm gate
-

6. Cost & Profit Centres

- **Cost centres:**
 - Inputs (seeds, fertilizers, pesticides, inoculants)
 - Labour (planting, weeding, harvesting)
 - Processing (oil extraction, packaging)
 - Storage & transport
 - **Profit centres:**
 - Raw soybean sales
 - Soy oil sales (refined, packaged)
 - Soy protein foods (tofu, soy milk)
 - By-products (soybean cake for feed, lecithin for food industry)
-

7. Reporting & Analytics

- Yield per hectare (tons vs expected)
 - Oil extraction ratio (% oil vs meal)
 - Cost per litre of soy oil produced
 - Market revenue by segment (raw beans, oil, protein foods)
 - Export vs domestic sales ratios
 - Profitability by product line (raw, processed, value-added)
-

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └─ Seeds, Fertilizers, Inoculants
- └─ Farm Machinery
- └─ Packaging Materials

□ ERP Expanded Industry Template – Vegetables (Tomatoes, Onions, Cabbages)

1. Procurement & Supply

- Seed procurement (hybrid, open-pollinated, disease-resistant varieties)
- Fertilizers (organic compost, NPK, foliar feeds)
- Pesticides, fungicides, insecticides
- Irrigation systems (drip, sprinklers)
- Seedlings & nursery trays
- Packaging materials (crates, sacks, cartons, plastic wraps)

2. Farm Operations

- **Land preparation:** ploughing, ridging, greenhouse/tunnel preparation
- **Planting:** direct seeding or transplanting seedlings
- **Crop management:**
 - Irrigation scheduling (drip or furrow)
 - Fertilizer application
 - Pest & disease control (fungal blight, cutworms, aphids)
 - Weed control (manual, mulching, herbicides)
- **Harvesting:**
 - Hand picking (tomatoes, onions)
 - Proper timing (maturity stages for market vs storage)
 - Sorting & grading

3. Processing & Manufacturing

- **Primary processing:**
 - Cleaning, sorting, grading
 - Cold storage or drying
- **Industrial processing:**
 - Tomato paste, sauces, ketchup
 - Dehydrated onions (powder, flakes)
 - Sauerkraut, pickled cabbage
 - Frozen vegetable packs

4. Value Addition

- Fresh-cut vegetables (washed, packed, ready-to-eat)
- Branded vegetable packaging (retail packs, supermarkets)
- Juices (tomato juice, vegetable blends)
- Dried vegetable mixes
- Organic certification & premium branding

5. Sales & Distribution

- **Domestic:** markets, supermarkets, agro-shops
- **Institutional:** schools, hospitals, hotels, restaurants
- **Exports:** processed products (sauces, dehydrated vegetables)
- **Farm gate:** fresh vegetable direct sales
- **Contract farming:** supplying retailers & food processors

6. Cost & Profit Centres

- **Cost centres:**
 - Inputs (seeds, fertilizers, pesticides)
 - Irrigation & greenhouse operations
 - Labour (weeding, spraying, harvesting)
 - Post-harvest handling (packaging, cold storage)
- **Profit centres:**
 - Fresh vegetable sales (bulk & retail)
 - Processed products (sauces, powders, pickled)
 - Value-added packs (ready-to-cook, frozen)
 - By-products (vegetable waste into compost)

7. Reporting & Analytics

- Yield per hectare per vegetable type
 - Post-harvest loss % vs total harvested
 - Market pricing trends (seasonal highs/lows)
 - Cost per kg produced vs sale price
 - Sales breakdown by channel (wholesale, retail, export)
 - Profit margins per product line (fresh, processed, value-added)
-

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- Seeds, Fertilizers, Pesticides
- Irrigation Systems
- Packaging Materials

FARM OPERATIONS

- Land Preparation & Planting
- Irrigation, Fertilizer, Pest Control
- Harvesting & Sorting

PROCESSING & MANUFACTURING

- Sorting, Grading, Cold Storage
- Tomato Paste, Sauces, Juices
- Dehydrated Onions, Pickled Cabbage
- Frozen Packs

VALUE ADDITION

- Branded Fresh Packs
- Dried Vegetable Mixes
- Juices
- Organic Certification

SALES & DISTRIBUTION

- Local Markets & Retail
- Institutional Buyers
- Export Markets
- Contract Farming

COST & PROFIT CENTRES

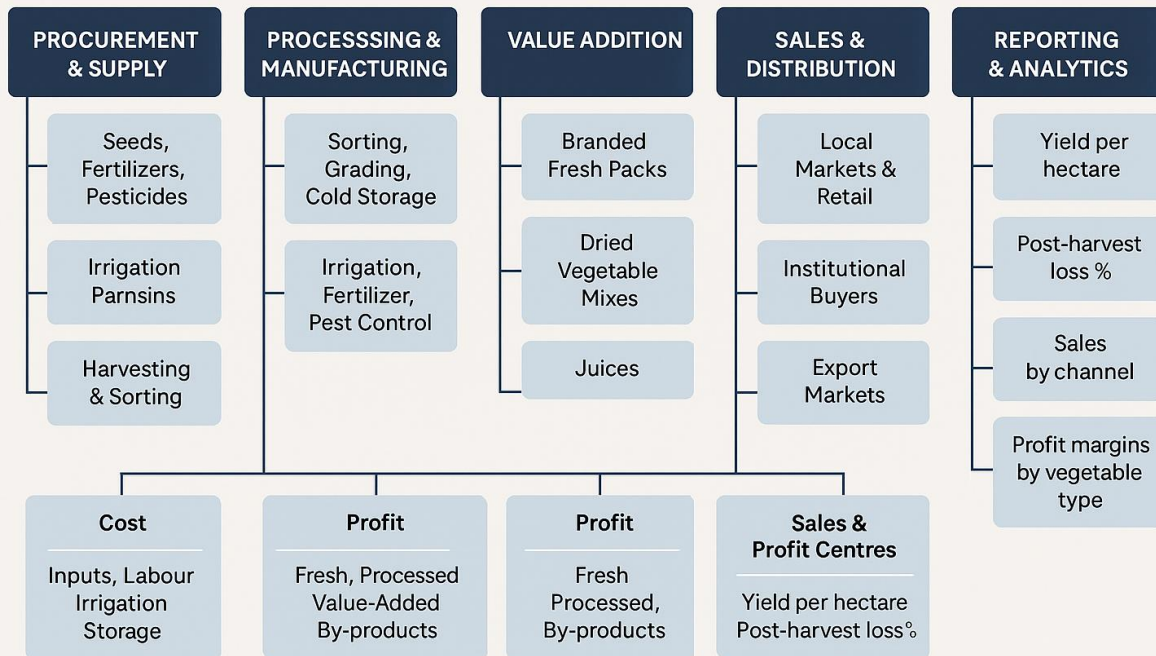

- Cost: Inputs, Labour, Irrigation, Storage
- Profit: Fresh, Processed, Value-Added, By-products

REPORTING & ANALYTICS

- Yield per hectare
 - Post-harvest loss %
 - Sales by channel
 - Profit margins by vegetable type
-

ERP Expanded Industry Template

Vegetable

ERP Expanded Industry Template – Cash Crops (Tobacco, Cotton, Sugarcane)

1. Procurement & Supply

- Certified seed procurement (cottonseed, tobacco seedlings, cane cuttings)
- Fertilizers (NPK, urea, lime for acidic soils)
- Pesticides, herbicides, fungicides
- Irrigation systems (sugarcane drip, flood irrigation)
- Farm machinery (tractors, harvesters, sprayers)
- Packaging (bales, sacks, curing barns)

2. Farm Operations

- **Land preparation:** ploughing, ridging, irrigation system setup
- **Planting:** direct seeding (cotton), transplanting (tobacco), cane planting (setts)
- **Crop maintenance:**
 - Fertilizer application (stage-based)
 - Irrigation scheduling (sugarcane: heavy water demand)
 - Pest control (bollworm in cotton, mosaic virus in tobacco, borers in cane)
 - Weed management
- **Harvesting:**
 - Cotton: manual picking/mechanical harvesters
 - Tobacco: leaf harvesting, curing, grading
 - Sugarcane: manual cutting, mechanical harvesting, bundling

3. Processing & Manufacturing

- **Tobacco:**
 - Leaf curing (barns, kilns, sun-drying)
 - Grading & baling
 - Processing into cigarettes, cigars, chewing tobacco
- **Cotton:**
 - Ginning (separating seed & lint)
 - Cottonseed oil extraction
 - Cotton lint → textile manufacturing (spinning, weaving, garments)

- **Sugarcane:**
 - Crushing mills (juice extraction)
 - Raw sugar refining & packaging
 - Molasses production (for ethanol, animal feed)
 - Ethanol distilleries (biofuel & liquor industry)
-

4. Value Addition

- **Tobacco:** branded cigarettes, cigars, flavoured tobaccos
 - **Cotton:** garments, textiles, cottonseed cake for animal feed
 - **Sugarcane:** refined sugar, packaged sugar cubes, ethanol, rum, power cogeneration from bagasse
-

5. Sales & Distribution

- **Domestic:** agro-shops, textile mills, sugar refineries, breweries
 - **Export markets:**
 - Tobacco to international auctions
 - Cotton lint & garments to textile industries (Asia, Europe)
 - Sugar & ethanol to regional/international buyers
 - **Government contracts:** parastatal procurement (food reserves, textiles for uniforms)
 - **Retail chains:** supermarkets, wholesale distributors
-

6. Cost & Profit Centres

- **Cost centres:**
 - Inputs (seeds, fertilizers, chemicals)
 - Irrigation & energy (high for sugarcane)
 - Labour-intensive harvesting
 - Processing & refining (ginning, curing, milling)
 - **Profit centres:**
 - Tobacco leaf & finished products
 - Cotton lint, textiles, garments, cottonseed oil
 - Sugar, ethanol, molasses, bagasse power sales
-

7. Reporting & Analytics

- Yield per hectare (kg/bales/tons per crop)
- Processing efficiency (ginning %, sugar recovery %, tobacco curing quality %)

- Export revenue by product line
 - Domestic vs international sales ratios
 - Profitability by product line (raw vs processed)
 - Compliance with trade standards (ISO, Fair Trade, organic certification)
-

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └─ Seeds, Fertilizers, Pesticides
- └─ Irrigation & Machinery
- └─ Packaging Materials

FARM OPERATIONS

- └─ Land Preparation & Planting
- └─ Fertilizer, Irrigation, Pest Control

Combined Master ERP Flow – Multi-Industry Overview

(Manufacturing, Cattle, Poultry, Goats, Pigs)

1. Procurement & Supply (Common Backbone)

- Seeds / Breeding Stock / Raw Materials
 - Fertilizers, Feed, Supplements
 - Veterinary Drugs & Vaccines
 - Farm & Processing Equipment
 - Packaging Materials & Logistics Inputs
-

2. Farm Operations / Production

Manufacturing

- Production Planning (BOM, Work Orders)
- Quality Control
- Inventory (Raw → WIP → Finished Goods)

Cattle

- Breeding & Calf Rearing
- Feeding & Water Logs
- Veterinary Care & Monitoring
- Dairy & Beef Herd Management

Poultry

- Broiler Cycles (6-8 weeks)
- Layers (egg cycle, 18 months)
- Lighting, Temperature, Feeding
- Mortality & Disease Tracking

Goats

- Breeding & Kidding Records
- Grazing & Feeding Management
- Vet Care (PPR, worms)
- Dairy Yield Tracking

Pigs

- └─ Breeding (Gestation, Farrowing)
 - └─ Piglet Weaning & Rearing
 - └─ Feeding & Growth Logs
 - └─ Disease Management (ASF, worm control)
-

3. Processing & Manufacturing

Manufacturing

- └─ Factory Processing
- └─ Packaging & Branding
- └─ Maintenance & Assets

Cattle

- └─ Beef (slaughtering, grading, packaging)
- └─ Dairy (milk, pasteurization, packaging)

Poultry

- └─ Chicken Processing (slaughter, dressing, packaging)
- └─ Egg Processing (grading, cold storage)

Goats

- └─ Meat Processing (grading, cuts, packaging)
- └─ Dairy (cheese, yoghurt, ice cream)

Pigs

- └─ Pork Cuts (ribs, belly, chops)
 - └─ Processed Pork (bacon, ham, sausages, lard)
-

4. Value Addition

- └─ Processed Foods (sausages, yoghurt, canned beef, nuggets, bacon)
 - └─ Packaged & Branded Products (cheese, fortified meat packs, smoked meats)
 - └─ Industrial Products (leather, lard, hides, by-products)
 - └─ Export-ready Packaged Goods
-

5. Sales & Distribution

- └─ Local Markets (butcheries, supermarkets, agro-shops)
 - └─ Institutional Buyers (schools, hospitals, hotels, army, prisons)
 - └─ Export Markets (regional & international)
 - └─ Government Procurement (strategic reserves, food programs)
 - └─ Farm Gate & Direct Sales
-

6. Cost & Profit Centres

- └─ Costs:
 - └─ Inputs (feed, fertilizers, vaccines, raw materials)
 - └─ Labour (farm workers, factory staff)
 - └─ Processing (utilities, packaging, transport)
 - └─ Overheads (administration, compliance, logistics)
 - └─ Profits:
 - └─ Fresh Produce / Meat / Dairy
 - └─ Processed Products (sausages, cheese, bacon, yoghurt)
 - └─ Value-Added Exports
 - └─ By-products (hides, manure, lard, bran, skins)
-

7. Reporting & Analytics

- └─ Yield Metrics (tons/ha, litres per cow, eggs per bird, kg pork per pig)
 - └─ Conversion Ratios (feed → meat/milk/eggs, grain → meal, processing efficiency)
 - └─ Mortality & Disease Rates
 - └─ Sales Channels (domestic vs export, wholesale vs retail)
 - └─ Profitability Analysis by Product Line
 - └─ Compliance Dashboards (traceability, Smart Invoice, ZABS, ISO)
-

✓ This **Combined ERP Flow Text Representation** shows **one unified ERP template** that can serve manufacturing plus livestock industries under a **single ERP umbrella**.

Master ERP Expanded Industry Template – Multi-Sector (Livestock + Crops + Manufacturing)

1. Procurement & Supply (Common Across All)

- └─ Seeds & Seedlings (Maize, Soya, Vegetables, Cash Crops)
 - └─ Breeding Stock (Cattle, Poultry, Goats, Pigs)
 - └─ Fertilizers, Pesticides, Herbicides
 - └─ Feed & Supplements (livestock & crop-specific)
 - └─ Veterinary Drugs & Vaccines
 - └─ Farm Equipment & Machinery (tractors, planters, harvesters)
 - └─ Processing Equipment (mills, abattoirs, oil presses, gins, distilleries)
 - └─ Packaging Materials (bags, cartons, crates, branding supplies)
-

2. Farm Operations / Production

🌾 Crops (Maize, Soya, Vegetables, Cash Crops)

- Land Preparation (ploughing, irrigation setup)
- Planting & Nursery Management
- Crop Maintenance (fertilizer, irrigation, pest control)
- Harvesting (manual/mechanical, moisture monitoring)
- Post-Harvest Handling (drying, sorting, grading)

🐮 Cattle

- Breeding & Calf Rearing
- Feeding & Water Logs
- Veterinary Care & Vaccinations
- Dairy & Beef Herd Management

🐔 Poultry

- Broiler Cycles (6-8 weeks)
- Layer Management (egg cycle, lighting)
- Feeding & Environment Control
- Mortality & Disease Tracking

🐐 Goats

- Breeding & Kidding
- Grazing & Feeding
- Veterinary Care (disease, parasites)
- Dairy Yield Monitoring

🐷 Pigs

- Breeding (Gestation, Farrowing)
- Piglet Weaning & Rearing
- Feeding & Growth Logs
- Disease Management (ASF, worms)

🏭 Manufacturing

- Production Planning (BOM, scheduling)
 - Quality Control & Standards
 - Raw → WIP → Finished Goods
 - Factory Asset Maintenance
-

3. Processing & Manufacturing

🌾 Crops

- Maize: Milling (mealie meal, flour, bran), starch, ethanol
- Soya: Oil extraction, soy protein foods, tofu, soy milk
- Vegetables: Tomato paste, sauces, dehydrated onions, frozen packs
- Cash Crops: Tobacco curing, Cotton ginning & textiles, Sugarcane mills & ethanol

Cattle

- Beef Processing (slaughter, grading, packaging)
- Dairy (milk cooling, pasteurization, cheese, yoghurt)

Poultry

- Broiler Processing (slaughter, cuts, packaging)
- Egg Grading & Storage

Goats

- Meat Processing (slaughter, grading)
- Dairy Products (cheese, yoghurt, ice cream)

Pigs

- Pork Cuts (ribs, chops, belly)
- Processed Pork (bacon, ham, sausages, lard)

Manufacturing

- Industrial Processing (plastics, textiles, food processing)
 - Packaging & Branding
 - By-products Utilization
-

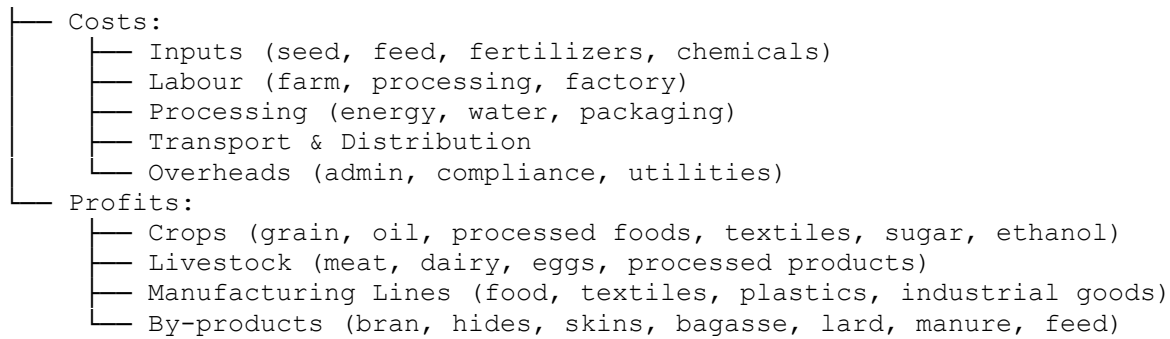

4. Value Addition

- Fortified Foods (maize meal, soy protein)
 - Packaged Snacks (cornflakes, roasted maize, vegetable mixes)
 - Dairy Products (cheese, yoghurt, ice cream, flavoured milk)
 - Processed Meat (sausages, bacon, canned beef, smoked chicken)
 - Industrial Goods (cotton textiles, leather, ethanol, biofuels)
 - By-products (bran, manure, bagasse power, skins, lard, lecithin)
-

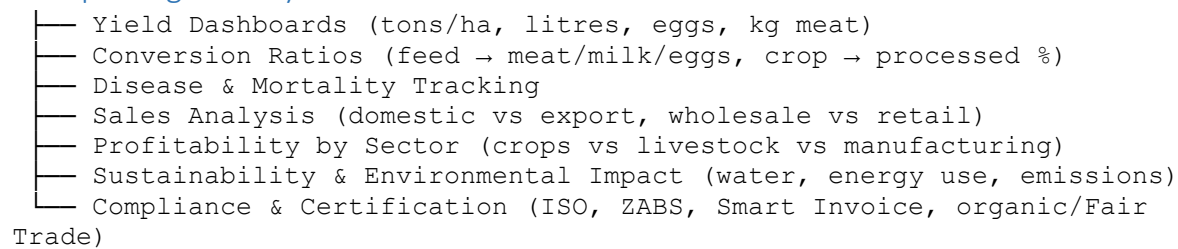

5. Sales & Distribution

- Local Markets (supermarkets, agro-shops, butcheries, open markets)
 - Institutional Buyers (schools, hospitals, prisons, army, hotels)
 - Export Markets (regional & global trade)
 - Government Procurement (food reserves, parastatal contracts)
 - Distribution Channels (depots, cold chain, logistics fleet)
 - Direct/Farm Gate Sales
-

6. Cost & Profit Centres

7. Reporting & Analytics

✓ This **United ERP Framework** now includes **Crops (Maize, Soya, Vegetables, Cash Crops), Livestock (Cattle, Poultry, Goats, Pigs), and Manufacturing** in one holistic ERP model.

1. Broad Master ERP Flowchart (High-Level Overview):

- Crops, Livestock, and Manufacturing grouped as three main categories.
- Shows unified flow from Procurement → Farm Ops/Production → Processing → Value Addition → Sales → Costs/Profits → Reporting.

2. Detailed Master ERP Flowchart (Granular):

- Each crop (Maize, Soya, Vegetables, Cash Crops) and livestock unit (Cattle, Poultry, Goats, Pigs) broken out individually under the ERP umbrella.
 - Manufacturing shown as a separate detailed branch.
-

ERP Expanded Industry Template – Fisheries & Aquaculture

1. Procurement & Supply

- Fingerlings (tilapia, bream, catfish, carp)
 - Fish feed (pellets, mash, live feed, supplements)
 - Water treatment chemicals (pH stabilizers, aeration systems)
 - Nets, cages, and tanks (ponds, raceways, recirculating aquaculture systems)
 - Boats & fishing gear (if capture fisheries included)
 - Cold storage & ice-making machines
 - Packaging materials (vacuum packs, cartons, labeling)
-

2. Farm Operations / Production

- **Pond & Cage Preparation**
 - Pond lining, water quality monitoring (temperature, oxygen, pH)
 - Cage setup for lake/river-based aquaculture
 - **Stocking**
 - Fingerling introduction with density management
 - Quarantine and acclimatization
 - **Feeding & Growth Monitoring**
 - Automated feeding systems
 - Feed conversion ratio tracking
 - Health checks and veterinary inspections
 - **Harvesting**
 - Grading & size-based harvesting
 - Use of nets, pumps, or seine harvesting methods
 - Immediate chilling and cold chain initiation
-

3. Processing & Manufacturing

- **Primary Processing**
 - Sorting & grading (by size/weight)
 - Descaling, gutting, filleting
 - Freezing & cold storage

- **Value Chain Processing**
 - Smoked fish, dried fish, canned fish
 - Fishmeal and fish oil extraction
 - Ready-to-cook frozen packs (fillets, nuggets, fish fingers)
 - Surimi and other processed protein products
-

4. Value Addition

- Packaged and branded fish products
 - Organic/fair-trade certified fish
 - Ready-to-eat meals (fish curry packs, sandwiches)
 - Fish-based animal feed (fishmeal to poultry/pigs)
 - By-products: collagen, fertilizer from fish waste
-

5. Sales & Distribution

- **Domestic Markets**
 - Supermarkets, hotels, restaurants, fish markets
 - Institutional supply (schools, hospitals, prisons)
 - **Export Markets**
 - Fresh & frozen fillets
 - Dried & smoked fish to diaspora and regional trade
 - Canned fish (regional/international markets)
 - **Government Procurement**
 - National food reserves
 - Social feeding programs
 - **Direct Sales**
 - Farm gate sales
 - Online/e-commerce fish box deliveries
-

6. Cost & Profit Centres

- **Cost Centres**
 - Inputs (fingerlings, feed, chemicals)
 - Labour (farm staff, processing workers)
 - Energy (aeration, cold storage, freezing plants)
 - Transport & cold chain logistics
- **Profit Centres**
 - Fresh fish sales
 - Processed fish products (smoked, canned, frozen fillets)
 - By-products (fishmeal, fish oil, collagen, fertilizer)

- Export revenues

7. Reporting & Analytics

- Yield per pond/cage (kg/m³ water)
 - Feed Conversion Ratio (FCR) analysis
 - Mortality rates & disease trends
 - Cold chain loss percentages
 - Domestic vs export sales breakdown
 - Profit margins by product type (fresh vs processed vs by-products)
 - Sustainability tracking (water usage, compliance with fishing quotas, ZEMA regulations)
-

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └ Fingerlings, Feed, Chemicals
- └ Nets, Cages, Tanks
- └ Cold Storage & Packaging

FARM OPERATIONS

- └ Pond & Cage Preparation

- └ Mortality Rates
- └ Sales Analysis (domestic vs export)

ERP Expanded Industry Template – Fruits & Horticulture

(Covers orchards, plantations, and fresh fruit exports e.g., mango, citrus, banana, avocado, grapes, pineapple, etc.)

1. Procurement & Supply

- Seedlings & grafted plants (mango, citrus, avocado, banana suckers, pineapple crowns, grape vines)
 - Fertilizers (organic compost, NPK, micronutrients)
 - Pesticides, fungicides, insecticides
 - Irrigation systems (drip, sprinklers, fertigation equipment)
 - Farm tools (pruners, sprayers, harvesting tools)
 - Cold storage facilities (pre-cooling units, ripening chambers)
 - Packaging materials (crates, cartons, wraps, export-grade labels)
-

2. Farm Operations / Production

- **Land Preparation & Planting**
 - Soil testing & land clearing
 - Nursery management & transplanting seedlings
 - Trellis systems for grapes
 - **Crop Maintenance**
 - Irrigation scheduling (drip, fertigation)
 - Fertilizer application & foliar feeding
 - Pest & disease control (fruit fly, fungal infections, wilt)
 - Pruning, thinning & canopy management
 - **Harvesting**
 - Manual picking with quality checks
 - Maturity monitoring (sugar content/Brix level, firmness)
 - Sorting into export vs domestic grades
-

3. Processing & Manufacturing

- **Primary Processing**

- Washing, grading, waxing, and packaging
 - Cold storage & ripening chamber management
 - **Value Chain Processing**
 - Juices, purees, jams, chutneys
 - Dried fruit (mango slices, banana chips, raisins)
 - Canned fruit (pineapple, peaches)
 - Wine (grapes), cider (apples), vinegar
-

4. Value Addition

- Organic-certified fruit branding
 - Ready-to-eat fruit packs (peeled, sliced, vacuum sealed)
 - Smoothies and concentrate packs
 - Export-grade packaging (plastic crates, air freight packs)
 - By-products: peels and pulp into animal feed or fertilizer
-

5. Sales & Distribution

- **Domestic Markets**
 - Open markets, supermarkets, hotels, restaurants
 - Farm stalls and agro-shops
 - **Export Markets**
 - Fresh fruit exports (EU, Middle East, Asia)
 - Processed fruit exports (juices, wine, dried fruit)
 - Certification requirements (GlobalGAP, HACCP, organic, fair-trade)
 - **Institutional Buyers**
 - Schools, hospitals, catering companies
 - **Government Procurement**
 - National school feeding & food reserve programs
-

6. Cost & Profit Centres

- **Cost Centres**
 - Seedlings & planting inputs
 - Fertilizers, irrigation & crop care
 - Labour (pruning, harvesting, grading)
 - Cold chain logistics & storage
 - Processing (juice plants, dryers, canning lines)
- **Profit Centres**
 - Fresh fruit sales (local & export)
 - Processed fruit products (juices, jams, dried fruit, wine)

- Value-added packs (ready-to-eat, smoothies)
- By-products (animal feed, organic fertilizer)

7. Reporting & Analytics

- Yield per hectare (tons/ha per fruit type)
- Post-harvest loss % (field → storage → market)
- Export rejection rates (quality grading failures)
- Cold chain efficiency & utilization
- Domestic vs export sales split
- Profitability by fruit type & product line
- Sustainability tracking (water, pesticide use, carbon footprint)

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └ Seedlings, Fertilizers, Pesticides
- └ Irrigation & Farm Tools
- └ Cold Storage & Packaging

FARM OPERATIONS

- └ Land Preparation & Planting
- └ Crop Maintenance (irrigation, pruning, pest control)

 - Sales by Channel
 - Profitability by Fruit Type
-

✂ ERP Expanded Industry Template – Mining & Mineral Processing

1. Procurement & Supply

- Heavy machinery & equipment (excavators, trucks, drilling rigs, crushers)
 - Explosives & blasting materials
 - Safety gear (helmets, boots, masks, sensors)
 - Fuel, lubricants, spare parts
 - Chemicals for processing (cyanide, flotation reagents, lime, acids)
 - IT systems (GIS, mine planning software, IoT sensors)
 - Packaging & transport (bulk bags, containers, rail/wagons)
-

2. Mining Operations

- **Exploration & Surveying**
 - Geological mapping, sampling, geophysical surveys
 - Core drilling and assay analysis
 - **Mine Development**
 - Pit design, tunneling, shaft sinking
 - Road & infrastructure construction
 - **Extraction**
 - Open-pit mining (excavation, hauling)
 - Underground mining (drilling, blasting, ore hauling)
 - Safety & compliance monitoring
 - **Ore Handling**
 - Crushing, screening, and stockpiling
 - Grade control and blending
-

3. Processing & Manufacturing

- **Mineral Processing**
 - Crushing, grinding, milling
 - Concentration (gravity separation, flotation, magnetic separation)
 - Leaching & smelting (gold, copper, cobalt)
 - Refining (electrolysis, furnace operations)

- **By-product Recovery**
 - Sulphuric acid, rare earths, slag recycling
 - Tailings management & recovery
-

4. Value Addition

- Smelted metals (gold bars, copper cathodes, cobalt, manganese)
 - Semi-finished products (steel billets, aluminum sheets)
 - Certified gemstones (cutting, polishing, grading)
 - By-products for other industries (sulphuric acid, aggregates from slag)
-

5. Sales & Distribution

- **Domestic**
 - Local smelters, refineries, and manufacturing industries
 - Government reserves (strategic minerals)
 - **Export Markets**
 - International buyers (commodity exchanges, multinationals)
 - Contracts with OEMs (battery manufacturers, steel plants)
 - **Institutional Buyers**
 - Construction firms (cement, steel supply)
 - Energy & tech firms (cobalt, lithium for batteries)
 - **Logistics**
 - Road, rail, sea transport (bulk shipments)
 - Customs & export documentation
-

6. Cost & Profit Centres

- **Cost Centres**
 - Exploration & survey costs
 - Equipment procurement & maintenance
 - Labour (miners, engineers, safety officers)
 - Processing (energy-intensive refining & smelting)
 - Logistics (fuel, rail/port handling)
 - Safety & compliance
- **Profit Centres**
 - Refined mineral sales (gold, copper, cobalt, lithium, iron ore)
 - Gemstone sales (cut & polished stones)
 - By-products (slag, sulphuric acid, rare earth recovery)
 - Export contracts & institutional supply

7. Reporting & Analytics

- Ore grade vs recovery efficiency
 - Cost per ton mined & processed
 - Yield per mine site / pit
 - Equipment utilization & downtime
 - Energy consumption vs output
 - Safety compliance (incidents, near-misses, PPE usage)
 - Domestic vs export sales analysis
 - Profitability by mineral type
-

8. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY

- └─ Machinery, Explosives, Chemicals
- └─ Fuel, Spares, Safety Gear
- └─ Packaging & Logistics

MINING OPERATIONS

- └─ Exploration & Surveying
- └─ Mine Development (infrastructure, tunneling)
- └─ Extraction (open-pit, underground)
- └─ Ore Handling (crushing, blending, stockpiling)

PROCESSING & MANUFACTURING

- └─ Crushing, Grinding, Milling
- └─ Concentration (flotation, gravity separation)
- └─ Smelting & Refining (gold, copper, cobalt)
- └─ By-product Recovery & Tailings Management

VALUE ADDITION

- └─ Refined Metals (gold bars, copper cathodes)
- └─ Semi-finished Products (steel, aluminum)
- └─ Gemstones (cut & polished)
- └─ Industrial By-products (sulphuric acid, slag)

SALES & DISTRIBUTION

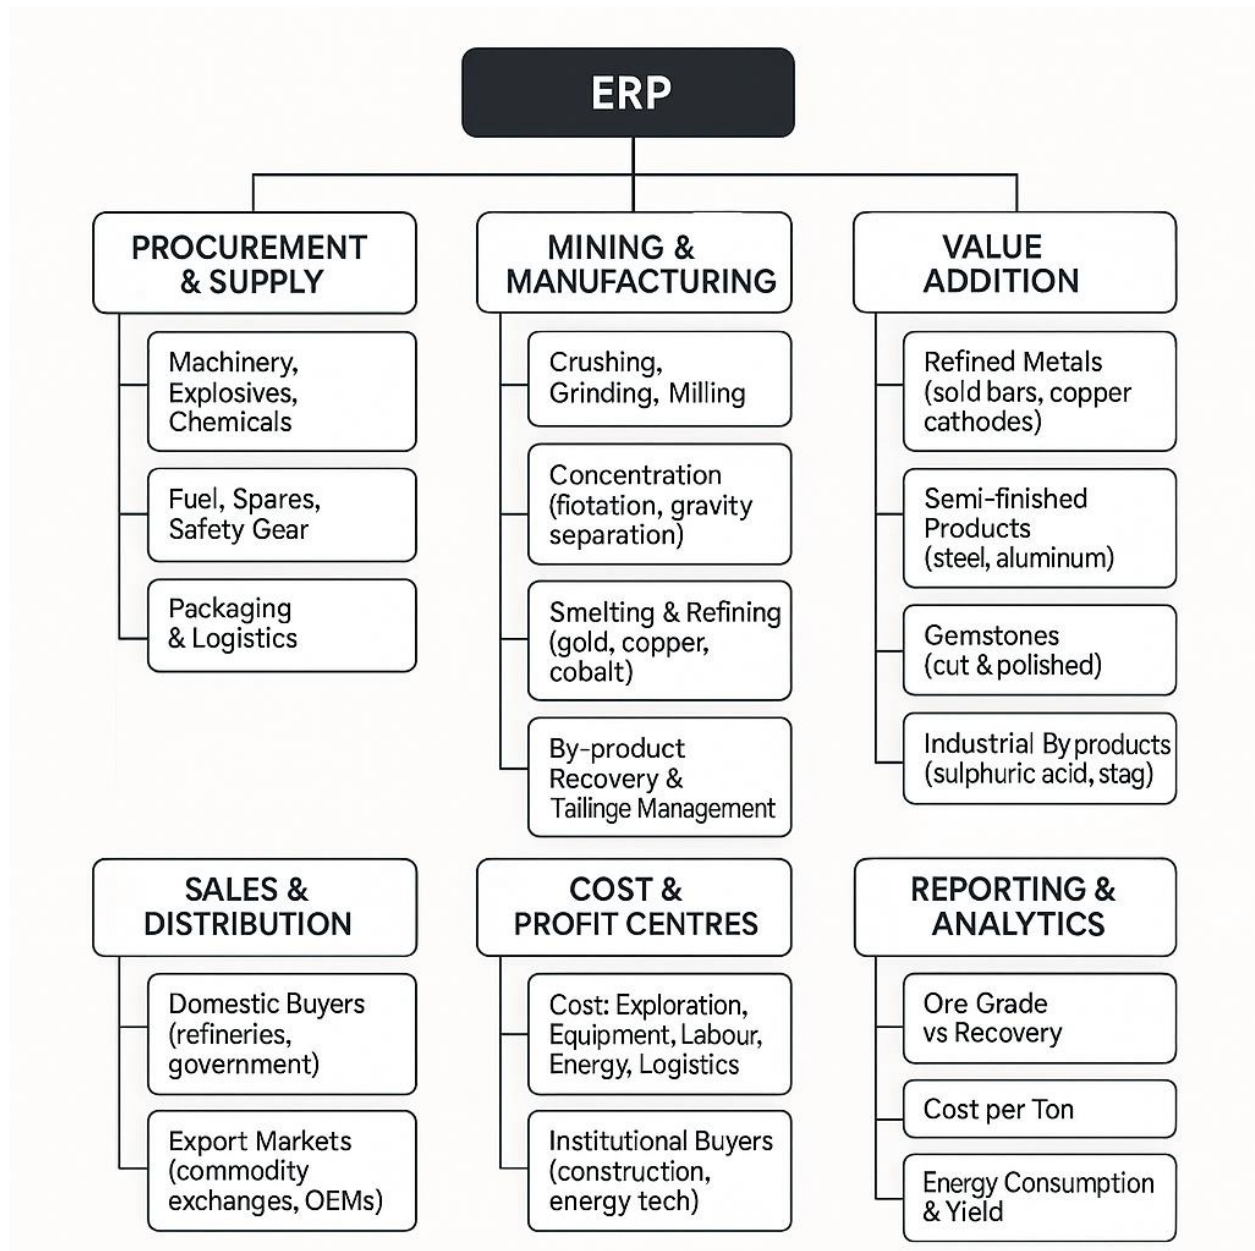

- └─ Domestic Buyers (refineries, government)
- └─ Export Markets (commodity exchanges, OEMs)
- └─ Institutional Buyers (construction, energy, tech)
- └─ Logistics (road, rail, port)

COST & PROFIT CENTRES

- └─ Profit: Minerals, Gemstones, By-products, Exports

REPORTING & ANALYTICS

- └─ Ore Grade vs Recovery
- └─ Cost per Ton
- └─ Energy Consumption & Yield

✂ ERP Expanded Industry Template – Artisanal & Small-Scale Mining (ASM)

(Focus on small-scale miners working in gold, gemstones, quarrying, and industrial minerals with limited mechanization but high employment impact.)

1. Procurement & Supply

- Basic tools: hammers, chisels, shovels, wheelbarrows
 - Small-scale equipment: crushers, sluice boxes, panning kits
 - Protective gear: gloves, boots, masks, headlamps
 - Chemicals: mercury (gold), borax (alternative refining), cyanide (regulated)
 - Water pumps, generators, solar kits
 - Packaging: small bags, containers for concentrates/gemstones
-

2. Mining Operations

- **Exploration & Site Identification**
 - Surface mapping, manual pitting, local knowledge use
 - Small-scale drilling (rare)
 - **Extraction**
 - Manual digging, panning, sluicing
 - Open pit and shallow shaft mining
 - Quarrying for stones, sand, and aggregates
 - **Ore Handling**
 - Manual crushing (hammer, small mills)
 - Washing & concentration (sluice, pan, shaking tables)
 - **Community & Cooperative Mining**
 - Group work under cooperatives
 - Shared tools & processing units
-

3. Processing & Manufacturing

- **Primary Processing**
 - Manual or small crusher milling
 - Concentration by gravity separation

- Amalgamation (mercury) or mercury-free alternatives (borax)
 - **Value Chain Processing**
 - Gold smelting into dore bars
 - Gemstone sorting, cutting, polishing (basic level)
 - Quarry products crushing (sand, gravel, dimension stones)
-

4. Value Addition

- Certified and polished gemstones (amethyst, emerald, aquamarine)
 - Jewelry (small goldsmith operations)
 - Branded quarry products (tiles, blocks, aggregate packs)
 - Small gold dore export under licensed agents
 - By-products: stone dust for bricks, quarry waste for aggregates
-

5. Sales & Distribution

- **Domestic Sales**
 - Local goldsmiths, jewelry markets
 - Construction industry (quarry materials)
 - Small traders and cooperatives
 - **Export Markets**
 - Licensed agents/exporters (gold dore, gemstones)
 - Regional informal markets (cross-border trading)
 - **Government Procurement & Regulation**
 - Formal buying centers (Zambia Gold Company, Bank of Zambia)
 - Cooperative licensing and taxation
-

6. Cost & Profit Centres

- **Cost Centres**
 - Tools & equipment procurement
 - Labour (daily wages, cooperative shares)
 - Processing inputs (chemicals, energy, water)
 - Licensing, taxes, levies
 - **Profit Centres**
 - Gold dore sales
 - Gemstone cutting & polishing
 - Quarry product sales (sand, gravel, aggregates)
 - Jewelry sales (local markets)
-

7. Reporting & Analytics

- Daily output logs (grams of gold, kg of gemstones, tons of aggregates)
 - Cost per gram/kg/ton produced
 - Cooperative revenue sharing & profit allocations
 - Export vs domestic sales ratio
 - Compliance reporting (environmental permits, safety, taxation)
 - Social impact reporting (employment, community development projects)
-

8. Visual ERP Flow (Text Representation)

ERP Expanded Industry Template – Construction & Real Estate Development

1. Procurement & Supply

- Building materials: cement, steel, sand, gravel, bricks, tiles, timber
 - Plant & equipment: mixers, cranes, trucks, scaffolding, formwork
 - Safety gear: helmets, boots, harnesses, gloves
 - Professional services: architects, engineers, surveyors, contractors
 - Subcontractors & service providers (electrical, plumbing, HVAC)
 - Fuel, lubricants & consumables for heavy equipment
 - IT tools: CAD software, project management tools, drones for surveys
-

2. Site Operations / Construction Activities

- **Pre-construction**
 - Land acquisition & permits
 - Site surveys & soil tests
 - Environmental compliance
 - **Construction Execution**
 - Foundation, structural works, masonry
 - Roofing, plumbing, electrical, HVAC installations
 - Finishing (tiling, painting, interior works)
 - Safety & quality assurance checks
 - **Project Management**
 - Scheduling & resource allocation
 - Labour & subcontractor management
 - Daily logs (time, material usage, progress tracking)
-

3. Processing & Manufacturing (Linked Activities)

- Ready-mix concrete plants (onsite/offsite batching)
- Brick/block making units
- Precast concrete structures (beams, slabs, pipes)
- Fabrication units (steel works, joinery, carpentry)

4. Value Addition

- Real estate development (housing units, apartments, malls, office parks)
 - Interior design & furnishing packages
 - Green building integration (solar, rainwater harvesting, smart systems)
 - Facilities management (post-construction maintenance contracts)
 - Branded construction materials (precast products, modular units)
-

5. Sales & Distribution

- **Domestic Clients**
 - Individuals (residential units, plots)
 - Businesses (warehouses, factories, offices)
 - Government (roads, schools, hospitals, housing projects)
 - **Real Estate Agencies**
 - Marketing & brokerage services
 - Property leasing & management
 - **Export/Regional Supply**
 - Construction materials (cement, blocks, tiles, precast elements)
 - Specialized labour & subcontractor services
-

6. Cost & Profit Centres

- **Cost Centres**
 - Materials procurement & logistics
 - Labour & subcontractors
 - Machinery & equipment leasing/maintenance
 - Energy & utilities (site generators, water)
 - Permits, legal & compliance costs
 - **Profit Centres**

ERP Expanded Industry Template – Tourism & Hospitality

(Covers hotels, lodges, resorts, travel agencies, tour operators, conference centers)

1. Procurement & Supply

- Hotel & resort supplies (furniture, bedding, kitchen equipment)
 - Food & beverages (restaurants, bars, catering)
 - Cleaning & laundry supplies
 - IT systems (reservation software, POS, CRM)
 - Transportation services (airport transfers, tour buses, car rentals)
 - Utilities & maintenance supplies (water, power, generators, HVAC parts)
 - Marketing & booking platforms (online travel agencies, booking engines)
-

2. Hospitality Operations

- **Front Office**
 - Guest registration, check-in/check-out
 - Reservation management (rooms, halls, events)
 - Concierge & guest services
- **Housekeeping**
 - Room cleaning schedules
 - Laundry services
 - Inventory of linens & amenities
- **Food & Beverage (F&B)**
 - Restaurant & bar management
 - Menu planning & costing
 - Kitchen operations & supplies tracking
 - Event catering services
- **Leisure & Recreation**
 - Spa & wellness centers
 - Gym, pool, sports facilities
 - Guided tours & adventure packages
- **Event & Conference Management**
 - Hall/venue reservations
 - Audio-visual & event setup
 - Banquet services

3. Travel & Tour Operations

- Tour package creation & pricing
- Booking flights, buses, and transfers
- Visa, insurance, and travel document support
- Partnerships with airlines, bus services, hotels, and activity providers
- Tour guide scheduling & resource management

4. Value Addition

- Loyalty programs (points, membership tiers)
- All-inclusive holiday packages (accommodation + meals + tours)
- Cultural experiences & eco-tourism (safaris, traditional dances, heritage tours)
- Travel insurance bundles
- Destination marketing & branding packages

5. Sales & Distribution

- **Direct Sales**
 - Walk-ins, call centers, websites, mobile apps
- **Indirect Sales**
 - Online Travel Agencies (Expedia, Booking.com, TripAdvisor)
 - Local agents & brokers
 - Corporate travel managers
- **Institutional & Government**
 - Hosting conferences, government delegations, events
- **Exports (Tourism Receipts)**
 - International travelers bringing foreign currency
 - Tour packages marketed abroad

6. Cost & Profit Centres

- **Cost Centres**
 - Hotel operations (rooms, housekeeping, utilities)
 - F&B operations (kitchen, catering, bar stock)
 - Tour operations (transport, guides, insurance)
 - Maintenance & repairs
 - Staff wages, training, and uniforms
- **Profit Centres**

- Room sales (accommodation revenue)
- F&B sales (restaurants, bars, catering)
- Tours & excursions
- Events & conferences
- Spa, wellness, and recreational services
- Loyalty partnerships & sponsorships

7. Reporting & Analytics

- Occupancy rates (daily, monthly, seasonal)
- Revenue per available room (RevPAR)
- Average daily rate (ADR)
- F&B revenue vs cost ratios
- Tour package profitability
- Event utilization (conference halls, banquets)
- Customer satisfaction (reviews, NPS scores)
- Domestic vs international revenue split

Hospitality ERP Submodule – Front Office

(Covers reservations, check-in/check-out, concierge, and guest service management.)

1. Procurement & Supply

- Reservation software licenses (PMS – Property Management Systems)
 - Guest ID scanners, card printers, key cards, biometric devices
 - Communication systems (telephony, intercoms, guest apps, kiosks)
 - Front desk hardware (computers, receipt printers, POS systems)
 - Concierge resources (city maps, brochures, partner contracts for tours)
-

2. Operations

- **Reservations Management**
 - Room booking (direct, OTA, corporate, group bookings)
 - Dynamic pricing (seasonal, demand-based)
 - Cancellations & no-show handling
 - **Check-in/Check-out**
 - Guest registration & KYC (passport/ID scan, Smart Invoice compliance)
 - Room allocation & upgrades
 - Guest billing & settlement (cash, card, mobile money, online wallets)
 - **Concierge & Guest Services**
 - Guest inquiries & requests (transport, laundry, room service)
 - Tour & excursion booking assistance
 - Restaurant & local activity reservations
 - Loyalty program enrollment
 - **Customer Relationship Management (CRM)**
 - Guest profile creation & history tracking
 - Preferences (room type, dietary, activities)
 - Feedback & complaint resolution
-

3. Value Addition

- Express check-in/check-out (self-service kiosks, mobile app)

- VIP/loyalty guest recognition & personalized greetings
- Upselling (room upgrades, add-on services like spa, F&B packages)
- Corporate & group booking deals
- Integrated e-concierge apps (chatbots, in-room tablets)

4. Sales & Distribution

- Direct bookings (hotel website, mobile app, call center)
- Online Travel Agencies (OTAs: Booking.com, Expedia)
- Global Distribution Systems (GDS: Amadeus, Sabre)
- Corporate travel partners
- Walk-in customers

5. Cost & Profit Centres

- **Cost Centres**
 - Reservation system subscriptions
 - Front desk staff wages & training
 - Hardware & communication infrastructure
 - Concierge expenses (transport booking systems, partnerships)
- **Profit Centres**
 - Room revenue (primary source)
 - Upselling packages (early check-in, late check-out, upgrades)
 - Concierge commissions (tour bookings, local partnerships)
 - Loyalty program partnerships (co-branded credit cards, airline miles)

6. Reporting & Analytics

- Occupancy rates & forecasts
- Revenue per available room (RevPAR)
- Average daily rate (ADR)
- Booking source breakdown (direct, OTA, corporate, walk-in)
- Upselling revenue per guest
- Guest satisfaction scores & service resolution rates

□ Hospitality ERP Submodule – Housekeeping

(Covers cleaning, laundry, linen/amenity management, inventory tracking, and service quality control.)

1. Procurement & Supply

- Cleaning equipment (vacuum cleaners, mops, polishers)
 - Laundry equipment (washing machines, dryers, ironing stations)
 - Cleaning chemicals & detergents
 - Linens, towels, bathrobes, and curtains
 - Guest amenities (toiletries, slippers, bottled water, coffee/tea kits)
 - Uniforms for staff
 - Inventory management tools (barcode/RFID for linens, supplies)
-

2. Operations

- **Room Cleaning & Maintenance**
 - Daily cleaning schedules
 - Deep cleaning (weekly/monthly)
 - Inspection checklists for supervisors
 - **Laundry Management**
 - Guest laundry services (washing, pressing, delivery)
 - Hotel linen services (bed sheets, towels, staff uniforms)
 - Damage/replacement tracking
 - **Linen & Amenities Inventory**
 - Stock control (toiletries, water, coffee kits)
 - Automatic replenishment alerts
 - Usage logs (per room, per guest cycle)
 - **Maintenance Requests**
 - Housekeeping reports faulty items (AC, lighting, plumbing)
 - Integration with maintenance/engineering department
-

3. Value Addition

- Personalized guest amenities (customized toiletries, branded kits)

- Eco-friendly housekeeping (organic cleaning products, water-saving laundry)
- Express laundry/dry-cleaning services
- VIP services (flower arrangements, turndown chocolates, aroma therapy)
- Integration with guest apps (guests request cleaning/laundry via phone)

4. Sales & Distribution

- Guest laundry charges (internal revenue stream)
- Sale of branded amenities (bathrobes, towels, toiletries)
- Partnerships with external laundry providers (outsourcing excess loads)
- Premium housekeeping packages for long-stay/corporate guests

5. Cost & Profit Centres

- **Cost Centres**
 - Cleaning equipment & chemicals
 - Linens & laundry operations
 - Staff wages, training, uniforms
 - Utilities (water, electricity for laundry)
- **Profit Centres**
 - Guest laundry services
 - Premium cleaning & amenity packages
 - Retail of branded items (robes, spa kits)

6. Reporting & Analytics

- Room turnaround time (cleaning efficiency per staff/room)
- Linen usage & replacement cycles
- Laundry revenue & cost ratios
- Guest satisfaction (cleanliness scores, complaints tracking)
- Cost per occupied room (CPOR)
- Environmental impact reporting (water/chemical consumption per guest)

Housekeeping Operations ERP – Room Cleaning & Maintenance

1. Procurement & Supply

- Cleaning tools (vacuums, mops, polishers, carts)
 - Cleaning chemicals (detergents, disinfectants, polish, eco-friendly cleaners)
 - Room supplies (trash bags, air fresheners, tissues, toilet paper)
 - Inspection devices (checklist tablets, barcode scanners, mobile apps)
 - Staff uniforms & PPE (gloves, masks, aprons)
-

2. Operations

- **Daily Cleaning**
 - Regular cleaning of occupied & vacant rooms
 - Bed-making, floor cleaning, dusting, bathroom sanitization
 - Guest amenity replacement (toiletries, water, tea/coffee)
 - **Deep Cleaning**
 - Scheduled monthly/quarterly deep cleaning (curtains, carpets, upholstery)
 - Mattress rotation & sanitization
 - Window, balcony, and fixture cleaning
 - **Inspection & Quality Control**
 - Supervisor room inspection with digital checklists
 - Defect logging (broken lights, damaged furniture, stains)
 - Integration with maintenance requests
 - **Special Requests**
 - VIP room setup (flowers, turndown services, chocolates)
 - Guest-specific needs (extra pillows, allergen-free cleaning, kids setup)
-

3. Value Addition

- Eco-friendly room cleaning (organic products, water conservation)
- Express room service (cleaning within 15 minutes on request)
- Digital cleaning status updates (guest apps show “Room Ready”)
- Smart sensors for cleanliness (IoT air quality, bathroom humidity)
- Branding through scent & ambiance (signature fragrances, music systems)

4. Cost & Profit Centres

- **Cost Centres**
 - Cleaning equipment & supplies
 - Labour costs (housekeepers, supervisors)
 - Utilities (water, electricity for vacuums, etc.)
 - PPE & staff uniforms
 - **Profit Centres**

□ Housekeeping Operations ERP – Linen & Amenities Inventory

1. Procurement & Supply

- Linens: bed sheets, pillowcases, duvets, towels, bathrobes, tablecloths
 - Guest amenities: toiletries (soap, shampoo, lotion), dental kits, slippers, tea/coffee kits, bottled water
 - Storage equipment: shelving, carts, linen closets
 - Tracking systems: RFID/barcode tags, scanners, stock control software
 - Replenishment contracts with suppliers (bulk toiletries, water bottling companies)
-

2. Operations

- **Inventory Management**
 - Linen stock monitoring (clean vs in-use vs damaged)
 - Amenities stock monitoring (daily/weekly usage logs)
 - Automated reorder alerts
 - **Distribution**
 - Issue linens & amenities to housekeeping staff daily
 - Track per-room allocations
 - Maintain par levels (minimum stock thresholds)
 - **Usage Tracking**
 - RFID/barcode scan on linens (track wash cycles, replacement age)
 - Guest amenity usage linked to occupancy rates
 - Loss/damage tracking (stolen or misused items)
 - **Replacement & Retirement**
 - Define lifecycle for linens (e.g., 150 wash cycles)
 - Flag stained/damaged linens for disposal or repurposing
 - Return-to-supplier/recycling for eco-compliance
-

3. Value Addition

- Eco-friendly amenities (biodegradable toiletries, refillable bottles)
- Branded linens & guest amenities (with hotel logo)
- Premium/VIP amenity kits (luxury toiletries, robes, wine/welcome packs)
- Linen rental services (outsourced to serviced apartments, events)

- Digital guest requests for amenities via mobile apps
-

4. Sales & Distribution

- Onsite retail of branded amenities (robes, towels, toiletries)
 - Amenity packages as upsells (romantic, family, business packages)
 - Linen leasing to external partners (event venues, serviced apartments)
-

5. Cost & Profit Centres

- **Cost Centres**
 - Linen procurement & replacement
 - Amenities procurement & replenishment
 - Inventory tracking systems (RFID, barcoding)
 - Labour (stock management, distribution staff)
 - **Profit Centres**
 - Retail sales of branded items
 - Premium/VIP amenity charges
 - Outsourced linen leasing/rental services
-

6. Reporting & Analytics

- Linen utilization rate (average wash cycles before retirement)
 - Amenity consumption per occupied room
 - Inventory shrinkage rate (losses due to theft/damage)
 - Reorder frequency & supplier performance
 - Sales revenue from branded retail items
 - Guest satisfaction with amenities (feedback, reviews)
-

- CMMS/Work-Order software (mobile + web)
- Handhelds/tablets for staff, barcode/RFID scanners
- Tools & spares (light bulbs, mixers, valves, hinges, filters)
- Safety gear (gloves, lockout/tagout kits)
- Vendor SLAs (HVAC, elevators, laundry machines)

2. Operations

Issue Capture & Triage

- Sources: housekeeping inspections, guest reports, IoT alerts (AC temp, water leaks), front office notes
- Standardized fault codes & priorities (P1 critical → P4 minor)
- Auto-route to Engineering by asset type/location

Work Orders

- Create → assign → start/stop → complete → QA sign-off
- Parts reservation & pick from engineering store
- Photo/video evidence before/after

Asset & Location Linkage

- Rooms, floors, back-of-house, pools, kitchens, gym, spa
- Asset registry with serials, warranties, service history

Preventive & Predictive Maintenance

- Calendar/usage-based PM (filters, elevators, boilers)
- Sensor thresholds → predictive WOs (vibration, temp, run-hours)

Guest & Housekeeping Coordination

- Auto room-status sync (Out-of-Order, Maintenance in Progress)
- Front office ETA updates; guest messaging when fixed

Vendor & Warranty Handling

- Auto route to vendor if under warranty/SLA
 - Track response time, onsite time, resolution time
-

3. Value Addition

- One-tap raise ticket from HK app/QR on asset
 - Smart triage (rules: AC faults in VIP rooms → P1, night duty escalation)
 - Spare-part kits (room refresh kit, bathroom leak kit) to cut MTTR
 - Digital twins/AR guides for complex repairs
 - Guest goodwill automation (auto-credit, voucher after service breach)
-

4. Sales & Distribution (internal service “sales”)

- Chargeback model to departments (events, F&B, spa) for misuse/damage
 - Billable jobs for leased spaces/tenants (retail in hotel lobby)
 - Capital project interface (minor works billed to CapEx)
-

5. Cost & Profit Centres

Cost Centres

- Engineering labour (shifts, overtime)
- Spares & consumables
- Tools & calibration, CMMS licenses
- Vendor contracts & call-outs

Profit/Recovery Centres

- Departmental chargebacks
 - Tenant/third-party billables
 - Energy savings from PM (tracked as recovered value)
-

6. Reporting & Analytics

- MTTR/MTBF by asset & location
- Backlog age & SLA compliance % (P1–P4)
- First-time-fix rate; repeat-fault rate

- Cost per room/asset; spare consumption trends
- Downtime impact on RevPAR/ADR & guest comp costs
- Vendor performance scorecards
- PM adherence & predicted failure avoidance (cost avoided)

7. Visual ERP Flow (Text Representation)

MAINTENANCE REQUESTS INTEGRATION (HK ↔ Engineering)

PROCUREMENT & SUPPLY

- └─ CMMS/Work-Order Software & Mobile Devices
- └─ Tools, Spares, Safety Gear
- └─ Vendor SLAs (HVAC, Elevators, Laundry)

OPERATIONS

- └─ Issue Capture & Triage (HK, Guest, IoT) → Priority & Routing
- └─ Work Orders (assign, parts pick, execute, QA, close)
- └─ Asset & Location Link (rooms, BOH, gyms, kitchens)
- └─ Preventive/Predictive Maintenance (calendar, sensors)
- └─ Coordination (room status sync, guest ETA updates)

VALUE ADDITION

- └─ One-tap tickets (QR/asset tag)
- └─ Smart triage & escalation
- └─ Spare-part kits to reduce MTTR
- └─ AR guides & goodwill automation

SALES & DISTRIBUTION (Internal)

- └─ Dept chargebacks
- └─ Tenant billables
- └─ CapEx project interface

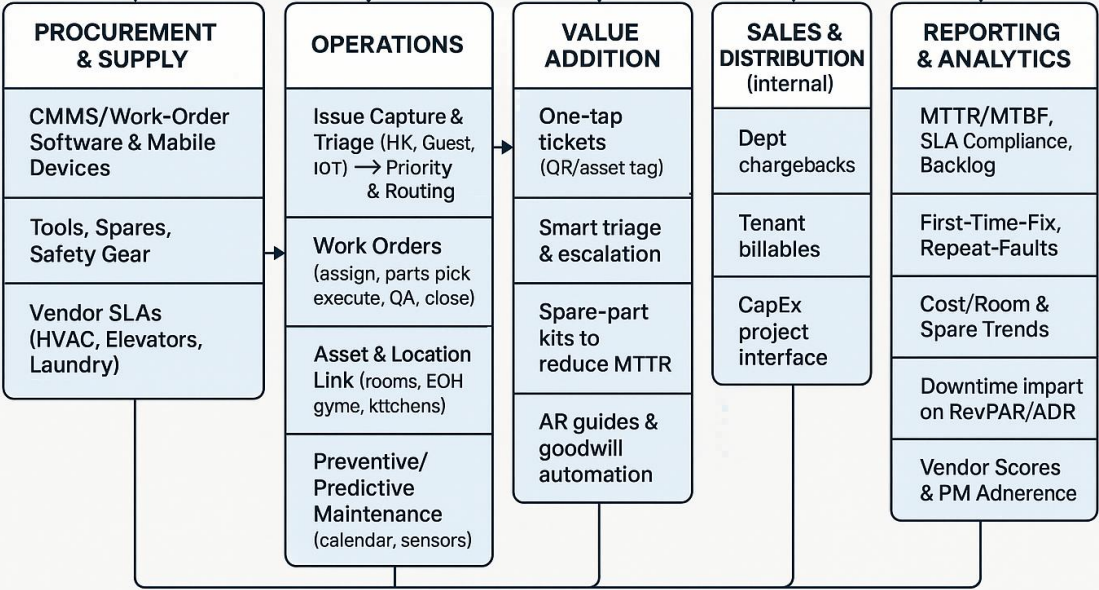

COST & PROFIT CENTRES

- └─ Costs: Labour, Spares, Tools, Licenses, Vendors
- └─ Recovery: Chargebacks, Billables, Energy Savings

REPORTING & ANALYTICS

- └─ MTTR/MTBF, SLA Compliance, Backlog
 - └─ First-Time-Fix, Repeat-Faults
 - └─ Cost/Room & Spare Trends
 - └─ Downtime impact on RevPAR/ADR
 - └─ Vendor Scores & PM Adherence

MAINTENANCE REQUESTS INTEGRATION
(HK ↔ Engineering)

● Hospitality ERP Submodule – Food & Beverage (F&B)

(Covers restaurants, bars, kitchens, catering, and event food service operations within hotels and resorts.)

1. Procurement & Supply

- Food raw materials (meat, fish, vegetables, grains, spices)
 - Beverages (alcoholic, non-alcoholic, bottled water, juices)
 - Kitchen equipment (ovens, grills, fryers, mixers, refrigerators, freezers)
 - Bar equipment (dispensers, coolers, cocktail kits)
 - Dining ware (cutlery, crockery, glassware, tablecloths, napkins)
 - Cleaning supplies (dishwashing liquids, sanitizers)
 - Vendor contracts (local farms, breweries, suppliers)
-

2. Operations

- **Kitchen Management**
 - Menu planning & recipe costing
 - Ingredient portion control
 - Food prep scheduling & hygiene standards
 - Cold chain & storage monitoring
- **Restaurant & Bar Service**
 - POS-integrated order taking
 - Table reservations & seating plans
 - Bartender operations (mixology, inventory usage)
 - Room service coordination
- **Catering & Events**
 - Banquet menus & package deals
 - Bulk procurement & prep for events
 - Service staff scheduling (waiters, chefs, runners)
 - Integration with conference & events module
- **Waste & Inventory Control**
 - Track food wastage per dish
 - FIFO (First-In, First-Out) stock rotation
 - Spoilage tracking & sustainability reporting

3. Value Addition

- Themed dining experiences (buffets, cultural nights, chef specials)
- Premium room service packages (romantic dinners, wine pairings)
- Healthy & eco-friendly menu options (organic, vegan, gluten-free)
- Loyalty rewards tied to F&B spend (points, discounts)
- Cross-sells (bar promotions, meal + spa packages)

4. Sales & Distribution

- **Direct Sales**
 - Restaurants, bars, lounges, in-room dining
 - Onsite outlets (cafes, kiosks, bakeries)
- **Institutional & External**
 - Catering contracts (corporates, weddings, government events)
 - Export of specialty food items (wines, bakery, packaged sauces)
- **Digital Channels**
 - Hotel app & website ordering
 - Food delivery apps (UberEats, Bolt, Glovo)

5. Cost & Profit Centres

- **Cost Centres**
 - Ingredients & beverage procurement
 - Labour (chefs, waiters, bartenders, cleaners)
 - Kitchen utilities (gas, electricity, water)
 - Equipment maintenance
 - Licenses (alcohol permits, food safety compliance)
- **Profit Centres**
 - Restaurant sales (dine-in, takeout)
 - Bar sales (drinks, cocktails, wine lists)
 - Catering services (banquets, weddings, events)
 - Room service sales
 - Premium menus & upselling (wine pairings, chef specials)

6. Reporting & Analytics

- Daily sales reports by outlet (restaurant, bar, catering, room service)
- Food cost percentage (cost of ingredients vs sales revenue)

- Beverage cost percentage (alcohol vs non-alcohol margins)
 - Waste reports (per dish, per outlet)
 - Profitability per outlet & per menu item
 - Customer feedback & satisfaction ratings
 - Forecasting demand by season/events
-

7. Visual ERP Flow (Text Representation)

FOOD & BEVERAGE ERP MODULE

PROCUREMENT & SUPPLY

- └─ Raw Materials (meat, fish, grains, spices)
- └─ Beverages (alcoholic, non-alcoholic)
- └─ Equipment (kitchen, bar, dining ware)
- └─ Vendor Contracts (farms, breweries, suppliers)

OPERATIONS

- └─ Kitchen Mgmt (menus, costing, prep, hygiene, cold chain)
- └─ Restaurant & Bar Service (POS orders, reservations, mixology, room service)
- └─ Catering & Events (banquet menus, bulk prep, service staff)
- └─ Waste & Inventory (FIFO, spoilage tracking)

VALUE ADDITION

- └─ Themed Dining & Cultural Nights
- └─ Premium Room Service Packages
- └─ Healthy & Eco-friendly Menus
- └─ Loyalty Rewards & Cross-sells

SALES & DISTRIBUTION

- └─ Direct (restaurants, bars, in-room, kiosks)
- └─ Institutional (catering contracts, events)
- └─ Digital (apps, delivery platforms)

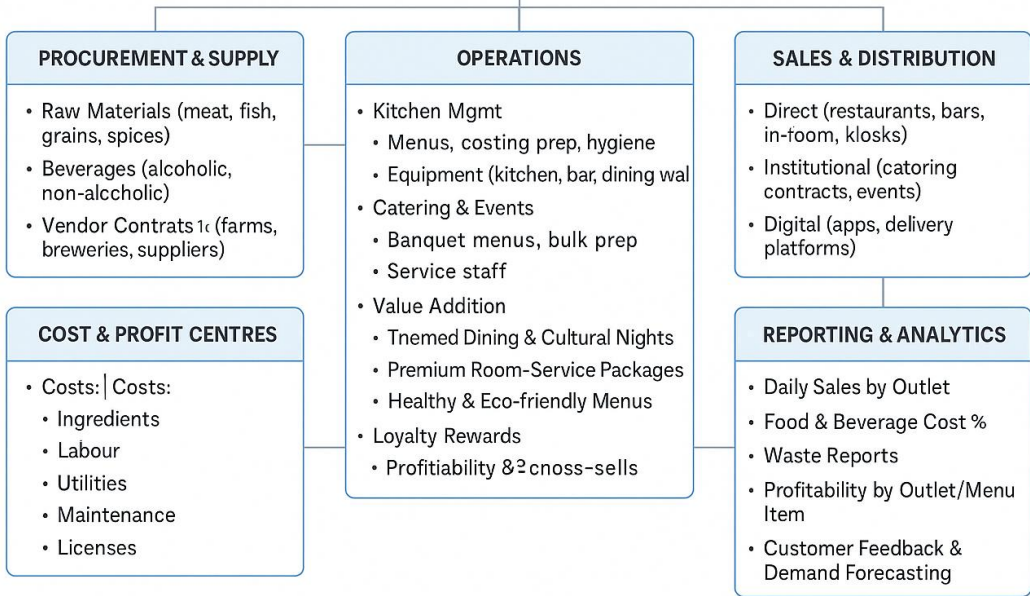

COST & PROFIT CENTRES

- └─ Costs: Ingredients, Labour, Utilities, Maintenance, Licenses
- └─ Profits: Restaurant, Bar, Catering, Room Service, Premium Menus

REPORTING & ANALYTICS

- └─ Daily Sales by Outlet
 - └─ Food & Beverage Cost %
 - └─ Waste Reports
 - └─ Profitability by Outlet/Menu Item
 - └─ Customer Feedback & Demand Forecasting
-

FOOD & BEVERAGE ERP MODULE

Food & Beverage ERP – Kitchen Management

1. Procurement & Supply

- Raw food items (meat, poultry, seafood, vegetables, fruits, grains, spices)
 - Beverages for cooking & pairings (wine, juices, condiments)
 - Kitchen equipment (ovens, grills, fryers, mixers, refrigerators, freezers)
 - Consumables (cooking oil, salt, packaging, disposables)
 - Hygiene & cleaning supplies (sanitizers, dishwashing liquid, gloves)
 - Contracts with vendors, farms, and wholesale suppliers
-

2. Operations

- **Menu Planning & Costing**
 - Standardized recipes with portion control
 - Food cost per dish analysis
 - Seasonal ingredient adjustments
 - **Food Preparation & Cooking**
 - Prep stations (meat, veg, pastry, sauces)
 - Cold chain management (storage temperatures, expiry dates)
 - HACCP compliance (food safety logs)
 - **Workforce Management**
 - Chef & kitchen brigade scheduling
 - Role-based task assignments (head chef, sous chef, commis)
 - Staff training & hygiene compliance
 - **Quality Control**
 - Taste panels & plating standards
 - Kitchen audits (safety, hygiene, temperature logs)
-

3. Value Addition

- Signature dishes & chef's specials
- Organic/healthy menu options (vegan, gluten-free, low-carb)
- Guest-customized menus (allergies, dietary restrictions)
- Farm-to-table partnerships (locally sourced produce)

- Premium upsell menus (wine pairings, multi-course fine dining)
-

4. Sales & Distribution (Including Transfers)

- **Internal Distribution**
 - Transfers to Restaurants, Bars, and Room Service
 - Central kitchen-to-outlet transfers (cafés, kiosks, lounges)
 - Inter-kitchen transfers (between branches or kitchens)
 - **Direct Sales**
 - Specialty counters (bakery, deli inside hotel)
 - Takeaway sales directly from the kitchen
 - **Support for Catering & Events**
 - Large-scale prep & transfers to banquet halls, events, conferences
-

5. Cost & Profit Centres

- **Cost Centres**
 - Ingredients procurement
 - Labour (chefs, assistants, cleaners)
 - Utilities (gas, electricity, water)
 - Kitchen equipment maintenance
 - Food safety & compliance costs
 - **Profit Centres**
 - High-margin dishes (premium meals, chef specials)
 - Transfers tracked as **internal revenue allocations** to F&B outlets
 - Bakery/deli direct sales
 - Specialty menu packages (wine pairings, VIP meals)
-

6. Reporting & Analytics

- Food cost percentage (ingredients vs sales revenue)
 - Kitchen efficiency (prep time per dish, orders fulfilled per hour)
 - Wastage & spoilage tracking (ingredient loss by category)
 - Transfer logs (kitchen → restaurant, bar, catering)
 - Profitability per menu item & outlet supported
 - Guest feedback on kitchen quality (taste, presentation, hygiene)
-

7. Visual ERP Flow (Text Representation)

KITCHEN MANAGEMENT ERP MODULE

PROCUREMENT & SUPPLY

- └─ Raw Food Items & Beverages
- └─ Equipment & Consumables

KITCHEN MANAGEMENT ERP MODULE

Food & Beverage ERP – Restaurant & Bar Service

1. Procurement & Supply

- Beverages (alcoholic & non-alcoholic, wines, spirits, cocktails, juices, soft drinks)
 - Food supplies for à la carte and buffet menus
 - POS systems & tablets for order-taking
 - Dining ware (plates, cutlery, glassware, trays, table linens)
 - Bar equipment (dispensers, shakers, mixers, coolers)
 - Uniforms for waiters, bartenders, and sommeliers
 - Vendor contracts (breweries, wineries, beverage distributors)
-

2. Operations

- **Reservation & Seating**
 - Table booking management (direct, app, OTAs)
 - Seating plans & waitlist handling
 - **Order Taking & Service**
 - POS-based order capture linked to kitchen & bar
 - Food runner coordination
 - Bar orders linked to bartender systems
 - **Bartender & Mixology Management**
 - Standardized cocktail recipes & portion control
 - Beverage inventory usage logs
 - Age verification & alcohol compliance
 - **Room Service Integration**
 - Orders placed via app, phone, or TV screens
 - Tracking of preparation → delivery → guest feedback
 - **Guest Experience Management**
 - Service speed & quality checks
 - Upselling (wine pairings, chef specials, bar promotions)
 - Loyalty program integration
-

3. Value Addition

- Themed dining nights (cultural, wine & dine, live music)
 - VIP/private dining packages
 - All-inclusive meal & drink packages for guests
 - Premium upsells (signature cocktails, reserve wines)
 - Restaurant-bar cross promotions (meal + cocktail combos)
-

4. Sales & Distribution (Including Transfers)

- **Internal Transfers**
 - Beverages & food transferred from bar → restaurants → lounges
 - Transfers from central kitchen to outlets (buffet counters, rooftop bars)
 - **Direct Sales**
 - Dine-in orders (restaurant, bar, lounge, poolside)
 - Takeaway & quick service counters
 - **External Distribution**
 - Catering support (alcohol/beverages for events)
 - Partnerships with food delivery platforms
-

5. Cost & Profit Centres

- **Cost Centres**
 - Beverages & food procurement
 - Labour (waiters, bartenders, sommeliers)
 - Bar/restaurant equipment maintenance
 - Utilities (coolers, lighting, music systems)
 - Licenses (alcohol permits, music licenses)
 - **Profit Centres**
 - Food sales (à la carte, buffets)
 - Bar sales (alcohol, cocktails, wine lists)
 - Room service upselling
 - Event catering revenue
 - VIP/private dining packages
-

6. Reporting & Analytics

- Average spend per guest (check size)
- Beverage cost percentage & food cost percentage
- Table turnover rates & occupancy
- Sales by outlet (restaurant, bar, lounge, poolside)

- Loyalty & upselling contribution to revenue
- Customer satisfaction ratings

7. Visual ERP Flow (Text Representation)

RESTAURANT & BAR SERVICE ERP MODULE

Food & Beverage ERP – Catering & Events

1. Procurement & Supply

- Bulk food supplies (meat, poultry, seafood, vegetables, grains, beverages)
 - Event-specific equipment (buffet stations, portable ovens, grills, coffee machines)
 - Catering utensils (chafing dishes, trays, serving spoons, cutlery, crockery, glassware)
 - Event furniture (tables, chairs, linens, décor)
 - Staff uniforms (chefs, waiters, bartenders, runners)
 - Transportation logistics (catering vans, delivery carts)
 - Vendor contracts (flower decorators, tent suppliers, beverage distributors)
-

2. Operations

- **Menu Planning & Packages**
 - Buffet, plated meals, cocktail service, live cooking stations
 - Event-specific menu design (weddings, conferences, galas)
 - Special dietary menus (vegan, halal, gluten-free)
 - **Event Preparation**
 - Kitchen prep & cooking scheduling
 - Staffing (chefs, servers, bartenders, cleaners)
 - Setup of event furniture, stations, and decorations
 - **Service Execution**
 - Food service coordination (table service, buffet refills, live stations)
 - Beverage service & bar management
 - Guest request handling (last-minute changes, VIP service)
 - **Post-Event**
 - Clearance & cleanup
 - Equipment return & inventory reconciliation
 - Guest feedback collection
-

3. Value Addition

- Premium event packages (weddings, corporate banquets, VIP galas)
- Custom décor & theme dining setups

- Partnerships with event planners, photographers, entertainers
 - Eco-friendly catering (biodegradable utensils, zero-waste initiatives)
 - Add-on services (sound systems, DJs, lighting)
-

4. Sales & Distribution (Including Transfers)

- **Internal Transfers**
 - Food & beverage transfers from central kitchen → banquet halls → outdoor event venues
 - Redistribution between multiple events on the same day
 - **Direct Sales**
 - Corporate catering contracts
 - Weddings, conferences, government functions
 - Private parties and social events
 - **External Distribution**
 - Partnerships with external event organizers
 - Long-term contracts with corporates & institutions
-

5. Cost & Profit Centres

- **Cost Centres**
 - Bulk food & beverage procurement
 - Temporary staff hire & wages
 - Equipment rental & transport
 - Utilities (event power, refrigeration)
 - Décor & entertainment costs
 - **Profit Centres**
 - Event package sales (corporate, weddings, private parties)
 - Premium service upsells (custom menus, décor themes, entertainment)
 - Partnerships & commissions (vendors, planners, entertainers)
 - Venue rental (if hotel provides halls/ballrooms)
-

6. Reporting & Analytics

- Revenue per event (per head, per package)
- Food & beverage cost % for events
- Profitability by event type (corporate, wedding, gala, government)
- Staff utilization & overtime tracking
- Customer satisfaction & repeat booking rate
- Waste tracking & sustainability reports

7. Visual ERP Flow (Text Representation)

CATERING & EVENTS ERP MODULE

PROCUREMENT & SUPPLY

- └ Bulk Food & Beverages
- └ Event Equipment & Utensils
- └ Furniture & Décor
- └ Vendor Contracts & Logistics

OPERATIONS

- └ Menu Planning (buffets, plated, dietary)
- └ Event Preparation (kitchen prep, staffing, setup)
- └ Service Execution (food, bar, guest requests)
- └ Post-Event (cleanup, reconciliation, feedback)

VALUE ADDITION

- └ Premium Event Packages
- └ Custom Décor & Theming
- └ Partnerships (planners, entertainers)
- └ Eco-Friendly Catering & Add-ons

SALES & DISTRIBUTION (Including Transfers)

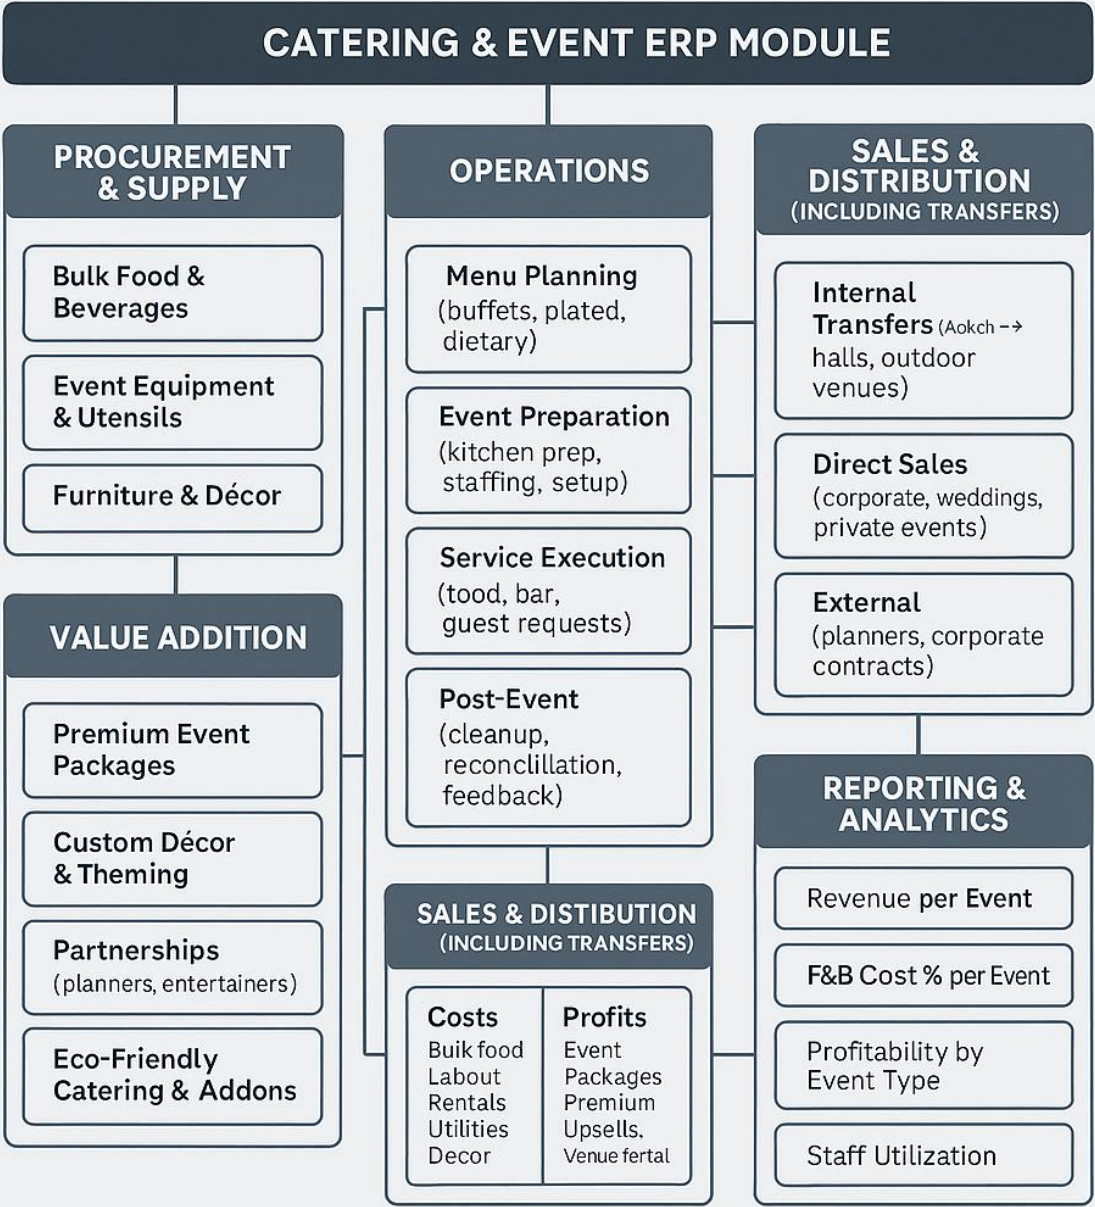

- └ Internal Transfers (kitchen → halls, outdoor venues)
- └ Direct Sales (corporate, weddings, private events)
- └ External (planners, corporate contracts)

COST & PROFIT CENTRES

- └ Costs: Bulk Food, Labour, Rentals, Utilities, Décor
- └ Profits: Event Packages, Premium Upsells, Partnerships, Venue Rental

REPORTING & ANALYTICS

- └ Revenue per Event

-

Food & Beverage ERP – Waste & Inventory Control

1. Procurement & Supply

- Food & beverage stock (raw ingredients, beverages, packaged goods)
 - Storage systems (cold rooms, refrigerators, shelves, FIFO racks)
 - Tracking tools (RFID/barcode scanners, POS-linked inventory systems)
 - Waste bins & separation systems (organic, recyclable, general)
 - Composting & recycling partnerships (external vendors)
 - Supplier contracts with return policies for damaged goods
-

2. Operations

- **Stock Management**
 - Real-time tracking of stock levels by outlet (kitchen, bar, catering)
 - FIFO (First-In, First-Out) and FEFO (First-Expire, First-Out) enforcement
 - Minimum stock level alerts & auto-reorder triggers
 - **Waste Tracking**
 - Food waste logged per dish/outlet (prep waste, plate waste, spoilage)
 - Beverage wastage tracking (spillage, expired stock)
 - Waste categories: edible surplus, spoiled goods, recyclables
 - **Transfers**
 - Internal transfers (kitchen ↔ bar ↔ catering) with tracking
 - Redistribution of surplus stock to other outlets/events
 - **Loss Prevention**
 - Theft & shrinkage monitoring
 - Expiry-date alerts for perishable goods
 - Supplier claims for defective stock
-

3. Value Addition

- Food donation programs (partnering with NGOs, food banks)
- Composting & biogas generation from organic waste
- Eco-friendly packaging & recycling initiatives
- Zero-waste menus (creative use of surplus/leftovers)

- Guest engagement (QR codes showing sustainability impact)
-

4. Sales & Distribution (Including Transfers)

- **Internal Transfers**
 - Stock moved between kitchens, restaurants, bars, and events
 - Redistribution to reduce waste
 - **External Distribution**
 - Sale of surplus packaged items (discounted rates)
 - Partnerships with recycling & composting companies
-

5. Cost & Profit Centres

- **Cost Centres**
 - Stock procurement & storage
 - Waste disposal & recycling contracts
 - Tracking systems (POS, RFID, software)
 - Labour for stock monitoring & waste management
 - **Profit/Recovery Centres**
 - Cost savings from reduced wastage
 - Revenue from surplus stock sales
 - Compost/biogas sales or cost-offsets
 - Sustainability-driven guest loyalty & partnerships
-

6. Reporting & Analytics

- Waste percentage per outlet/dish
 - Inventory turnover ratio
 - Stock variance (purchases vs usage vs wastage)
 - Cost of waste vs recovered value
 - Transfers log (internal redistribution impact)
 - Sustainability reports (carbon footprint, donation metrics)
-

7. Visual ERP Flow (Text Representation)

WASTE & INVENTORY CONTROL ERP MODULE

PROCUREMENT & SUPPLY

- Food & Beverage Stock
- Storage Systems (cold rooms, shelves)
- Tracking Tools (POS, RFID, barcodes)

- └─ Waste Management Vendors

OPERATIONS

- └─ Stock Management (FIFO, FEFO, auto-reorder)
- └─ Waste Tracking (prep, plate, spoilage, spillage)
- └─ Transfers (kitchen ↔ bar ↔ catering redistribution)
- └─ Loss Prevention (expiry alerts, theft control, supplier claims)

VALUE ADDITION

- └─ Food Donation Programs
- └─ Composting & Biogas
- └─ Zero-Waste Menus
- └─ Guest Sustainability Engagement

SALES & DISTRIBUTION (Including Transfers)

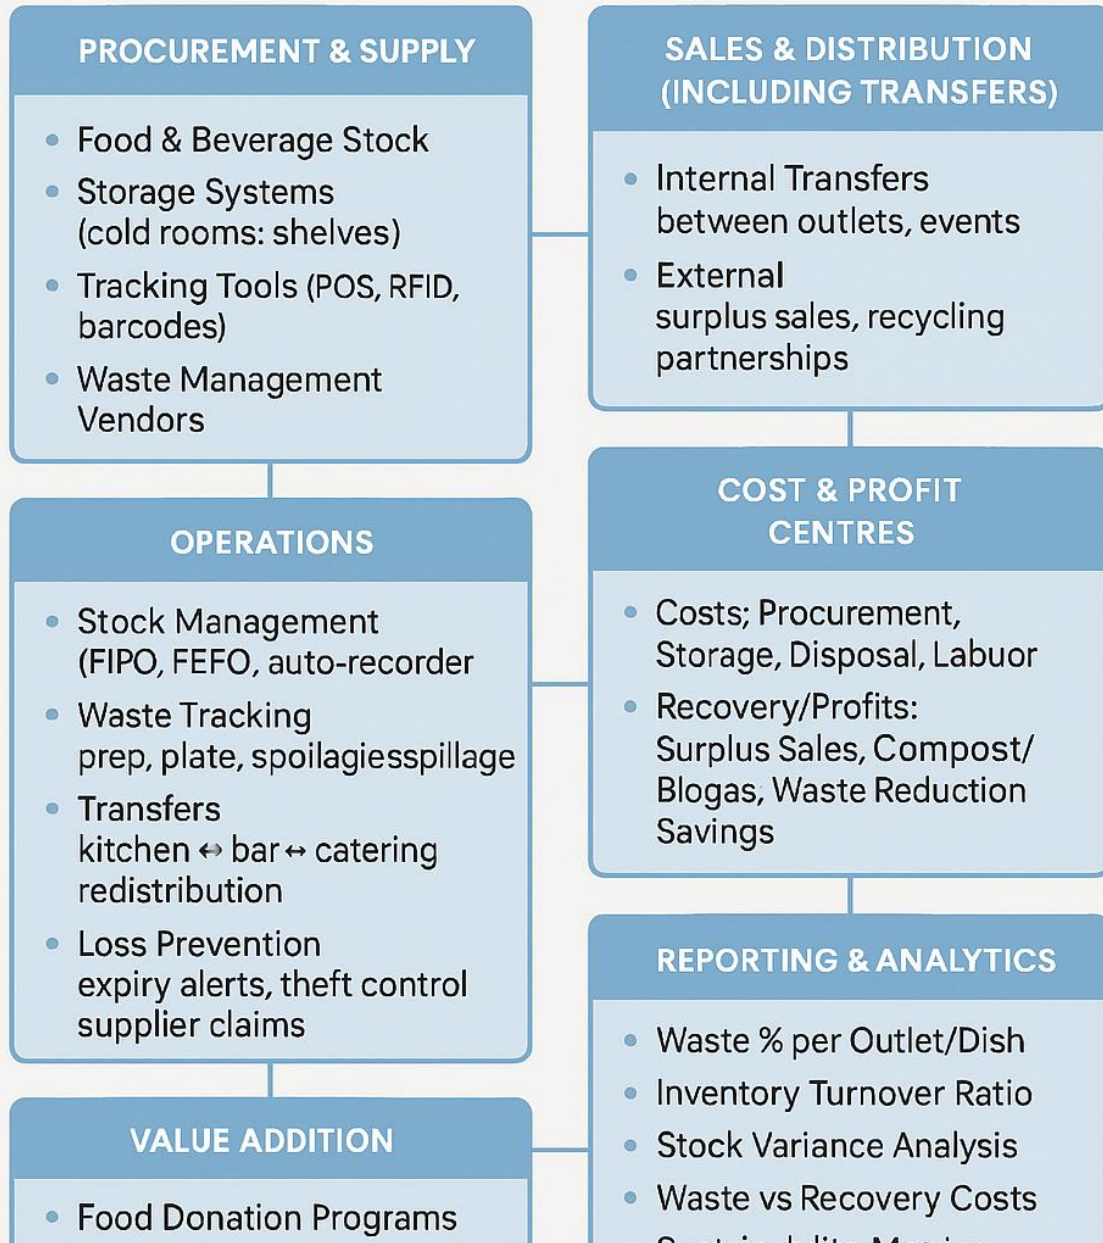

- └─ Internal Transfers (between outlets, events)
- └─ External (surplus sales, recycling partnerships)

COST & PROFIT CENTRES

Waste & Inventory Control ERP Module

شركة Leisure & Recreation ERP Module

(Covers spas, gyms, pools, wellness centers, sports facilities, and recreational activities in hospitality operations.)

1. Procurement & Supply

- Fitness & wellness equipment (treadmills, weights, yoga mats, massage beds)
 - Pool & spa supplies (chlorine, pH testers, heating systems, oils, aromatherapy kits)
 - Sports equipment (tennis rackets, balls, golf carts, squash gear)
 - Safety equipment (lifeguard kits, first-aid, signage)
 - Uniforms for trainers, spa staff, lifeguards
 - Reservation software for classes & facilities
 - Vendor contracts for equipment maintenance & wellness products
-

2. Operations

- **Spa & Wellness**
 - Massage therapy scheduling
 - Aromatherapy, sauna, steam, and salon services
 - Wellness program planning (yoga, meditation, detox retreats)
 - **Fitness & Gym**
 - Gym membership management (guest passes, long-term packages)
 - Trainer assignments & class schedules
 - Equipment usage monitoring & preventive maintenance
 - **Swimming Pool & Aquatics**
 - Pool safety & lifeguard rotations
 - Guest access scheduling (private vs shared use)
 - Water quality monitoring (chemical balance, temperature control)
 - **Sports & Outdoor Activities**
 - Court/field reservations (tennis, squash, golf)
 - Equipment rentals & return logs
 - Adventure activities (cycling, hiking, guided tours)
-

3. Value Addition

- VIP wellness packages (personal trainers, spa retreats, exclusive memberships)

- Loyalty programs linked to recreation spending
 - Themed events (fitness bootcamps, wellness festivals, pool parties)
 - Partnerships with wellness brands (organic oils, supplements)
 - Technology add-ons (smart wearables integration, AR/VR fitness sessions)
-

4. Sales & Distribution (Including Transfers)

- **Direct Sales**
 - Spa treatments, gym passes, pool day tickets, sports rentals
 - Membership packages (monthly/annual)
 - Wellness retreats & adventure experiences
 - **Internal Transfers**
 - Guest packages combining recreation + F&B + accommodation
 - Transfers between outlets (spa → wellness shop, gym → café)
 - **External Distribution**
 - Partnerships with local tour operators & fitness clubs
 - Cross-selling with travel agencies (holiday packages with recreation add-ons)
-

5. Cost & Profit Centres

- **Cost Centres**
 - Equipment procurement & maintenance
 - Labour (trainers, spa staff, lifeguards)
 - Utilities (pool heating, sauna, lighting, sound systems)
 - Consumables (spa oils, gym supplements, sports gear)
 - **Profit Centres**
 - Spa treatments & wellness services
 - Gym memberships & fitness classes
 - Pool tickets & rentals
 - Sports facilities (tennis, squash, golf)
 - Premium retreats, festivals, and private events
-

6. Reporting & Analytics

- Spa & gym utilization rates
- Membership growth & churn
- Revenue by outlet (spa, gym, pool, sports)
- Guest satisfaction scores (per service type)
- Cost per facility vs revenue (profitability analysis)
- Safety & compliance metrics (incidents, water tests, trainer certifications)

7. Visual ERP Flow (Text Representation)

LEISURE & RECREATION ERP MODULE

PROCUREMENT & SUPPLY

- Fitness & Wellness Equipment
- Pool & Spa Supplies
- Sports Equipment
- Safety Gear & Uniforms
- Vendor Contracts & Reservation Software

OPERATIONS

- Spa & Wellness (massages, sauna, retreats)
- Fitness & Gym (memberships, trainers, equipment)
- Swimming Pool (lifeguards, scheduling, water quality)
- Sports & Outdoor (court reservations, rentals, adventures)

VALUE ADDITION

- VIP Wellness Packages
- Loyalty Programs
- Themed Events (bootcamps, festivals, parties)
- Brand Partnerships
- Tech Add-ons (wearables, AR/VR sessions)

SALES & DISTRIBUTION (Including Transfers)

- Direct Sales (treatments, passes, memberships, events)
- Internal Transfers (guest packages with F&B + stay)
- External (tour operators, travel agencies, fitness clubs)

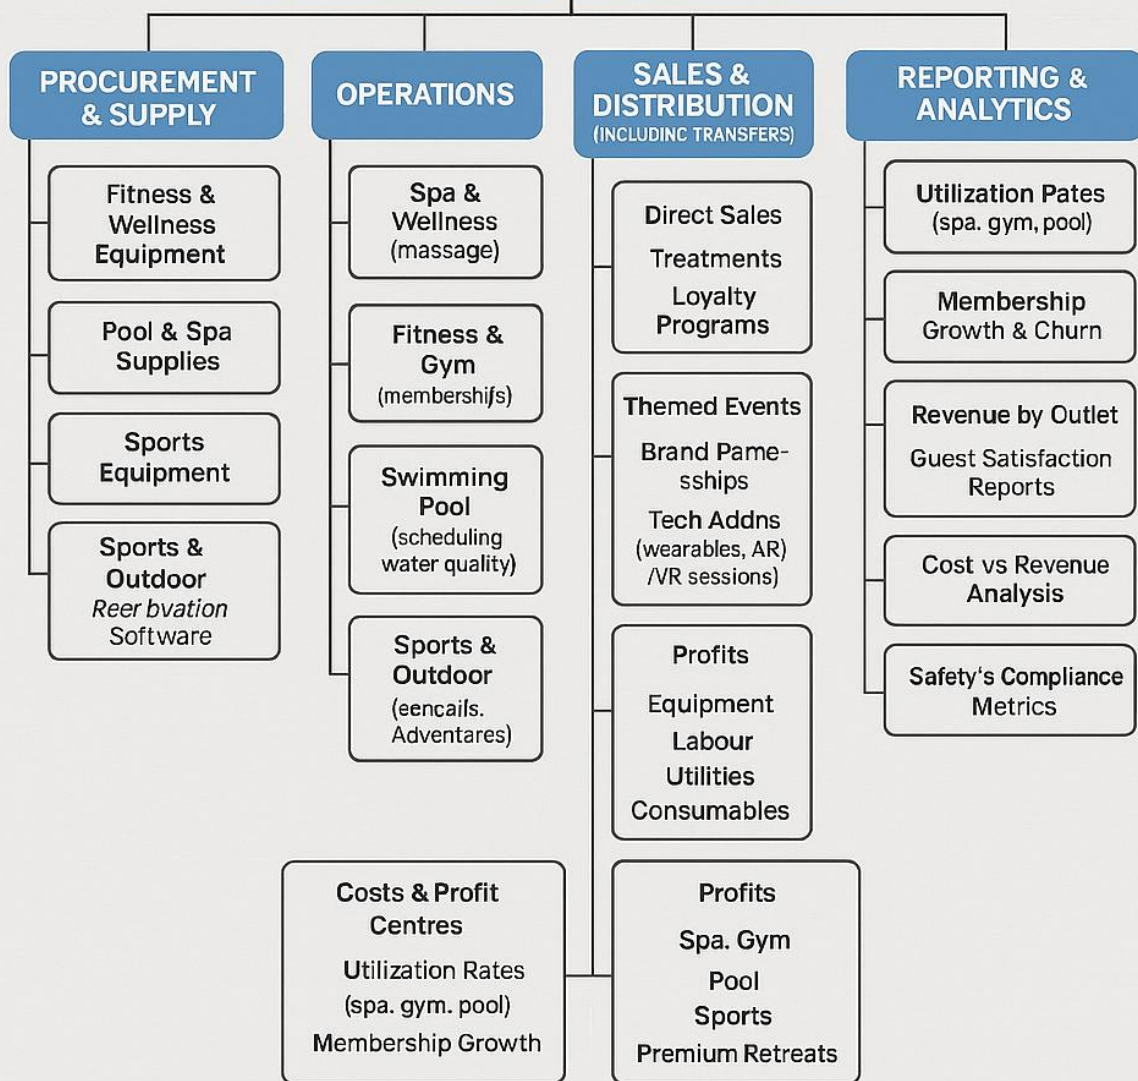

COST & PROFIT CENTRES

- Costs: Equipment, Labour, Utilities, Consumables
- Profits: Spa, Gym, Pool, Sports, Premium Retreats

REPORTING & ANALYTICS

- Utilization Rates (spa, gym, pool)
 - Membership Growth & Churn
 - Revenue by Outlet
 - Guest Satisfaction Reports
 - Cost vs Revenue Analysis
 - Safety & Compliance Metrics
-

LEISURE & RECREATION ERP MODULE

□ Leisure & Recreation ERP – Spa & Wellness

1. Procurement & Supply

- Massage beds, chairs, sauna/steam room equipment
 - Oils, lotions, aromatherapy kits, scrubs, facial products
 - Towels, robes, slippers (branded for guests)
 - Reservation & spa management software
 - POS and billing systems for treatments
 - Vendor contracts with wellness brands & organic product suppliers
 - Staff uniforms for therapists & spa attendants
-

2. Operations

- **Treatment Scheduling**
 - Guest reservations (app, front desk, direct walk-ins)
 - Therapist allocation by specialization (massage, facial, aromatherapy)
 - Package bookings (single, couple, group spa sessions)
 - **Treatment Delivery**
 - Massage therapies (Swedish, deep tissue, hot stone, aromatherapy)
 - Facials, scrubs, manicures, pedicures
 - Sauna, steam, hydrotherapy, detox treatments
 - **Wellness Programs**
 - Yoga & meditation classes
 - Detox and wellness retreats
 - Corporate wellness packages
 - **Quality & Hygiene Control**
 - Sanitization of rooms & equipment after every use
 - Product usage logs (oil, lotion, scrub tracking)
 - Guest feedback and complaint handling
-

3. Value Addition

- VIP packages (private spa suites, luxury oils, champagne add-ons)
- Personalized treatment plans (dietary & wellness advice linked to medical checks)
- Loyalty programs (points per treatment, free add-ons)

- Brand partnerships with luxury wellness product companies
 - Seasonal themed offers (valentine couple spa, festive detox packages)
-

4. Sales & Distribution (Including Transfers)

- **Direct Sales**
 - Individual treatments & spa sessions
 - Packages (half-day, full-day, couple sessions)
 - **Internal Transfers**
 - Guest packages including spa + accommodation + dining
 - Transfers of wellness products to in-house gift shops
 - **External Distribution**
 - Partnerships with corporate clients (employee wellness programs)
 - Sales of branded spa products (online & retail channels)
-

5. Cost & Profit Centres

- **Cost Centres**
 - Procurement of oils, lotions, consumables
 - Spa equipment maintenance
 - Staff wages & training
 - Utilities (water heating, sauna, steam)
 - Licensing & wellness certifications
 - **Profit Centres**
 - Spa treatments (massages, facials, therapies)
 - Premium packages (VIP, couple, retreat)
 - Wellness program sales (yoga, detox, meditation)
 - Retail product sales (branded oils, lotions, scrubs)
-

6. Reporting & Analytics

- Treatment utilization rate (room occupancy, therapist usage)
 - Revenue per treatment & package type
 - Guest satisfaction & repeat visits
 - Cost per treatment (materials + labour)
 - Wellness program uptake & profitability
 - Product sales reports (retail vs internal use)
-

7. Visual ERP Flow (Text Representation)

SPA & WELLNESS ERP MODULE

Leisure & Recreation ERP – Fitness & Gym

1. Procurement & Supply

- Gym equipment (treadmills, weights, ellipticals, resistance machines, rowing machines)
 - Group class equipment (yoga mats, spin bikes, boxing gloves, kettlebells)
 - Smart wearables integration (heart rate monitors, tracking devices)
 - Cleaning supplies & sanitizers (for machines & mats)
 - Uniforms for trainers & staff
 - Membership & class booking software
 - Vendor contracts (equipment suppliers, maintenance providers)
-

2. Operations

- **Membership Management**
 - Guest passes, daily/weekly/monthly memberships
 - Long-term packages (annual, corporate, loyalty-based)
 - Mobile app/portal integration for renewals & bookings
 - **Trainer & Class Scheduling**
 - Personal training sessions & client allocation
 - Group fitness class management (yoga, Zumba, HIIT, spinning)
 - Attendance & no-show tracking
 - **Equipment Management**
 - Preventive maintenance & safety checks
 - Usage tracking (machine hours, wear & tear logs)
 - Allocation for personal training vs group sessions
 - **Wellness Integration**
 - Nutrition advice linked to training
 - Fitness assessments & goal tracking
 - Integration with spa/wellness retreats
-

3. Value Addition

- VIP memberships (priority access, exclusive trainers, luxury locker rooms)
- Loyalty programs (points for gym visits, rewards for class attendance)

- Fitness challenges & competitions (leaderboards, prizes)
 - Branded merchandise (sportswear, supplements, accessories)
 - Technology add-ons (VR fitness, live-stream classes, AI-powered fitness tracking)
-

4. Sales & Distribution (Including Transfers)

- **Direct Sales**
 - Gym memberships (short-term, long-term, corporate)
 - Group class packages (yoga, Zumba, bootcamps)
 - Personal training sessions
 - **Internal Transfers**
 - Guest packages with gym + spa + pool access
 - Transfers of fitness products to hotel shops or partner outlets
 - **External Distribution**
 - Corporate fitness contracts (workplace wellness programs)
 - Online classes & streaming subscriptions
-

5. Cost & Profit Centres

- **Cost Centres**
 - Equipment purchase & maintenance
 - Staff wages (trainers, receptionists, cleaners)
 - Utilities (electricity for machines, lighting, AC)
 - Cleaning & hygiene supplies
 - Software & licensing fees
 - **Profit Centres**
 - Membership & personal training sales
 - Group class packages
 - VIP memberships & premium services
 - Retail sales (sportswear, supplements, accessories)
 - Corporate wellness contracts
-

6. Reporting & Analytics

- Membership growth vs churn
- Utilization of gym equipment & facilities
- Trainer performance & revenue contribution
- Group class attendance & profitability
- Retail product sales performance
- Guest satisfaction & fitness outcomes (progress tracking)

7. Visual ERP Flow (Text Representation)

FITNESS & GYM ERP MODULE

SPORTS & OUTDOOR ACTIVITIES ERP MODULE

Events & Conferences ERP Module

(Covers meetings, conferences, banquets, weddings, and large-scale event hosting within hospitality operations.)

1. Procurement & Supply

- Event furniture (tables, chairs, podiums, stages, backdrops)
 - AV equipment (microphones, speakers, projectors, LED screens)
 - Décor & lighting equipment (flower arrangements, chandeliers, themed décor)
 - Catering supplies (chafing dishes, serving trays, cutlery, crockery)
 - Stationery & conference kits (notepads, pens, name tags)
 - Uniforms for event staff (ushers, hosts, technicians)
 - Event management software (booking, scheduling, billing)
 - Vendor contracts (decorators, photographers, entertainers, florists)
-

2. Operations

- **Event Booking & Scheduling**
 - Hall/conference room reservations
 - Package selection (corporate, wedding, banquet, private party)
 - Guest count & seating plan integration
 - **Event Setup**
 - Room setup (furniture arrangement, stage, décor)
 - Audio-visual installation & testing
 - Catering preparation & delivery
 - **Event Execution**
 - Coordination of catering, entertainment, and guest services
 - Real-time issue handling (sound, seating, food adjustments)
 - Security, ushers, and guest assistance
 - **Post-Event**
 - Clearance, cleaning, and reset for next event
 - Equipment and inventory reconciliation
 - Feedback collection & settlement of bills
-

3. Value Addition

- Premium event packages (luxury décor, high-tech AV, celebrity entertainment)
 - Themed weddings & conferences (cultural, seasonal, corporate branding)
 - Corporate loyalty packages (discounted bulk bookings)
 - Hybrid/virtual conference hosting (live streaming, remote participation)
 - Partnerships with planners & entertainers (DJ, bands, MCs, photographers)
-

4. Sales & Distribution (Including Transfers)

- **Direct Sales**
 - Corporate events, weddings, banquets, trade shows, exhibitions
 - Government functions & international conferences
 - **Internal Transfers**
 - Event packages bundled with F&B, spa, accommodation, and leisure facilities
 - Transfers of catering services from kitchens/bars
 - **External Distribution**
 - Partnerships with tour operators, wedding planners, and corporates
 - Long-term contracts with institutions & event organizers
-

5. Cost & Profit Centres

- **Cost Centres**
 - Event furniture & décor procurement
 - AV equipment rental & maintenance
 - Staff wages (event planners, ushers, technicians)
 - Vendor payments (decorators, photographers, entertainers)
 - Utilities (lighting, sound systems, air conditioning)
 - **Profit Centres**
 - Event package sales (corporate, wedding, banquet)
 - Catering & bar sales during events
 - Venue rental charges (halls, ballrooms, outdoor spaces)
 - Premium add-ons (luxury décor, celebrity entertainment)
-

6. Reporting & Analytics

- Event revenue per type (corporate, wedding, banquet, conference)
- Profitability per package & per hall
- Guest satisfaction ratings & repeat bookings
- Vendor performance & cost efficiency
- ROI on premium add-ons & hybrid event hosting

- Occupancy/utilization of event spaces (seasonal trends)

7. Visual ERP Flow (Text Representation)

EVENTS & CONFERENCES ERP MODULE

PROCUREMENT & SUPPLY

- Event Furniture (tables, chairs, podiums)

EVENTS & CONFERENCES ERP MODULE

Overheads & Back-Office ERP Module

(Covers non-revenue-generating support functions — finance, HR, procurement, IT, admin — essential for smooth hospitality operations.)

1. Procurement & Supply

- Office supplies (stationery, consumables, furniture)
 - IT infrastructure (computers, servers, cloud systems, networking)
 - Utilities (electricity, water, internet, telephony)
 - Vendor contracts (office maintenance, security firms, cleaning services)
 - HR tools (recruitment platforms, payroll software)
 - Finance tools (accounting systems, audit services, tax compliance software)
-

2. Operations

- **Finance & Accounting**
 - Budgeting, cost allocation, and expense tracking
 - Payroll & statutory deductions (tax, pension, insurance)
 - Vendor payments & cash flow management
 - Audit, tax, and compliance reporting
- **Human Resources (HR)**
 - Recruitment, onboarding, and training
 - Staff scheduling, leave & absence management
 - Performance reviews & disciplinary actions
 - Employee welfare programs
- **Administration**
 - Document & record management
 - Facility management (offices, warehouses, staff housing)
 - Insurance & legal compliance management
- **Procurement**
 - Sourcing office equipment, IT systems, services
 - Contract negotiations & supplier performance tracking
 - Purchase order & approval workflows
- **IT & Support**
 - Helpdesk for staff systems (POS, reservations, HR software)
 - Cybersecurity & data protection controls
 - Network maintenance & system upgrades
 - ERP system administration

3. Value Addition

- Centralized HR self-service portals (staff apply leave, view payslips)
 - Automated payroll & finance integrations with ERP
 - Analytics-driven hiring & staff retention strategies
 - Green office initiatives (energy saving, digitalization, paperless policies)
 - Employee wellness & engagement programs
-

4. Sales & Distribution (Including Transfers)

(Indirect since overheads are support functions, not revenue generators)

- **Internal Transfers**
 - Cost allocations from overhead departments to revenue-generating units (F&B, rooms, events)
 - Shared services billing (IT, HR, Finance)
 - **External Partnerships**
 - Outsourced HR or payroll management
 - Audit, tax advisory, or IT managed services contracts
-

5. Cost & Profit Centres

- **Cost Centres**
 - Salaries & wages (admin, HR, finance, IT staff)
 - Office utilities & maintenance
 - IT infrastructure & cybersecurity expenses
 - Recruitment, training, and compliance costs
 - **Recovery/Indirect Profit Centres**
 - Efficiency gains via automation (reduced manual labour)
 - Recharges for shared services (IT, HR, Finance support to other units)
 - Cost savings from digital transformation (paperless, energy saving)
-

6. Reporting & Analytics

- Overhead cost-to-revenue ratio
- HR analytics (turnover, absenteeism, staff satisfaction)
- Finance reports (budget vs actuals, statutory compliance, cash flow)
- Procurement efficiency (supplier delivery times, cost savings)
- IT system uptime, support ticket trends, security incidents

- Audit & compliance tracking

7. Visual ERP Flow (Text Representation)

Sales & Distribution ERP Module

(Covers all sales channels — retail, wholesale, e-commerce, and distribution networks — across hospitality & industry operations.)

1. Procurement & Supply

- Retail & POS systems (cash registers, tablets, barcode scanners)
 - E-commerce platforms (hotel apps, websites, integrations with delivery apps)
 - Inventory & logistics systems (warehousing, distribution fleet, delivery tracking)
 - Packaging materials (boxes, bags, labeling systems)
 - Vendor contracts (wholesalers, distributors, courier/logistics firms)
 - Marketing tools (CRM, loyalty systems, promotions software)
-

2. Operations

- **Retail Outlets & POS**
 - In-house shops (souvenirs, branded products, amenities)
 - Bars, kiosks, cafes, bakeries
 - POS integration with ERP inventory
 - **E-Commerce & Digital Sales**
 - Hotel website & app ordering (room service, retail, bookings)
 - Partnerships with food delivery apps (UberEats, Glovo, Bolt Food)
 - Online store for branded items (spa products, sportswear, packaged foods)
 - **B2B Contracts**
 - Wholesale distribution to corporate clients, schools, government, NGOs
 - Long-term catering/service contracts
 - Event & bulk sales packages
 - **Distribution & Logistics**
 - Internal transfers between outlets (central kitchen → kiosks → restaurants)
 - Fleet management for external deliveries
 - Route optimization & delivery scheduling
-

3. Value Addition

- Loyalty programs & guest reward points
- Cross-selling (spa + retail, F&B + merchandise bundles)

- Personalized promotions (guest history, AI-driven offers)
 - Franchise/partnership opportunities for expansion
 - Green packaging & eco-certified retailing
-

4. Sales & Distribution (Including Transfers)

- **Direct Sales**
 - Retail shops, bars, kiosks, digital sales, in-room purchases
 - **Internal Transfers**
 - Distribution of goods between hotel outlets (central warehouse → spa shop → bars → kiosks)
 - **External Distribution**
 - Wholesale, corporate contracts, online sales, delivery apps
 - International distribution of specialty products
-

5. Cost & Profit Centres

- **Cost Centres**
 - POS & e-commerce systems
 - Distribution fleet & warehousing costs
 - Labour (sales staff, delivery personnel)
 - Marketing & promotions
 - Packaging & logistics costs
 - **Profit Centres**
 - Retail & kiosk sales
 - E-commerce & app-based orders
 - B2B contracts & wholesale distribution
 - Premium product lines (luxury, branded, exclusive items)
-

6. Reporting & Analytics

- Sales by channel (retail, digital, wholesale)
 - Profitability by outlet & product line
 - Inventory turnover & stockout reports
 - Distribution efficiency (on-time deliveries, fleet performance)
 - Marketing ROI (campaign effectiveness, loyalty usage)
 - Guest satisfaction & repeat purchase rates
-

SALES & DISTRIBUTION ERP

Procurement & Supply Chain ERP Module

(Covers sourcing, purchasing, logistics, vendor management, and supply chain optimization across the enterprise.)

1. Procurement & Supply

- Supplier/vendor database (local & international suppliers)
 - Purchase requisition & approval workflows
 - Contract & SLA management
 - Procurement of goods (F&B ingredients, linens, spa products, retail stock, office supplies)
 - Service procurement (maintenance, logistics providers, consultants)
 - Procurement software integrated with ERP
-

2. Operations

- **Supplier Management**
 - Vendor onboarding & compliance checks (licenses, tax IDs, certifications)
 - Performance tracking (quality, delivery timelines, pricing history)
- **Purchasing**
 - Automated purchase requisitions & approvals
 - Purchase order (PO) generation & tracking
 - Three-way matching (PO, invoice, delivery note)
- **Inventory & Stock Replenishment**
 - Forecast demand using consumption history
 - Minimum stock level triggers for auto-replenishment
 - Central warehouse & outlet-level stock allocation
- **Logistics & Distribution**
 - Inbound logistics (supplier → warehouse)
 - Outbound logistics (warehouse → outlets, catering, retail)
 - Route optimization & delivery scheduling
 - Third-party logistics integration
- **Compliance & Audit**
 - Procurement policy enforcement
 - Approval chains (multi-level authorization)
 - Supplier compliance audits (ethical sourcing, sustainability)

3. Value Addition

- Bulk procurement discounts & supplier loyalty deals
- Green sourcing initiatives (eco-certified suppliers, sustainable materials)
- Vendor partnerships & joint ventures
- Digital supplier portal for self-service bidding & invoicing
- Blockchain-enabled supply chain transparency

4. Sales & Distribution (Including Transfers)

- **Internal Transfers**
 - Procurement for different departments (F&B, housekeeping, retail, spa)
 - Stock transfers between warehouses/outlets
- **External Distribution**
 - Surplus items resale (liquidation, discounted bulk sales)
 - Supplier collaboration on co-branded distribution

5. Cost & Profit Centres

- **Cost Centres**
 - Procurement staff salaries
 - Software licenses & IT systems
 - Logistics & transportation costs
 - Supplier/vendor payments
 - Contract & compliance management costs
- **Profit/Recovery Centres**
 - Bulk purchase savings
 - Cost reductions via optimized supplier contracts
 - Resale of surplus or obsolete stock
 - Supplier rebates & loyalty benefits

6. Reporting & Analytics

- Supplier performance dashboards (OTIF: On-Time In-Full deliveries)
- Spend analysis (by category, supplier, department)
- Contract compliance reports
- Cost savings from procurement strategies
- Inventory turnover & stock variance reports
- Forecast accuracy (demand vs actual usage)

7. Visual ERP Flow (Text Representation)

PROCUREMENT & SUPPLY CHAIN ERP MODULE

PROCUREMENT & SUPPLY

- Vendor Database & SLA Mgmt
- Purchase Requisition & Approval Workflows
- Goods & Service Procurement
- Integrated Procurement Software

OPERATIONS

- Supplier Mgmt (onboarding, performance, compliance)
- Purchasing (POs, approvals, three-way match)
- Inventory Replenishment (forecasting, auto-reorder, allocation)
- Logistics & Distribution (inbound, outbound, routes)
- Compliance & Audit (policies, approvals, supplier audits)

VALUE ADDITION

- Bulk Discounts & Loyalty Deals
- Green Sourcing
- Vendor Partnerships
- Supplier Self-Service Portals
- Blockchain Transparency

SALES & DISTRIBUTION (Including Transfers)

- Internal Transfers (departmental procurement, stock transfers)
- External (surplus resale, co-branded distribution)

COST & PROFIT CENTRES

- Costs: Staff, Software, Logistics, Supplier Payments, Compliance
- Recovery/Profits: Bulk Savings, Resale, Rebates

REPORTING & ANALYTICS

Logistics & Fleet Management ERP Module

(Covers transportation, delivery scheduling, fleet tracking, maintenance, and fuel management across operations.)

1. Procurement & Supply

- Vehicles (trucks, vans, buses, motorcycles, delivery bikes)
 - Fleet tracking systems (GPS, RFID, telematics devices)
 - Fuel management systems & fuel cards
 - Spare parts, tires, lubricants, and consumables
 - Driver uniforms, safety gear, and communication devices
 - Vendor contracts (vehicle leasing firms, maintenance workshops, insurance providers)
-

2. Operations

- **Fleet Management**
 - Vehicle registration & licensing
 - Allocation of vehicles to departments (F&B delivery, guest shuttles, procurement runs)
 - Preventive & corrective maintenance scheduling
 - **Logistics & Delivery**
 - Route optimization & load planning
 - Delivery scheduling & tracking (supplier → warehouse → outlets → customer)
 - Reverse logistics (returns, recycling, redistribution)
 - **Fuel Management**
 - Real-time fuel consumption monitoring
 - Refueling logs & expense reconciliation
 - Fuel theft prevention via telematics
 - **Driver & Staff Management**
 - Driver roster & duty scheduling
 - Performance tracking (delivery punctuality, safety record)
 - Compliance with transport & safety regulations
-

3. Value Addition

- Smart GPS tracking & geofencing (alert for unauthorized trips)
 - Eco-friendly fleet initiatives (electric vehicles, fuel-efficient driving programs)
 - Integration with supplier & customer portals for live tracking
 - Automated billing linked to delivery confirmation
 - Customer notifications for shipment ETA updates
-

4. Sales & Distribution (Including Transfers)

- **Internal Transfers**
 - Fleet services allocated to hotel departments (procurement, catering, housekeeping, events)
 - Shuttle services for staff & guests
 - **External Distribution**
 - Deliveries to customers, corporate clients, and partners
 - Third-party logistics outsourcing for overflow capacity
-

5. Cost & Profit Centres

- **Cost Centres**
 - Vehicle purchase/leasing
 - Maintenance & repairs
 - Fuel costs
 - Driver wages & training
 - Insurance & compliance fees
 - **Profit/Recovery Centres**
 - Cost savings via optimized routing & fuel efficiency
 - Revenue from external logistics contracts
 - Fleet rental or leasing services to partners
 - Sustainability grants/incentives for green fleets
-

6. Reporting & Analytics

- Fleet utilization rates (active vs idle vehicles)
- Delivery KPIs (on-time deliveries, delayed shipments, cost per km)
- Fuel consumption & variance reports
- Maintenance costs vs downtime impact
- Driver performance & compliance logs
- Carbon footprint & sustainability reporting

7. Visual ERP Flow (Text Representation)

□ Customer Relationship Management (CRM) ERP Module

(Covers guest relationship management, loyalty programs, marketing automation, and customer service across hospitality & enterprise operations.)

1. Procurement & Supply

- CRM software (integrated with ERP, POS, reservations, and e-commerce)
 - Communication tools (email, SMS, chatbots, call center systems)
 - Loyalty program infrastructure (cards, apps, reward systems)
 - Marketing automation platforms (campaigns, analytics)
 - Customer feedback & survey tools
 - Vendor contracts (digital marketing agencies, survey providers, loyalty partners)
-

2. Operations

- **Guest/Customer Profiles**
 - Centralized database with purchase history, preferences, demographics
 - Segmentation (VIPs, repeat guests, corporate clients)
 - **Customer Engagement**
 - Personalized emails, SMS, app notifications
 - Guest recognition at check-in & during service
 - Upselling & cross-selling based on preferences
 - **Loyalty Programs**
 - Points-based systems (per purchase or stay)
 - Tiered memberships (silver, gold, platinum)
 - Partner integrations (airlines, banks, retail chains)
 - **Marketing Campaigns**
 - Seasonal promotions & discounts
 - Event-driven offers (birthdays, anniversaries, holidays)
 - AI-driven recommendations (based on customer data)
 - **Customer Service & Support**
 - Multi-channel support (phone, email, chat, social media)
 - Complaint management & resolution workflows
 - SLA tracking for response & resolution times
-

3. Value Addition

- Omni-channel guest experience (consistent across in-person, online, app)
 - Predictive analytics (anticipate customer needs & churn)
 - VIP concierge services & personalization at scale
 - Gamified loyalty systems (badges, rewards, challenges)
 - Brand advocacy programs (referral rewards, influencer partnerships)
-

4. Sales & Distribution (Including Transfers)

- **Direct Sales Support**
 - CRM-driven upselling at POS, spa, restaurants, and retail outlets
 - Personalized package offerings
 - **Internal Transfers**
 - CRM data shared across departments (front office, F&B, spa, events) for personalized service
 - **External Distribution**
 - Partner offers (airlines, retail, banks)
 - Co-branded loyalty promotions
-

5. Cost & Profit Centres

- **Cost Centres**
 - CRM software licensing & integrations
 - Marketing campaign expenses
 - Loyalty program rewards & partnerships
 - Customer service staffing & training
 - **Profit Centres**
 - Increased repeat business via loyalty programs
 - Higher average spend from upselling/cross-selling
 - Reduced churn via customer retention strategies
 - Revenue from partnerships & co-branded promotions
-

6. Reporting & Analytics

- Customer lifetime value (CLV)
- Loyalty program performance (points issued, redeemed, breakage)
- Campaign ROI & conversion rates
- Customer satisfaction (CSAT, NPS, reviews)
- Retention vs churn metrics
- Upsell/cross-sell revenue contribution

7. Visual ERP Flow (Text Representation)

CUSTOMER RELATIONSHIP MANAGEMENT (CRM) ERP MODULE

PROCUREMENT & SUPPLY

- CRM Software & Loyalty Infrastructure
- Communication Tools (email, SMS, chatbots)
- Marketing Automation Platforms
- Vendor Contracts (agencies, loyalty partners)

OPERATIONS

- Guest Profiles (centralized data, segmentation)
- Engagement (personalized messages, recognition, upselling)
- Loyalty Programs (points, tiers, partners)
- Marketing Campaigns (seasonal, event-driven, AI-driven)
- Customer Service (multi-channel support, complaints, SLA tracking)

VALUE ADDITION

- Omni-Channel Guest Experience
- Predictive Analytics
- VIP Concierge & Personalization
- Gamified Loyalty Systems
- Brand Advocacy Programs

SALES & DISTRIBUTION (Including Transfers)

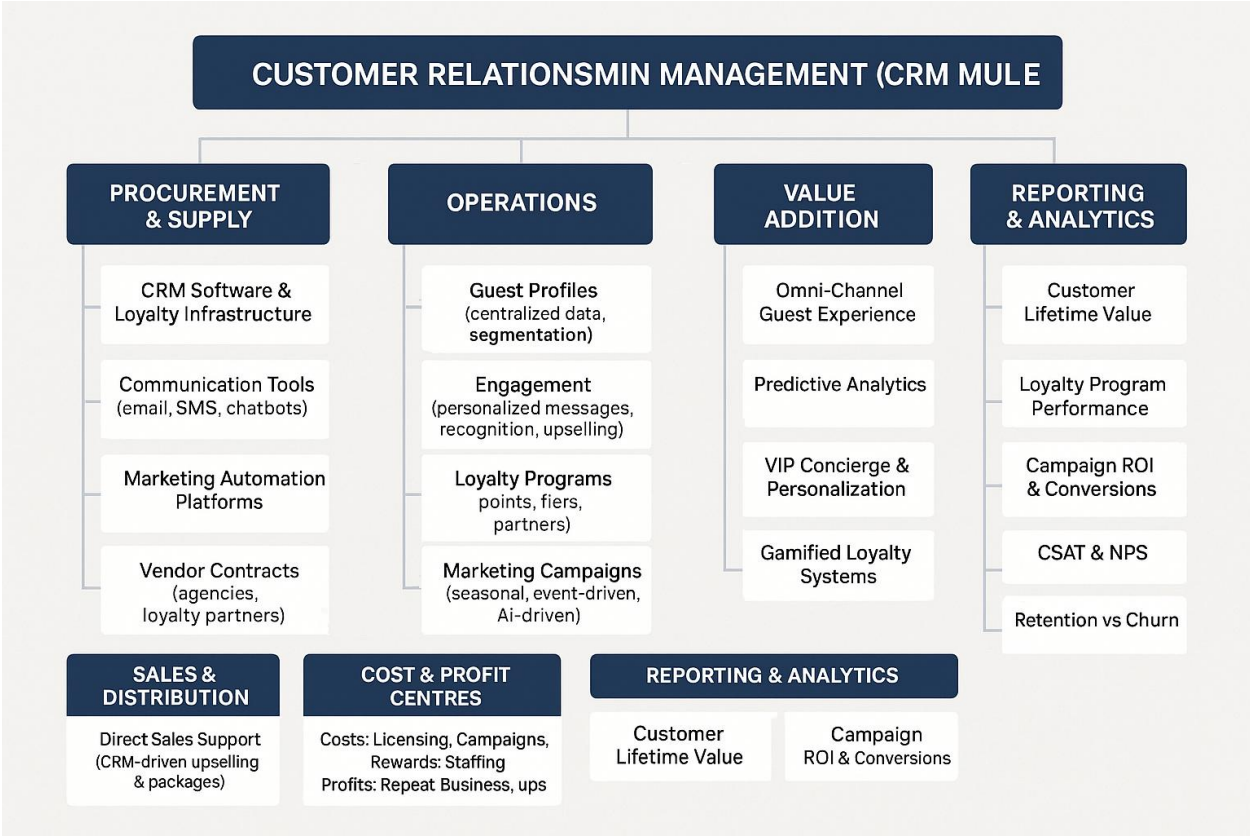

- Direct Sales Support (CRM-driven upselling & packages)
- Internal Transfers (data shared across departments)
- External (partner offers, co-branded loyalty)

COST & PROFIT CENTRES

- Costs: Licensing, Campaigns, Rewards, Staffing
- Profits: Repeat Business, Upsell Revenue, Retention, Partnerships

REPORTING & ANALYTICS

- Customer Lifetime Value
 - Loyalty Program Performance
 - Campaign ROI & Conversions
 - CSAT & NPS
 - Retention vs Churn
 - Upsell/Cross-Sell Revenue
-

Human Resources (HR) ERP Module

(Recruitment → Onboarding → Time & Attendance → Payroll → Performance → Learning → Benefits → Employee Relations → HSE/Compliance)

1. Procurement & Supply

- HRIS/HRMS & payroll software (with self-service portals)
 - Time & attendance systems (biometric, RFID, mobile geofence)
 - Recruitment tools (ATS, job boards, psychometric testing)
 - Learning platforms (LMS, content libraries, certification portals)
 - Wellness & EAP providers; medical insurance partners
 - Office equipment & uniforms (where applicable)
 - Vendor SLAs (background checks, training vendors, payroll bureau)
-

2. Operations

Recruitment & Hiring

- Requisitions, approvals, job posting, candidate pipeline
- Screening, interviews, assessments, offers & contracts
- Background verification & pre-employment medicals

Onboarding & Offboarding

- Digital onboarding checklists, document collection, induction
- Asset issuance (ID, laptop, uniforms), probation tracking
- Exit management (clearance, knowledge transfer, offboarding interview)

Time, Attendance & Scheduling

- Shift rosters, leave/absence management
- Overtime authorization, clock-in compliance, geofenced mobile punches

Payroll & Compensation

- Gross-to-net payroll, taxes, pensions, loans/advances
- Allowances, commissions, tips/service charge allocation
- Multi-entity/multi-currency support and statutory filings

Performance & Objectives

- KPIs/OKRs setup, reviews (quarterly/annual), 360° feedback
- PIPs (performance improvement plans) & promotions

Learning & Development

- Training calendars, mandatory compliance training
- Certifications, skills matrix, career paths & succession planning

Benefits & Wellness

- Medical insurance, leave benefits, meal/transport, housing
- Wellness programs (EAP, fitness, counseling), vaccination drives

Employee Relations & Grievances

- Case logging, investigation workflow, disciplinary actions
- Union/works council engagement; communication broadcasts

Health, Safety & Environment (HSE)

- Incident/near-miss reporting, PPE tracking, drills & audits
 - Risk assessments and compliance registers
-

3. Value Addition

- Employee self-service (leave, payslips, claims) & mobile HR app
 - AI-assisted recruitment (screening, matching), skills-based staffing
 - Predictive retention & workforce planning analytics
 - Total rewards dashboards; transparent career pathways
 - Wellbeing & DEI programs with measurable outcomes
-

4. Sales & Distribution (Including Transfers)

(Internal service delivery & recharges rather than external sales)

- **Internal Transfers:** HR service costs allocated to departments (per headcount, service usage)
 - **External Partnerships:** Training sold to partners; apprenticeship/graduate pipelines with institutions
-

5. Cost & Profit Centres

Cost Centres

- HR staff, recruitment spend, training budgets
- HR tech (HRIS/LMS/ATS), compliance & audit costs
- Medical insurance & benefits subsidies

Recovery/Profit Centres

- Efficiency gains via automation/self-service
 - Internal recharges for premium services (e.g., leadership programs)
 - External paid trainings or assessments (optional)
-

6. Reporting & Analytics

- Headcount, hires vs attrition, time-to-fill, cost-per-hire
 - Attendance compliance, overtime trends, leave utilization
 - Payroll accuracy, payroll-to-revenue ratio
 - Performance distribution, promotion velocity, high-potential bench
 - Training hours, certification rates, L&D ROI
 - Engagement/NPS, grievance resolution times
 - HSE incident rate (TRIR/LTIFR), audit findings & compliance score
-

7. Visual ERP Flow (Text Representation)

HUMAN RESOURCES (HR) ERP MODULE

PROCUREMENT & SUPPLY

- HRIS/Payroll, ATS, LMS
- Time & Attendance Systems
- Wellness/EAP & Insurance Partners
- Background Check & Training Vendors

OPERATIONS

- Recruitment & Hiring (req → offer → contract)
- Onboarding/Offboarding (induction, assets, exits)
- Time & Attendance (rosters, leave, overtime)
- Payroll & Compensation (tax, benefits, filings)
- Performance (KPIs/OKRs, reviews, 360°, PIPs)
- Learning & Development (calendar, skills, succession)
- Benefits & Wellness (medical, EAP, programs)
- Employee Relations (cases, discipline, unions)
- HSE (incidents, PPE, drills, audits)

VALUE ADDITION

- Employee Self-Service & Mobile App

- └─ AI Recruiting & Workforce Planning
- └─ Total Rewards & Career Paths
- └─ Wellbeing & DEI Programs

SALES & DISTRIBUTION (Including Transfers)

- └─ Internal Recharges to Departments
- └─ External Training/Apprenticeship Partnerships

💰 Finance & Accounting ERP Module

(GL → AP/AR → Cash & Treasury → Fixed Assets → Costing & Budgeting → Consolidation → Tax & Compliance → Reporting & Analytics)

1. Procurement & Supply

- ERP finance suite (GL, AP/AR, FA, CM/Treasury, Budgeting, Consolidation)
 - E-invoicing/Smart Invoice tools; bank feeds & payment gateways
 - Document capture/OCR & expense management apps
 - Audit & tax software; statutory reporting packs
 - Vendor SLAs (external auditors, tax advisors, payment processors)
-

2. Operations

General Ledger (GL)

- Chart of accounts, dimensions (branch, project, cost/profit centres)
- Journals (standard/recurring), period close & reconciliations

Accounts Payable (AP)

- 3-way match (PO–GRN–Invoice), approvals, holds & disputes
- Vendor statements, aging, payment runs (ACH, RTGS, card, mobile)

Accounts Receivable (AR)

- Customer invoicing (rooms, F&B, events, retail, B2B)
- Collections, dunning, credit control, aging dashboards

Cash & Treasury

- Bank reconciliation (auto-matching), cash positioning & liquidity
- Payment batches, signatories, hedge & FX management

Fixed Assets (FA)

- Asset register, capitalization, useful life, depreciation (straight-line, reducing)
- Transfers, revaluations, disposals, IFRS/GAAP books

Budgeting & Forecasting

- Top-down/bottom-up budgets, rolling forecasts, scenario modeling
- Opex/Capex planning; driver-based forecasts

Costing & Profitability

- Standard/actual/margin analysis by product, outlet, customer, channel
- Cost allocations & intercompany charges

Intercompany & Consolidation

- Eliminations, multi-entity/multi-currency, minority interests
- Group close calendar and consolidation adjustments

Tax & Compliance

- VAT/GST, withholding, payroll taxes; e-filing packs
 - Compliance calendars; audit trails & controls (SoD)
-

3. Value Addition

- Real-time P&L by outlet/department; mobile CFO dashboards
 - Touchless AP with OCR + approvals; auto bank-recs
 - Dynamic pricing insights (RevPAR/ADR, menu margins, package profitability)
 - Working capital optimization (DSO/DPO/DIH)
 - Policy-driven controls and fraud analytics
-

4. Sales & Distribution (Including Transfers)

(Internal financial services & allocations)

- **Internal Transfers:** Cost recharges to operating units (F&B, Rooms, Events)
 - **External Interfaces:** Bank/PSP integrations, e-invoicing to customers, auditor portals
-

5. Cost & Profit Centres

Cost Centres

- Finance team, software licenses, audit & tax fees, payment processing

Profit/Recovery Centres

- Early-payment discounts captured, FX gains/hedge results, shared-service recharges
- Cost savings from automation & error reduction

6. Reporting & Analytics

- Daily flash (cash, sales, occupancy-driven KPIs)
- P&L, Balance Sheet, Cash Flow (direct/indirect)
- AP/AR aging, DSO/DPO, working capital trend
- Budget vs Actuals, variance & driver analysis
- Outlet/product/channel profitability
- Tax returns & statutory packs; internal controls exceptions
- Close cycle KPIs (days to close, reconciliation status)

7. Visual ERP Flow (Text Representation)

FINANCE & ACCOUNTING ERP MODULE

PROCUREMENT & SUPPLY

- Finance ERP (GL, AP, AR, FA, Treasury, Budgeting)
- E-Invoicing, Bank Feeds, Payment Gateways
- OCR/Expenses, Audit & Tax Tools
- Vendor SLAs (auditors, PSPs)

OPERATIONS

- General Ledger (CoA, journals, close)
- AP (3-way match, approvals, payments, aging)
- AR (invoicing, collections, credit control)
- Cash & Treasury (bank recs, liquidity, FX/hedge)
- Fixed Assets (register, depreciation, disposals)
- Budgeting & Forecasting (rolling, scenarios)
- Costing & Profitability (allocations, margins)
- Intercompany & Consolidation (elims, multi-currency)
- Tax & Compliance (VAT/GST, payroll tax, audits)

VALUE ADDITION

- Real-time Outlet/Dept P&L
- Touchless AP & Auto Bank-Recs
- Dynamic Pricing & Margin Insights
- Working Capital Optimization

SALES & DISTRIBUTION (Including Transfers)

- Internal Cost Recharges to Units
- External Interfaces (banks, e-invoicing, auditors)

COST & PROFIT CENTRES

- Costs: People, Licenses, Audit/Tax, PSP Fees
- Recovery: Discounts, FX/Hedge, Shared-Services Savings

REPORTING & ANALYTICS

- Flash KPIs (cash, sales, occupancy)

- Financials (P&L, BS, CF)
 - AP/AR Aging & DSO/DPO
 - BvA & Variances
 - Profitability by Outlet/Product/Channel
 - Close Cycle & Controls Exceptions
-

ERP Expanded Industry Template – Healthcare (Hospital/Clinic/Pharmacy/Lab)

1) Procurement & Supply

- Medical equipment & devices (diagnostic, surgical, imaging, monitors)
- Drugs & vaccines (formulary, controlled substances handling)
- Medical/surgical consumables (PPE, syringes, sutures, reagents)
- Non-medical supplies (linen, catering, cleaning, office)
- Vendor & contract management (SLAs, recalls, cold-chain)
- Biomedical spares & maintenance contracts (OEM/third party)
- E-procurement, RFQs, approvals, GRN, 3-way match with invoices

2) Clinical Operations

Patient Access & Journeys

- Registration & EHR creation, triage, queue mgmt
- Appointments (online/call center/kiosk), doctor rosters
- Telemedicine (video visits, e-prescriptions)

Emergency & OPD/IPD

- ER intake, triage levels, stabilization, transfers
- Outpatient visits, consult notes, investigations ordering
- Inpatient admissions, bed/ward mgmt, nursing charts, vitals, MAR (med admin record)

Operating Theatres & Procedures

- OT scheduling, pre-op clearance, instrument sets, time-outs
- Anaesthesia charts, implants/consumables capture, post-op recovery

Diagnostics

- Laboratory (LIS): orders, sample collection, tracking, QC, results
- Imaging (RIS/PACS): x-ray, CT, MRI, ultrasound, reporting, image archiving
- Point-of-care testing & device integrations

Pharmacy (Inpatient & Outpatient)

- E-prescriptions (CPOE), formulary mgmt, substitutions
- Dispensing, controlled drugs registers, expiry/FEFO
- Ward stock/top-up, kits & crash cart cycles

Clinical Support

- CSSD/sterilization cycles & traceability
- Physiotherapy/rehab scheduling & progress notes
- Dietetics & meal plans (clinical nutrition)

Ambulance & Transfers

- Dispatch, GPS, handover records, inter-facility transfers
- Referrals to higher/lower levels of care

3) Non-Clinical Operations

- Housekeeping, laundry, catering, security
- Facilities & biomedical engineering (CMMS, PM schedules)
- Front office/cashier desks, call center, patient relations
- Medical records (coding, ICD-10, archiving, release-of-information)

4) Value Addition

- Care pathways & clinical decision support (protocols, order sets)
- Integrated wellness & chronic disease programs (DM, HTN, HIV, ANC/PNC)
- Telehealth hubs, remote monitoring, home care visits
- Insurance/TPA integrations, pre-auth & e-claims
- Patient mobile app/portal (results, bills, appointments, education)

5) Sales & Distribution (Including Transfers)

- **Direct:** OPD consults, procedures, bed-days, labs, imaging, pharmacy sales
 - **Internal Transfers:** Pharmacy → wards/OT; CSSD → OT/wards; Lab/Radiology → clinicians; Inter-store transfers
 - **External:** Reference lab services, corporate/insurance contracts, outreach clinics, medical camps
-

6) Cost & Profit Centres

Cost Centres

- Wards/ICUs, OT, ER, Lab, Imaging, Pharmacy, Facilities, Biomedical, Housekeeping
- Staff (clinical & non-clinical), utilities (power, oxygen, water), maintenance, IT licenses

Profit Centres

- OPD/IPD services, procedures/OT, diagnostics (lab/imaging), pharmacy retail, corporate/insurance packages, telemedicine
-

7) Compliance, Safety & Quality

- Patient safety events (incident/near-miss), infection prevention & control (IPC)
 - Adverse drug event reporting, antimicrobial stewardship
 - Clinical coding & documentation audits
 - Consent management, privacy & data protection
 - Standards readiness (e.g., ISO, JCI-equivalent), cold-chain & recall tracking
-

8) Reporting & Analytics

- Clinical KPIs: LOS, ALOS, readmissions, ER wait time, bed occupancy, theatre utilization
 - Diagnostics KPIs: TAT (lab/radiology), QC pass rates
 - Pharmacy: stock turns, expiry risk, antibiotics usage, ABC/FSN analysis
 - Financial: revenue by service line, payer mix, AR days, denial rate, cost per case
 - Quality: infection rates (CLABSI, CAUTI), incident trends, hand-hygiene compliance
 - Operational: staffing ratios, asset uptime, energy consumption
-

9) Interoperability & Data

- EHR/CPOE/LIS/RIS/PACS integrations
 - Patient ID, barcoding, bedside scanning
 - Health information exchange; import/export of results & e-claims
 - Audit trails, role-based access, consent & retention policies
-

10) Visual ERP Flow (Text Representation)

HEALTHCARE ERP (HOSPITAL / CLINIC / PHARMACY / LAB)

PROCUREMENT & SUPPLY

- Equipment & Devices | Drugs & Vaccines | Consumables
- Vendors, Contracts, SLAs | Cold-chain & Recalls
- E-Procurement → Approvals → GRN → 3-Way Match

CLINICAL OPERATIONS

- Patient Access (Reg, EHR, Appointments, Telemedicine)
- ER / OPD / IPD (Triage, Notes, Orders, MAR, Beds)
- OT & Procedures (Scheduling, Sets, Anaesthesia, Recovery)
- Diagnostics: LIS (samples, QC, results) | RIS/PACS (reports, images)
- Pharmacy (CPOE, Dispense, Ward Stock, Controlled Drugs)

SUPPORT OPERATIONS

- CSSD | Physiotherapy | Nutrition/Dietetics
- Ambulance & Transfers (dispatch, handover)
- Housekeeping, Laundry, Catering, Security, Facilities/Biomed

VALUE ADDITION

- Care Pathways & CDS
- Chronic Programs & Home Care
- Insurance/TPA & E-Claims
- Patient App/Portal (results, bills, edu)

SALES & DISTRIBUTION (Including Transfers)

- Direct: OPD/IPD, OT, Lab, Imaging, Pharmacy
- Internal Transfers: Pharmacy→Wards/OT, CSSD→OT/Wards, Stores→Dept
- External: Reference Labs, Corporate/Insurance, Outreach

COST & PROFIT CENTRES

- Costs: Wards/ICUs, OT, ER, Lab, Imaging, Pharmacy, Facilities, IT
- Profits: Services, Diagnostics, Pharmacy, Packages, Telehealth

COMPLIANCE, SAFETY & QUALITY

- IPC, Incidents, ADRs, AMS
- Coding Audits, Consents, Privacy
- Standards (ISO/JCI), Cold-chain, Recalls

REPORTING & ANALYTICS

- Clinical KPIs (LOS, Bed OCC, ER Wait, OT Util)
- Diagnostics TAT & QC
- Pharmacy Turns & Expiry Risk
- Financials (Payer Mix, AR Days, Denials)
- Quality & Ops (Infections, Uptime, Energy)

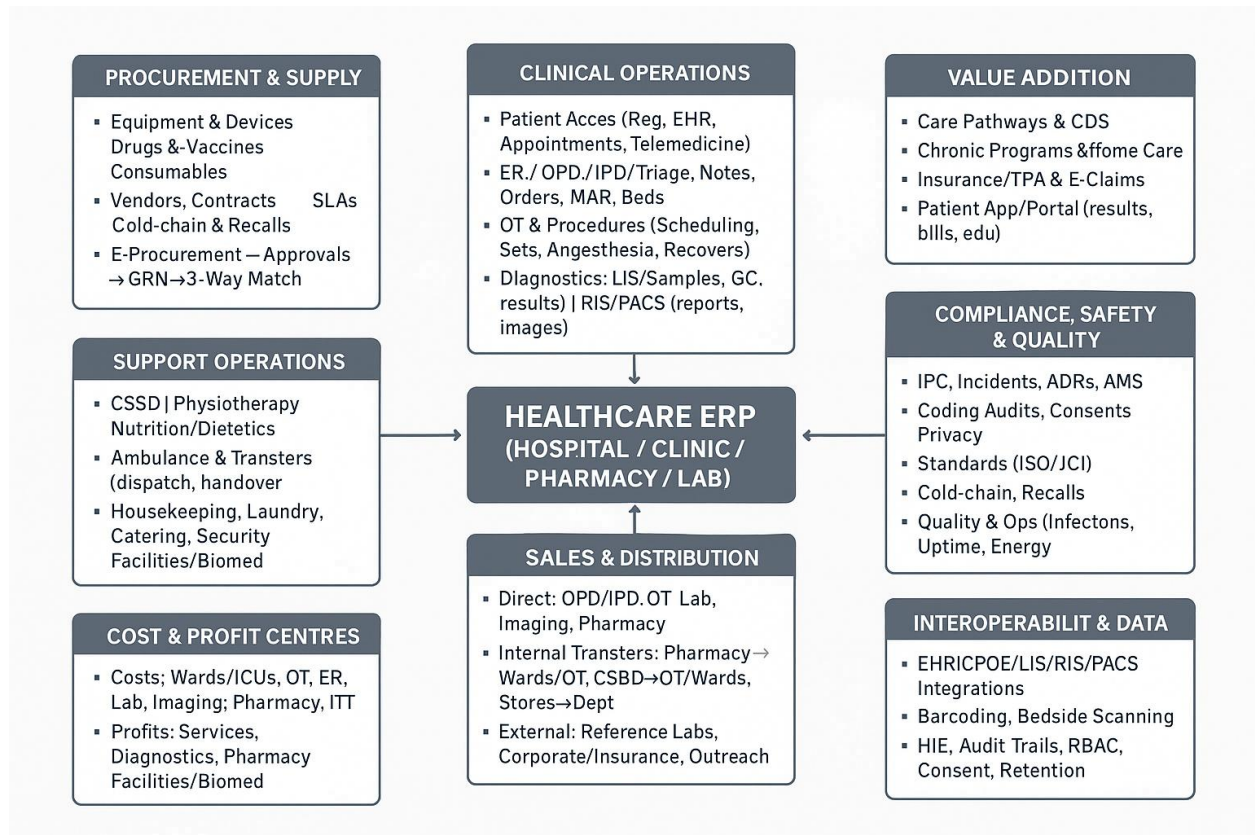

INTEROPERABILITY & DATA

- EHR/CPOE/LIS/RIS/PACS Integrations
- Barcoding, Bedside Scanning
- HIE, Audit Trails, RBAC, Consent, Retention

Here's the order we will follow:

1. **Patient Access & Journeys** (Registration, Appointments, EHR, Telemedicine)
2. **Emergency / OPD / IPD** (Emergency, Outpatient, Inpatient)

3. **Operating Theatres & Procedures**
4. **Diagnostics** (Labs LIS, Imaging RIS/PACS, POCT)
5. **Pharmacy** (Inpatient & Outpatient, Controlled Drugs, Ward Stock)
6. **Clinical Support Services** (CSSD, Physiotherapy, Nutrition/Dietetics)
7. **Ambulance & Transfers**

Healthcare ERP – Patient Access & Journeys Submodule

1. Procurement & Supply

- Patient registration & queue management kiosks
 - EHR/EMR systems (cloud or on-prem)
 - Appointment scheduling software (integrated with doctors' rosters)
 - Telemedicine platforms (video consults, e-prescriptions)
 - Biometric & ID verification tools (national ID, insurance cards)
 - Patient portal & mobile apps
 - Vendor contracts (call centers, digital health partners, insurance clearing houses)
-

2. Operations

- **Registration & Identification**
 - Patient ID creation (unique MRN, barcode, RFID wristbands)
 - Demographic capture (age, sex, address, contacts)
 - Insurance/TPA verification at registration
 - Queue management & triage
- **Appointments & Scheduling**
 - Walk-in, call center, mobile/web booking
 - Doctor roster integration (availability, specialties, clinic slots)
 - Appointment reminders (SMS, email, app push)
 - Rescheduling, cancellations, and waitlist management
- **Electronic Health Records (EHR)**
 - Longitudinal patient record (visits, history, meds, allergies, labs, imaging)
 - Clinical notes entry (SOAP, structured templates)
 - CPOE (Computerized Physician Order Entry) for investigations & prescriptions
 - Data security & consent management
- **Telemedicine & Remote Care**
 - Virtual consults (video/audio integration with EHR)
 - E-prescriptions sent to pharmacies
 - Remote monitoring integration (wearables, home devices, IoT health data)
 - Payment gateways for online consults
- **Front Office & Patient Relations**
 - Enquiry desk, call center, live chat
 - Multilingual support, special needs assistance

- Feedback capture during patient journey
-

3. Value Addition

- Self-check-in kiosks & mobile pre-registration
 - AI-powered triage & appointment routing (symptom checker, chatbot)
 - Patient journey mapping dashboards (tracking wait times, satisfaction)
 - Integration with insurance for real-time eligibility checks
 - Wellness portals with reminders (vaccinations, screenings, chronic care follow-ups)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Appointment fees, registration charges, teleconsult payments
 - **Internal Transfers:** EHR data sharing with clinical departments (ER, OPD, IPD, labs, imaging, pharmacy)
 - **External:** Data exchange with insurance, TPAs, public health authorities (where permitted)
-

5. Cost & Profit Centres

Cost Centres

- IT systems (EHR, telemedicine, appointment apps)
- Staff salaries (registration clerks, call center, patient relations)
- Infrastructure (kiosks, biometric systems, queue displays)

Profit Centres

- Appointment fees, registration charges
 - Teleconsult revenue streams
 - Corporate health check-up packages & preventive screening sales
-

6. Reporting & Analytics

- Patient registration volumes (new vs repeat)
- Appointment utilization rate (booked vs attended vs cancelled)
- Teleconsult usage & revenue trends
- Patient demographics analysis (age, gender, geography)
- Insurance eligibility & claim turnaround stats

- Patient wait time reports & satisfaction scores

7. Visual ERP Flow (Text Representation)

PATIENT ACCESS & JOURNEYS ERP SUBMODULE

PROCUREMENT & SUPPLY

- EHR/EMR Systems, Kiosks, Apps
- Appointment Scheduling Software
- Telemedicine Platforms

- Teleconsult Uptaks & Revenue
- Patient Demographics
- Insurance Eligibility/Claims
- Wait Times & Satisfaction Scores

Healthcare ERP – Emergency, OPD & IPD Submodule

1. Procurement & Supply

- Emergency medical equipment (defibrillators, ventilators, monitors)
 - OPD diagnostic tools (stethoscopes, BP machines, ECGs, minor procedure kits)
 - Ward/bedside equipment (beds, oxygen, IV pumps)
 - Consumables (PPE, syringes, cannulas, dressings, medicines)
 - Patient monitoring systems (ICU central stations, nurse call systems)
 - Admission/discharge & bed management software
 - Vendor contracts (ambulance providers, oxygen suppliers, pharma vendors)
-

2. Operations

Emergency Department (ER)

- Triage system (red/orange/green zones)
- Registration & quick admission workflows
- Critical care stabilization (resuscitation bays)
- Lab & imaging ordering from ER
- Transfers to OT, ICU, or wards

Outpatient Department (OPD)

- Appointment-driven consults
- Consult notes & diagnostic ordering (labs, radiology, pharmacy)
- Minor procedures & dressing clinics
- Preventive care (screenings, vaccinations)
- Billing & follow-up scheduling

Inpatient Department (IPD)

- Admission (from OPD/ER) → bed/ward allocation
- Nursing care plans, vitals charting, medication administration record (MAR)
- Daily doctor rounds & progress notes
- Multi-disciplinary care (physio, dietitian, counsellors)
- Bedside diagnostics & pharmacy stock top-up

- Discharge summary, prescriptions, billing & referrals

Bed & Ward Management

- Real-time bed board (ICU, general wards, private, isolation)
 - Housekeeping/cleaning workflows post-discharge
 - Bed blocking (reserved for surgeries, VIPs)
-

3. Value Addition

- Real-time ER dashboards (waiting time, triage load)
 - Bed occupancy & turnover tracking (ALOS, bed utilization %)
 - E-alerts for deteriorating vitals, nurse call integration
 - Patient-family apps (bedside updates, discharge readiness)
 - Integrated care pathways (diabetes, oncology, cardiology)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Consultation fees, ward charges, procedure fees, bed-days, ICU packages
 - **Internal Transfers:** Pharmacy to wards; lab/radiology to clinicians; housekeeping/maintenance to beds
 - **External:** Insurance/TPA packages, corporate hospital tie-ups, referral hospitals
-

5. Cost & Profit Centres

Cost Centres

- ER equipment & consumables
- Ward utilities (oxygen, electricity, linen, meals)
- Nursing & medical staff wages
- IT systems for admission, discharge & billing

Profit Centres

- ER consultations & procedures
 - OPD consults, diagnostics, preventive services
 - Inpatient revenue (bed charges, procedures, packages)
 - Corporate/insurance patient packages
-

6. Reporting & Analytics

- ER KPIs: triage time, wait time, LOS, mortality rate
 - OPD KPIs: consultation volumes, no-show %, revisits
 - IPD KPIs: ALOS, bed occupancy, readmission rate, discharge TAT
 - Ward cost vs revenue dashboards
 - Patient satisfaction scores by department
 - Insurance & corporate client performance reports
-

7. Visual ERP Flow (Text Representation)

EMERGENCY / OPD / IPD ERP SUBMODULE

PROCUREMENT & SUPPLY

- ER Equipment (defibrillators, ventilators, monitors)
- OPD Tools (diagnostics, minor procedure kits)
- IPD Equipment (beds, oxygen, IV pumps)
- Consumables (PPE, syringes, meds)
- Admission & Bed Mgmt Software, Vendor Contracts

OPERATIONS

- ER (triage, stabilization, orders, transfers)
- OPD (appointments, consults, diagnostics, minor procedures, billing)
- IPD (admissions, nursing, rounds, MAR, multidisciplinary care, discharge)
- Bed Mgmt (bed board, cleaning, blocking)

VALUE ADDITION

- Real-time ER Dashboards
- Bed Occupancy & Turnover Tracking
- E-Alerts & Nurse Call Integration
- Family Apps for Bedside Updates
- Integrated Care Pathways

SALES & DISTRIBUTION (Including Transfers)

- Direct: Consultations, Procedures, Bed-days
- Internal: Pharmacy, Labs, Housekeeping Transfers
- External: Insurance, Corporate, Referrals

COST & PROFIT CENTRES

- Costs: Equipment, Utilities, Staff, IT Systems
- Profits: ER, OPD, IPD Revenues & Packages

REPORTING & ANALYTICS

- ER KPIs (Triage, LOS, Mortality)
 - OPD KPIs (Consults, No-shows, Revisits)
 - IPD KPIs (ALOS, Occupancy, Readmissions)
 - Ward Cost vs Revenue
 - Patient Satisfaction
 - Insurance/Corporate Reports
-

Healthcare ERP – Operating Theatres & Procedures Submodule

1. Procurement & Supply

- Surgical instruments (scalpels, forceps, retractors, scissors, drills)
- OT equipment (anaesthesia machines, operating tables, surgical lights, suction machines)
- Implants & prosthetics (orthopaedic, cardiac, dental, neurological)
- Consumables (sterile drapes, sutures, gloves, gowns, masks, IV fluids)
- Sterilization & CSSD supplies (autoclave indicators, wraps, disinfectants)
- OT management software (scheduling, procedure recording, equipment tracking)
- Vendor contracts (implant suppliers, biomedical servicing, third-party sterilization services)

2. Operations

OT Scheduling & Preparation

- Surgery scheduling (elective, emergency, urgent)
- Pre-op patient clearance (labs, imaging, consents, anaesthesia assessment)
- OT resource allocation (surgeons, nurses, instruments, OT room booking)
- Block booking (reserved slots for specialties, emergencies, VIPs)

Intra-Operative Workflow

- Surgical safety checklist (WHO checklist, time-outs, site marking)
- Anaesthesia record (induction, maintenance, recovery, drug usage)
- Real-time capture of implants/consumables used (linked to patient bill)
- Digital operative notes (structured templates, voice-to-text)
- Surgical imaging/video recording integration

Post-Operative Care

- Recovery room (PACU) management
- Pain management & vital sign monitoring
- Transfer to ICU/ward with digital handover notes
- Post-op orders (labs, medications, diet, physio)

Infection Control & CSSD

- Instrument sterilization cycles (tracking via barcodes/RFID)
 - Sterile stock inventory management
 - Infection control audits & reports
-

3. Value Addition

- OT utilization dashboards (turnaround times, idle times, cancellations)
 - AI-driven surgery scheduling optimization
 - Digital twin of OT for resource simulation
 - Video-assisted training & live surgical streaming for teaching hospitals
 - Integration with billing for automated consumables/implants charging
 - Compliance with surgical registries (e.g., cancer, orthopaedic, cardiac databases)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Procedure charges, surgical packages, implant/prosthetic billing
 - **Internal Transfers:** CSSD → OT, Pharmacy → OT, Biomedical → OT maintenance
 - **External:** Referrals to tertiary centers, outsourced surgeries, implant vendor supply
-

5. Cost & Profit Centres

Cost Centres

- OT consumables (sutures, implants, sterile packs)
- OT staff salaries (surgeons, anaesthetists, nurses, technicians)
- Equipment maintenance & depreciation
- Utilities (power for lights, ventilation, oxygen, suction systems)

Profit Centres

- Surgical procedure revenues
 - High-value implant/prosthetic billing
 - Specialized OT packages (orthopaedics, cardiac, cosmetic)
 - Premium OT services (VIP surgery suites)
-

6. Reporting & Analytics

- OT utilization (per specialty, surgeon, room, time slot)
 - Cancellation & postponement reasons (patient, staff, equipment, emergencies)
 - Average surgery duration & turnover time between cases
 - Implant/consumable usage trends & cost analysis
 - Infection rates (SSI – surgical site infections)
 - Patient outcomes (mortality, morbidity, readmissions)
 - Cost vs revenue per specialty/surgeon
-

7. Visual ERP Flow (Text Representation)

OPERATING THEATRES & PROCEDURES ERP SUBMODULE

PROCUREMENT & SUPPLY

- Surgical Instruments & Equipment
- Implants & Prosthetics
- Consumables & Sterile Supplies
- OT Management Software
- Vendor Contracts (suppliers, servicing, sterilization)

OPERATIONS

- OT Scheduling & Preparation (clearance, booking, resource allocation)
- Intra-Operative Workflow (safety checklist, anaesthesia, notes, implants, video)
- Post-Operative Care (PACU, orders, handovers)
- Infection Control & CSSD (sterilization tracking, audits)

VALUE ADDITION

- OT Utilization Dashboards
- AI Surgery Scheduling
- Digital Twin Simulation
- Surgical Training & Streaming
- Integrated Billing & Registries

SALES & DISTRIBUTION (Including Transfers)

- Direct: Surgery & Implant Billing
- Internal: CSSD, Pharmacy, Biomedical Transfers
- External: Referrals, Outsourced Surgeries, Vendor Supply

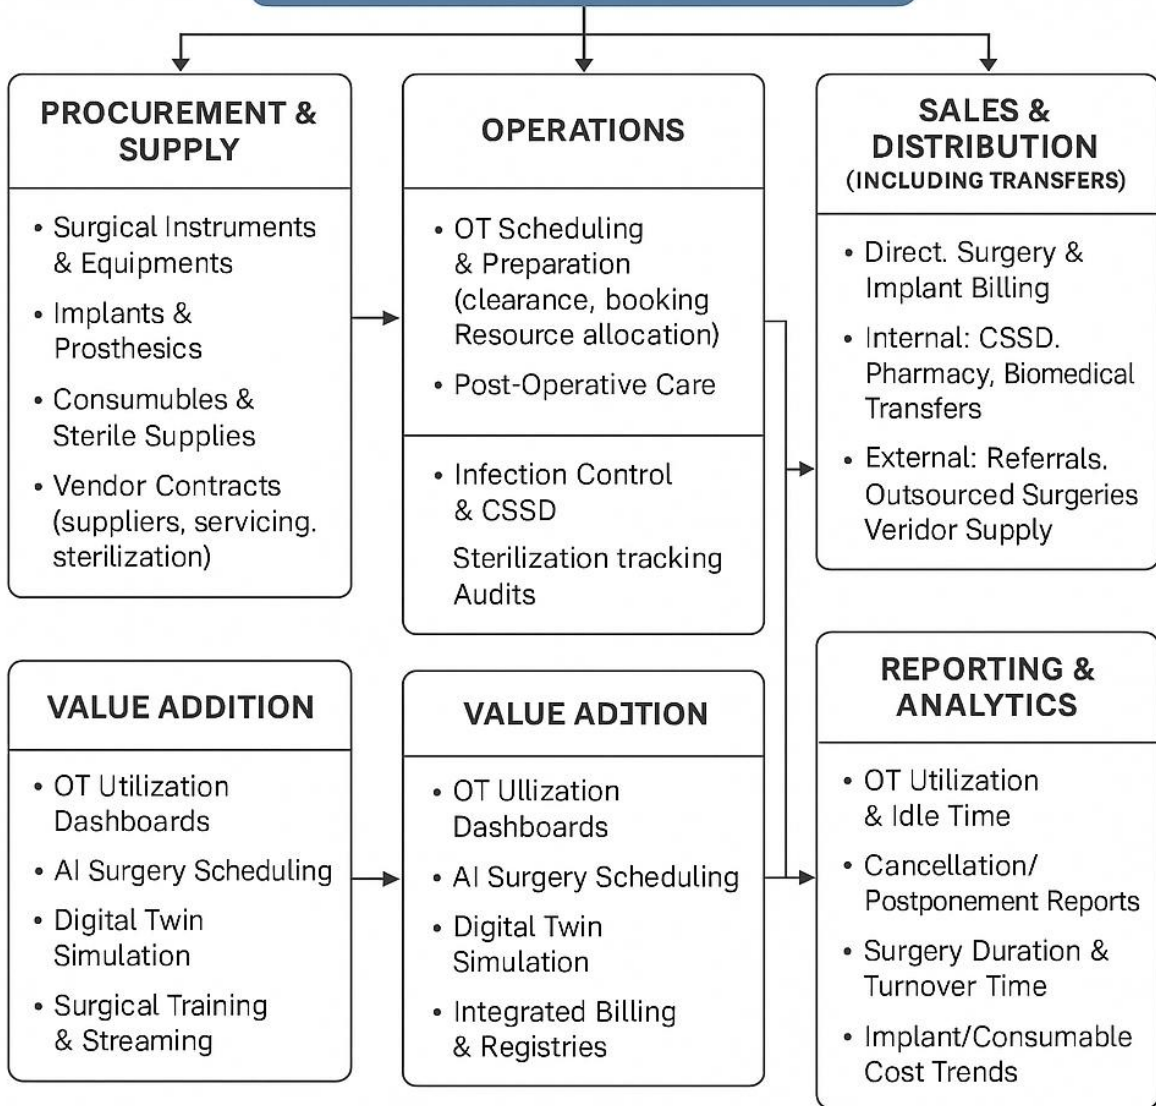

COST & PROFIT CENTRES

- Costs: Consumables, Staff, Equipment, Utilities
- Profits: Procedures, Implants, Packages, Premium OTs

REPORTING & ANALYTICS

- OT Utilization & Idle Time
 - Cancellation/Postponement Reports
 - Surgery Duration & Turnover Time
 - Implant/Consumable Cost Trends
 - Infection Rates (SSI)
 - Patient Outcomes & Specialty Profitability
-

OPERATING THEATRES & PROCES ERP SUBMODULE

Healthcare ERP – Diagnostics (Labs, Imaging & POCT) Submodule

1. Procurement & Supply

- Laboratory equipment (analyzers, centrifuges, microscopes, reagents, consumables)
 - Imaging equipment (X-ray, CT, MRI, ultrasound, PET, PACS servers)
 - POCT devices (glucometers, ECG handhelds, portable ultrasound, rapid kits)
 - Consumables (test tubes, reagents, swabs, culture media)
 - Vendor contracts (equipment suppliers, reagent vendors, maintenance providers)
 - LIS (Laboratory Information System) & RIS/PACS (Radiology Information System / Picture Archiving & Communication System)
-

2. Operations

Laboratory (LIS)

- Test ordering (via CPOE from clinicians or walk-in)
- Sample collection, labelling (barcode/RFID), transport
- Processing (auto-analyzers, manual tests, QC)
- Result entry, verification, release to EHR/patient portal
- External reference lab integration for specialized tests

Imaging (RIS/PACS)

- Imaging requests (linked to EHR/clinician orders)
- Scheduling (urgent vs elective scans, modality allocation)
- Image acquisition (X-ray, CT, MRI, ultrasound)
- Radiologist reporting (structured reports, voice recognition)
- PACS storage, retrieval, and sharing with clinicians

Point-of-Care Testing (POCT)

- Bedside/clinic tests (blood sugar, urine dipsticks, ABG, ECG)
- Device connectivity with LIS/EHR for real-time results
- Quality checks, calibration, and consumable replenishment

Quality & Safety

- Internal & external QC programs (daily, monthly, proficiency testing)
 - Accreditation compliance (ISO 15189, CAP, WHO standards)
 - Infection prevention (safe sample handling, disposal)
-

3. Value Addition

- Auto-validation of results (normal ranges flagged, critical values alerts)
 - AI-driven imaging analysis (tumor detection, stroke triage)
 - Remote reporting/tele-radiology & tele-pathology
 - Smart dashboards for test turnaround time (TAT) & backlog monitoring
 - Integration with national disease registries (HIV, TB, COVID, Cancer)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Lab tests, imaging scans, POCT services billed directly to patients/insurers
 - **Internal Transfers:** Labs/imaging providing results to ER, IPD, OPD, OT
 - **External:** Corporate health screening contracts, outsourced imaging/lab services, public health reporting
-

5. Cost & Profit Centres

Cost Centres

- Lab reagents & consumables
- Imaging equipment maintenance & depreciation
- Staff (lab techs, radiologists, POCT operators)
- LIS/RIS/PACS software licenses & integrations

Profit Centres

- Lab & imaging revenue (OPD/IPD/ER referrals, walk-in patients)
 - Corporate health packages (annual screenings)
 - Specialized diagnostic packages (oncology, cardiology, maternal)
 - Tele-radiology/tele-pathology services
-

6. Reporting & Analytics

- TAT (Turnaround time) by test/modality
- Test volumes by department, patient type, payer

- Imaging utilization per modality (X-ray, CT, MRI)
 - Reagent consumption vs wastage analysis
 - Abnormal/critical result trends (infection surveillance, oncology registry)
 - Profitability by test panel/package
 - Referral patterns (internal vs external)
-

7. Visual ERP Flow (Text Representation)

Healthcare ERP – Pharmacy Submodule

1. Procurement & Supply

- Drug formulary management (essential drug lists, specialty medicines)
 - Vendor contracts (wholesalers, manufacturers, cold-chain suppliers)
 - Procurement approvals (tendering, RFQs, purchase orders)
 - Controlled drug register & compliance (narcotics, psychotropics)
 - Ward stock replenishment systems (auto-reorder, minimum stock levels)
 - Inventory software with barcode/RFID integration
 - Cold chain monitoring (vaccines, biologics)
-

2. Operations

Inpatient Pharmacy

- CPOE integration (doctor orders → pharmacy verification → nurse administration)
- Ward stock supply & top-up cycles
- Medication administration record (linked to EHR)
- Emergency crash cart replenishment

Outpatient Pharmacy

- Prescription dispensing (manual & e-prescriptions)
- Substitutions (generic/brand) with approval tracking
- Retail billing & payment collection
- Patient counselling (dosage, side effects, interactions)

Controlled Drugs Management

- Issue & return workflows (ward/OT requisitions)
- Secure storage & access control (safe, dual sign-off)
- Regulatory reporting (daily/weekly narcotics reports)

Clinical Pharmacy Support

- Drug interaction alerts & therapeutic substitution
- Antibiotic stewardship programs (ASP)
- Adverse drug reaction (ADR) reporting & monitoring

- Pharmacist participation in ward rounds

Inventory & Stock Control

- FIFO/FEFO inventory handling
 - Expiry management & recalls
 - Batch/lot tracking for traceability
 - Real-time stock visibility (central + ward-level)
-

3. Value Addition

- Mobile prescription refills & home delivery integration
 - AI-driven stock forecasting (consumption trends, seasonality)
 - E-pharmacy integration (corporate partners, insurance tie-ins)
 - Patient adherence tracking (SMS reminders, pill-box scans)
 - Revenue from wellness/OTC product lines (vitamins, supplements)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Prescription & OTC sales (OPD, retail pharmacy, wellness products)
 - **Internal Transfers:** Ward stock supply, OT kits, ICU/emergency crash carts
 - **External:** Corporate packages, public health program drug supplies (HIV, TB, Vaccines)
-

5. Cost & Profit Centres

Cost Centres

- Procurement of drugs & consumables
- Storage & cold chain logistics
- Pharmacy staff wages
- Licensing & compliance costs

Profit Centres

- Inpatient & outpatient prescription revenues
 - OTC/wellness product sales
 - Corporate health packages (drug bundles, vaccines)
 - Insurance reimbursements
-

6. Reporting & Analytics

- Pharmacy revenue by outlet (IPD, OPD, retail)
 - Drug consumption trends (by department, diagnosis, season)
 - Controlled drug compliance reports
 - Stock expiry & wastage analysis
 - Drug interaction & ADR monitoring trends
 - Profitability by product line (prescriptions vs OTC)
-

7. Visual ERP Flow (Text Representation)

□ Clinical Support Services ERP Submodule

(CSSD, Physiotherapy/Rehabilitation, Nutrition & Dietetics)

1. Procurement & Supply

- CSSD sterilization equipment (autoclaves, ETO sterilizers, ultrasonic cleaners)
 - Physiotherapy equipment (treadmills, therapy bands, ultrasound therapy, electrotherapy machines)
 - Rehab supplies (wheelchairs, walking aids, exercise mats)
 - Nutrition & dietetics supplies (meal ingredients, supplements, therapeutic formulas)
 - Consumables (sterile wraps, disinfectants, gloves, gowns, mobility aids)
 - Software systems (CSSD tracking, physiotherapy scheduling, diet planning)
 - Vendor contracts (rehab device suppliers, food suppliers, supplement providers)
-

2. Operations

CSSD (Central Sterile Services Department)

- Instrument receipt (from OT, wards, clinics)
- Cleaning, disinfection, packaging
- Sterilization cycles (autoclave, ETO, plasma, dry heat)
- Tracking via barcodes/RFID for traceability
- Dispatch of sterile instruments back to OT/wards
- Monitoring of sterility assurance (biological indicators, process audits)

Physiotherapy & Rehabilitation

- Patient referrals (post-surgery, chronic disease, sports injuries)
- Therapy scheduling (sessions, therapists, equipment booking)
- Custom therapy plans (mobility, strength, pain management)
- Progress tracking & outcomes (session notes, functional scales)
- Home exercise programs & tele-rehab support

Nutrition & Dietetics

- Clinical nutrition assessments (BMI, labs, dietary recalls)
- Diet prescriptions (therapeutic diets: diabetic, renal, cardiac, pediatric)
- Meal planning (hospital kitchen integration, diet sheets for wards)
- Specialized feeds (enteral, parenteral nutrition)

- Outpatient nutrition counselling & wellness programs
-

3. Value Addition

- CSSD dashboards for instrument turnaround time (TAT)
 - Zero-infection traceability via instrument-level tracking
 - AI-powered physiotherapy rehab plans (personalized based on progress)
 - Wearables integration for home monitoring (steps, mobility, vitals)
 - Mobile apps for diet tracking & adherence
 - Wellness packages (nutrition + physiotherapy + lifestyle coaching)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Outpatient physiotherapy sessions, nutrition counselling, wellness packages
 - **Internal Transfers:** CSSD supplies → OT, wards; Dietetics → inpatients/wards; Rehab → inpatient recovery units
 - **External:** Rehab equipment rental/sales, nutrition program tie-ups, corporate wellness packages
-

5. Cost & Profit Centres

Cost Centres

- CSSD operations (equipment, sterilization consumables, staff)
- Physiotherapy equipment & therapist wages
- Dietetics (kitchen supplies, supplements, dietitians)

Profit Centres

- Outpatient physiotherapy & rehab sessions
 - Nutrition & diet counselling packages
 - Corporate wellness programs
 - Specialized diets & supplement sales
-

6. Reporting & Analytics

- CSSD: sterilization cycle compliance, TAT, instrument loss/damage rates
- Physiotherapy: patient outcomes, session utilization, therapist productivity
- Dietetics: meal plan accuracy, diet compliance rates, supplement usage

- Financial: revenue by support service line (physio, nutrition, CSSD recovery)
 - Quality: infection rates linked to sterilization, patient satisfaction in support services
-

7. Visual ERP Flow (Text Representation)

Healthcare ERP – Ambulance & Transfers Submodule

1. Procurement & Supply

- Ambulances (BLS, ALS, ICU-on-wheels, neonatal transport units)
 - Dispatch & GPS tracking systems
 - Medical equipment (defibrillators, ventilators, suction, stretchers, oxygen systems)
 - Consumables (PPE, first aid kits, IV supplies, emergency drugs)
 - Communication devices (two-way radios, mobile tablets for EMTs)
 - Vendor contracts (fleet leasing, fuel, outsourced ambulance providers)
-

2. Operations

Dispatch & Scheduling

- Call center integration (emergency numbers, hospital switchboards)
- GPS-enabled dispatch (nearest available ambulance allocation)
- Priority coding (emergency, urgent, routine transfer)
- Integration with ER dashboard (ETA updates)

Onsite & En-route Care

- EMT/paramedic documentation (vitals, interventions, medications)
- Real-time data streaming to ER (telemetry, ECG, patient history)
- Secure patient transport (stretchers, immobilization, infection control)

Transfers & Handover

- Inter-facility transfers (to higher-level care, tertiary hospitals, rehab)
- Intra-facility transfers (ER → OT, OT → ICU, ICU → ward)
- Digital handover notes to receiving clinicians
- Integration with bed management system

Fleet & Staff Management

- Driver/EMT rostering & certification tracking
- Preventive maintenance schedules (vehicle & medical equipment)

- Fuel consumption, mileage, downtime reporting
-

3. Value Addition

- AI-driven dispatch optimization (traffic, distance, availability)
 - Mobile apps for patients/corporates (live tracking, ETA notifications)
 - Integration with public emergency systems (police, fire, disaster response)
 - Ambulance-as-a-service model (corporate tie-ups, insurance)
 - Smart ambulance with IoT-connected medical devices
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Ambulance service billing (emergency, transfers, corporate packages)
 - **Internal Transfers:** Within hospital (ER ↔ OT, OT ↔ ICU, ICU ↔ ward)
 - **External:** Corporate contracts, insurance reimbursement, outsourced emergency coverage
-

5. Cost & Profit Centres

Cost Centres

- Ambulance fleet acquisition/lease
- Fuel & maintenance
- EMT & driver wages
- Communication & dispatch systems
- Licensing & insurance

Profit Centres

- Emergency ambulance billing
 - Inter-facility transfer revenue
 - Corporate/insurance partnerships
 - Premium services (air ambulance, neonatal transport, VIP coverage)
-

6. Reporting & Analytics

- Response times (dispatch to arrival, ER handover)
- Ambulance utilization rates (active vs idle fleet)
- Fleet maintenance costs vs downtime

- Patient outcomes linked to ambulance response (survival, stabilization)
 - Revenue by ambulance type (BLS, ALS, ICU)
 - Corporate/insurance package profitability
-

7. Visual ERP Flow (Text Representation)

AMBULANCE & TRANSFERS ERP SUBMODULE

PROCUREMENT & SUPPLY

- Ambulances (BLS, ALS, ICU, Neonatal)
- Dispatch & GPS Systems
- Medical Equipment & Consumables
- Communication Devices
- Vendor Contracts (fleet, fuel, outsourced providers)

Education ERP – Schools, Colleges & Universities

1. Procurement & Supply

- Classroom resources (desks, smartboards, projectors, lab equipment)
 - Learning platforms (LMS, e-library, virtual classrooms, exam portals)
 - IT infrastructure (servers, student devices, biometric attendance systems)
 - Books & study materials (digital + physical)
 - Vendor contracts (publishers, e-learning providers, transport contractors, cafeteria vendors)
 - Facilities procurement (sports gear, hostel furniture, maintenance supplies)
-

2. Operations

Admissions & Enrollment

- Online applications, entrance tests, merit lists
- Student records & ID creation
- Fee deposits & scholarships management
- Seat allocation (class/department/hostel)

Academics & Learning

- Timetable generation & course scheduling
- Classroom management (subjects, teachers, batches)
- LMS integration (assignments, e-learning, video lectures)
- Examinations (online/offline, proctoring, grading, transcripts)
- Research project management (for universities)

Attendance & Discipline

- Biometric or RFID student/staff attendance
- Absentee & latecomer alerts (SMS/email to parents)
- Disciplinary case management

Hostels & Accommodation

- Hostel allocation, occupancy tracking
- Mess/cafeteria meal plans
- Maintenance requests & approvals

Transport Management

- Bus routes, GPS tracking, driver rostering
- Student safety monitoring (boarding/deboarding alerts)
- Transport fee billing

Staff & Faculty Management

- Recruitment, onboarding, payroll, and workload distribution
 - Faculty appraisal systems
 - Research & publication tracking
-

3. Value Addition

- Parent/student portals (grades, attendance, fee payment, communication)
 - AI-driven personalized learning paths
 - Career guidance & placement cell integration
 - Alumni networks & fundraising portals
 - E-learning & MOOC integrations (Coursera, edX, Khan Academy)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Tuition fees, hostel charges, transport fees, cafeteria sales
 - **Internal Transfers:** Departmental budget allocations (faculty, labs, hostels, sports)
 - **External:** Scholarships & grants (government, NGOs, corporates), research partnerships
-

5. Cost & Profit Centres

Cost Centres

- Faculty salaries, IT licenses, maintenance, utilities, library subscriptions
- Hostel & transport operations
- Examination & certification costs

Profit Centres

- Tuition & course fees

- Hostel & cafeteria revenue
- Research grants & consultancy projects
- Alumni donations, endowments, corporate sponsorships

6. Reporting & Analytics

- Enrollment trends (by grade, course, gender, region)
 - Student performance dashboards (grades, progression, dropout risk)
 - Faculty productivity & appraisal reports
 - Hostel occupancy, transport utilization, cafeteria usage
 - Financial dashboards (revenue vs costs, grant utilization)
 - Placement statistics (jobs, internships, alumni engagement)
-

7. Visual ERP Flow (Text Representation)

Retail & E-commerce ERP Module

1. Procurement & Supply

- Supplier management (contracts, catalogs, pricing agreements)
 - Purchase requisitions, approvals & automated ordering
 - Inventory replenishment (based on sales & demand forecasting)
 - Vendor compliance (delivery SLAs, returns, recalls)
 - EDI (Electronic Data Interchange) for supplier integrations
 - Warehousing & logistics partnerships (3PL, courier services)
-

2. Operations

Inventory & Warehousing

- Stock management (FIFO/FEFO, batch/lot tracking, barcodes, RFID)
- Multi-warehouse and multi-store visibility
- Automated reordering & safety stock triggers
- Returns management (customer & vendor returns)

Point of Sale (POS)

- Billing (cash, card, mobile wallets, loyalty points)
- Promotions & discounts management
- Sales audit & cashier reconciliation
- Customer profiling at POS

E-commerce

- Webshop & mobile app integration (catalog, cart, checkout)
- Omni-channel orders (buy online, pick up in-store – BOPIS)
- Online payment gateways & fraud checks
- Returns & refunds workflow

Customer Service

- CRM for loyalty programs, gift cards, vouchers
- Customer complaints & resolution workflow
- Chatbots & call center integration

Logistics & Distribution

- Order fulfillment (warehouse → customer or store pickup)
 - Courier tracking & last-mile delivery monitoring
 - Internal transfers (warehouse ↔ stores, inter-store stock transfers)
-

3. Value Addition

- AI-driven demand forecasting & pricing optimization
 - Personalized promotions & product recommendations
 - Integrated loyalty & rewards systems
 - Omni-channel visibility (store + online + mobile in sync)
 - Integration with social commerce (Facebook, Instagram shops, TikTok)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** In-store sales, e-commerce orders, wholesale orders
 - **Internal Transfers:** Warehouse ↔ store, store ↔ store rebalancing
 - **External:** Marketplace integrations (Amazon, eBay, Jumia), corporate sales, B2B supply
-

5. Cost & Profit Centres

Cost Centres

- Procurement & logistics costs
- Store operations (rent, utilities, staff wages)
- IT systems (POS, ERP, e-commerce platforms)
- Marketing & promotions

Profit Centres

- In-store & online retail sales
 - Wholesale & corporate accounts
 - Private label products
 - Value-added services (gift wrapping, delivery charges, warranties)
-

6. Reporting & Analytics

- Sales by channel (in-store, online, wholesale)

- Top-performing products & categories
- Inventory turnover & stock-out analysis
- Customer demographics & loyalty program ROI
- Promotion effectiveness & campaign ROI
- Gross margin, net profit, and contribution by store/channel
- Forecast vs actual sales performance

7. Visual ERP Flow (Text Representation)

RETAIL & E-COMMERCE ERP MODULE

PROCUREMENT & SUPPLY

- Supplier Management & Contracts
- Purchase Requisitions & Approvals
- Automated Inventory Replenishment
- Vendor Compliance & EDI
- Warehousing & Logistics Partnerships

OPERATIONS

- Inventory & Warehousing (multi-store, barcodes, returns)
- POS (billing, promos, cashier reconciliation, profiles)
- E-commerce (catalog, checkout, BOPIS, payments, refunds)
- Customer Service (CRM, loyalty, chatbots, call center)
- Logistics (fulfillment, courier, transfers)

VALUE ADDITION

- AI Demand Forecasting & Pricing
- Personalized Promotions
- Omni-channel Visibility
- Loyalty & Rewards
- Social Commerce Integrations

SALES & DISTRIBUTION (Including Transfers)

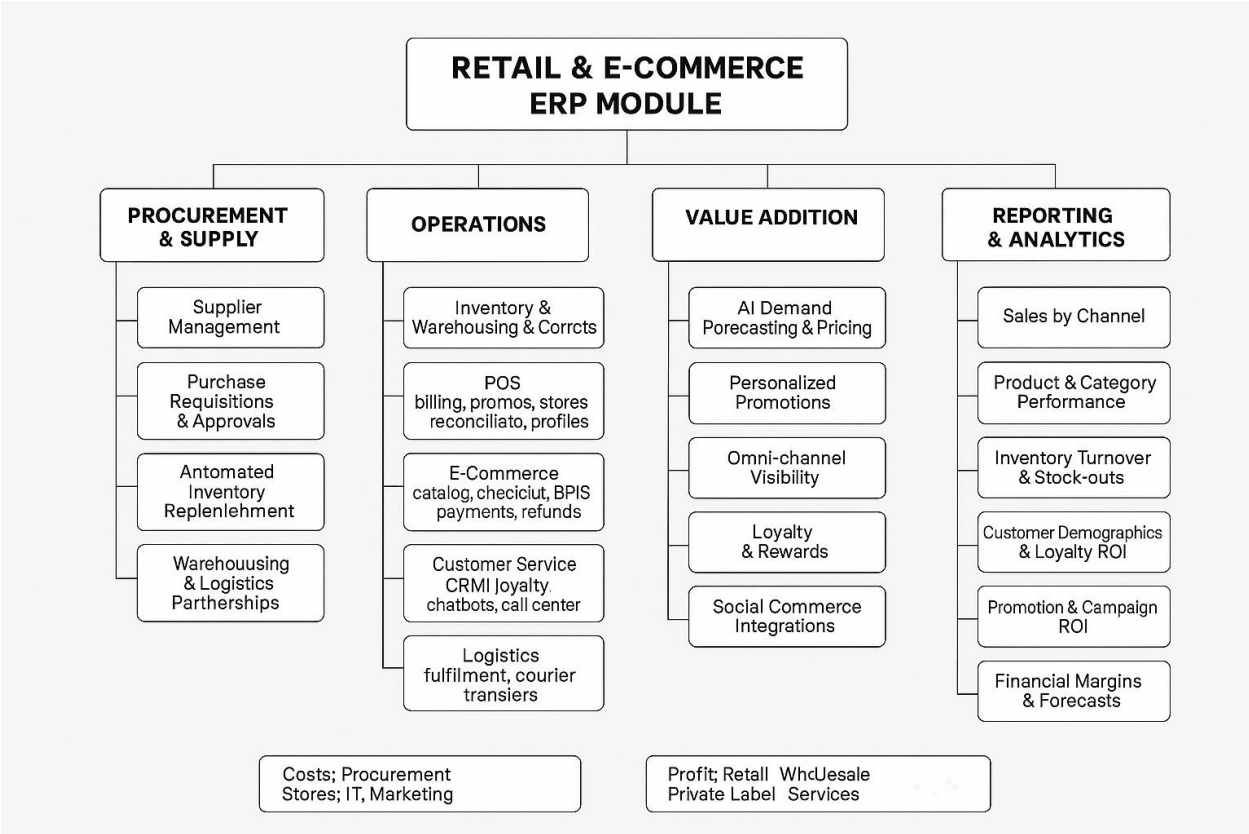

- Direct: In-store, Online, Wholesale
- Internal: Warehouse↔Store, Store↔Store

□ Small-Scale Marketeers ERP Module

1. Procurement & Supply

- Supplier management (farmers, wholesalers, middlemen)
 - Bulk purchasing coordination (shared transport, cooperatives)
 - Inventory tracking (perishable & non-perishable goods)
 - Vendor contracts (local suppliers, credit purchases)
 - Cash-and-carry supply models
-

2. Operations

Sales Management

- Daily cash sales logging (mobile POS or paper-based digitized later)
- Credit sales & customer IOU tracking
- Dynamic pricing (based on seasonality, supply & demand)

Inventory & Stock Control

- Small stock system (manual/mobile entries)
- Expiry date monitoring for perishables
- Quick replenishment alerts (low stock SMS reminders)

Market Stall/Shop Management

- Stall allocation & fee payments (integration with local council systems)
- Multi-stall or cooperative management (grouped reporting)
- Mobility support (pushcart, mobile shop record-keeping)

Customer Engagement

- Loyalty points (stamp cards, SMS-based rewards)
 - Discount & bundle offers
 - Customer feedback collection
-

3. Value Addition

- Mobile ERP app (offline-first, supports USSD/SMS for low-tech users)
 - Micro-credit & financing integration (local cooperatives, mobile money lenders)
 - Digital wallets & mobile money payments
 - Bulk-purchasing cooperatives with profit-sharing
 - Basic analytics (daily profit, most sold products, wastage analysis)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Retail sales at stalls, kiosks, pushcarts, small shops
 - **Internal Transfers:** Stock movement between stalls/branches
 - **External:** Supply to larger supermarkets, schools, restaurants
-

5. Cost & Profit Centres

Cost Centres

- Stall/shop rental or council fees
- Procurement of stock (farm produce, goods from wholesalers)
- Transport & storage
- Small staff wages (if any)

Profit Centres

- Daily retail sales (cash & credit)
 - Wholesale mini-contracts (schools, restaurants, households)
 - Cooperative profit-sharing pools
-

6. Reporting & Analytics

- Daily/weekly sales summaries
 - Profit vs expenses reports
 - Stock wastage & expiry losses
 - Best-selling products & customer demand trends
 - Credit/IOU tracking & repayment rates
 - Council fee compliance reports
-

7. Visual ERP Flow (Text Representation)

SMALL-SCALE MARKETEERS ERP MODULE

PROCUREMENT & SUPPLY

- Supplier Mgmt (farmers, wholesalers)
- Bulk Purchasing & Cooperatives
- Inventory Tracking (perishables/non-perishables)
- Vendor Contracts & Credit Purchases

OPERATIONS

- Sales Mgmt (cash, credit, dynamic pricing)
- Inventory Control (low-stock alerts, expiry monitoring)
- Stall/Shop Mgmt (stall fees, multi-stall tracking, mobile stalls)
- Customer Engagement (loyalty, discounts, feedback)

VALUE ADDITION

- Mobile ERP App (offline-first, USSD/SMS support)
- Micro-Credit & Mobile Money Integration
- Bulk Purchasing Cooperatives
- Basic Profit & Wastage Analytics

SALES & DISTRIBUTION (Including Transfers)

- Direct: Stall/Shop Sales
- Internal: Stock Transfers Between Stalls/Branches
- External: Supply to Supermarkets, Schools, Restaurants

COST & PROFIT CENTRES

- Costs: Stall Fees, Stock Procurement, Transport, Wages
- Profits: Retail Sales, Wholesale Deals, Cooperative Shares

REPORTING & ANALYTICS

- Sales Summaries
 - Profit vs Expenses
 - Wastage & Expiry Losses
 - Best-Selling Products
 - Credit/IOU Reports
 - Council Fee Compliance
-

SMALL-SCALE MARKETEERS ERP MODULE

PROCUREMENT & SUPPLY

- Suppller Management (farmers, whotesalers)
- Bulk Purchasing & Cooperatives
- Inventory Tracking (perishables/non-perishables)
- Vendor Contracts & Credit Purchases

OPERATIONS

- Sales Mgmt (cash, credit; Dynamilc pricing)
- Inventory Control (Expiry monitoring)
- Stall/Shop Mgmt (Loyalty, Discounts, Feedback)

OPERATIONS

- Sales Mgmt (cash, credit, Dynamic Prricing)
- Inventory Control (Low-Stock alerts)
- Expiry Monitoring
- Customer Engagement (Loyalty, Discounts, Feedback)

VALUE ADDITION

- Mobile ERP App (offline-first: USSD/SMS support)
- Micro-Credit & Mobile Money Integration
- Bulk Purchasing Cooperatives

COST & PROFIT CENTRES

- Costs: Stall Fees
- Stock Procurement
- Transport, Wages

SALES & DISTRIBUTION (Including Transfers)

Construction & Real Estate ERP Module

1. Procurement & Supply

- Building materials procurement (cement, steel, timber, electrical, plumbing)
 - Equipment & machinery rentals/purchases (cranes, mixers, trucks)
 - Contractor & subcontractor management (agreements, SLAs)
 - Land acquisition contracts & legal documents
 - Vendor contracts (architects, engineers, surveyors, facility service providers)
 - E-procurement workflows (RFQs, bids, tendering, approvals)
-

2. Operations

Project & Construction Management

- Project planning (Gantt charts, milestones, cost estimation)
- Task allocation (engineers, site supervisors, labor teams)
- Resource allocation (equipment, materials, manpower)
- Site progress tracking & field data collection (mobile apps, drones)
- Safety compliance logs (PPE usage, incident reporting)

Real Estate Sales & Development

- Property unit management (plots, flats, houses, commercial spaces)
- Pricing, booking, and reservation systems
- Customer contracts & documentation
- Payment plans (installments, mortgages, lease-to-own)

Rentals & Facilities Management

- Lease agreements (short-term, long-term)
- Tenant management (records, billing, complaints, renewals)
- Service charges & utility billing (electricity, water, cleaning)
- Maintenance requests & work order management

Back Office (Finance, HR, Legal)

- Payroll for construction workers & staff
- Legal case/document tracking (land disputes, contracts)

- Budget control (project vs actual cost monitoring)
 - Insurance & compliance management
-

3. Value Addition

- BIM (Building Information Modeling) integration for planning
 - IoT-based smart buildings (energy, water, access control)
 - AI-driven cost estimation & project scheduling
 - Digital twin of properties for virtual tours
 - CRM for property buyers (leads, sales funnel, after-sales service)
 - Mobile app for tenants (rent payment, maintenance requests)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Land sales, property unit sales, rental income, service charges
 - **Internal Transfers:** Project costs allocated to different developments or branches
 - **External:** Partnerships with real estate agents, banks (mortgages), facility management companies
-

5. Cost & Profit Centres

Cost Centres

- Land acquisition & permits
- Construction materials & labor costs
- Equipment rentals & maintenance
- Utilities & facilities expenses
- Marketing & sales commissions

Profit Centres

- Land & property sales revenue
 - Rental income & lease renewals
 - Facility service fees (utilities, maintenance, cleaning)
 - Smart building technology packages
 - Mortgage/finance partnerships
-

6. Reporting & Analytics

- Project progress dashboards (time vs budget vs quality)
 - Construction cost breakdowns & variance analysis
 - Property sales pipeline (inquiry → booking → sale → handover)
 - Occupancy & rental yield reports
 - Facilities usage & maintenance cost reports
 - ROI per development project
 - Legal compliance & risk dashboards
-

Construction & Real Estate ERP Module

Transport & Travel ERP Module

(Bus/coach companies, airlines/charters, tour operators, car rentals, and multi-modal logistics/tourism groups.)

1) Procurement & Supply

- Fleet acquisition/lease (buses, coaches, minibuses, aircraft/charters, vans, cars)
 - Spares & consumables (tires, lubricants, avionics parts, seats, linens)
 - Ground equipment (ticketing kiosks, check-in desks, handheld scanners)
 - Fuel & into-plane services; depot storage tanks
 - Uniforms & PPE (drivers, crew, ground staff)
 - Vendor contracts (maintenance/MRO, catering, cleaning, security)
 - Software & integrations (GDS/OTA, DCS, RMS, CRM, GPS/telematics)
-

2) Operations

Network & Route Planning

- Route design, timetables, slots/permits, stop/terminal planning
- Capacity planning (vehicle/aircraft assignment, seat maps)

Reservations, Ticketing & DCS

- Multi-channel sales (web, app, counters, agents, OTAs/GDS)
- Seat inventory, dynamic pricing, ancillary sales (baggage, meals, Wi-Fi)
- Check-in, boarding, manifesting; barcoded/QR/mobile tickets

Day-of-Operations Control

- Dispatch center, real-time vehicle/aircraft tracking
- Irregular operations (delays, diversions, cancellations), customer comms & reaccommodation
- Turnaround management (gate/bay assignment, cleaning, fueling)

Fleet Maintenance (MRO/Workshops)

- PM schedules, work orders, spares reservations
- Airworthiness/roadworthiness checks, inspection logs

- Breakdown handling, AOG/roadside support

Crew & Duty Scheduling

- Rosters, fatigue rules, qualifications/currency tracking
- Timesheets, per-diems, hoteling & transport for crew

Baggage/Cargo & Logistics

- Baggage acceptance, tracking, exception handling
- Cargo booking, waybills, customs & dangerous goods
- Last-mile shuttles and interline transfers

Tours & Packages (for tourism operators)

- Itinerary building (transport + hotel + excursions)
- Guide assignments, park permits, attraction tickets

3) Value Addition

- Revenue management (RMS) with demand forecasting & dynamic pricing
- Ancillary retail (extra legroom, lounge, meals, insurance, rentals)
- Real-time passenger info & proactive disruption handling
- Loyalty/FFP with partners (airlines, hotels, card issuers)
- Sustainability: eco-driving programs, SAF/offsets, route optimization

4) Sales & Distribution (Including Transfers)

- **Direct:** Web/app, call center, ticket offices, corporate contracts
- **External:** OTAs, GDS, consolidators, travel agents; interline/codeshare
- **Internal Transfers:** Fleet/crew/services allocated to subsidiaries, tours, or charter divisions; station-to-station stock transfers (meal packs, spares)

5) Cost & Profit Centres

Cost Centres

- Fuel, crew wages, maintenance/MRO, leases/finance, station fees
- Distribution costs (GDS/OTA commissions), IT licenses, insurance
- Catering, ground handling, passenger compensation (IRROPS)

Profit Centres

- Passenger ticket revenue (by route, cabin/class)
 - Ancillary revenue (bags, seats, F&B, Wi-Fi, insurance)
 - Cargo/logistics revenue
 - Charters, group travel, tour packages
 - Loyalty/affinity partnerships
-

6) Reporting & Analytics

- Load factor, yield, RASK/CASK; route profitability
 - On-time performance (OTP), completion, missed connections
 - Maintenance KPIs (MTBF/MTTR, deferred defects, compliance)
 - Crew productivity & overtime
 - Sales by channel, conversion, commission costs
 - Loyalty KPIs (enrollments, accrual/redemption, breakage)
 - Sustainability: fuel burn per seat-km, emissions reports
-

7) Compliance & Safety

- Regulatory (CAA/RSA/DoT), safety management system (SMS)
 - Licenses/permits, audits, incident & occurrence reporting
 - Dangerous goods, customs/immigration, PCI/GDPR for data
-

8) Visual ERP Flow (Text Representation)

TRANSPORT & TRAVEL ERP MODULE

⚙️ Manufacturing ERP Module

(Discrete, process, and mixed-mode manufacturing — from product design to delivery.)

1) Procurement & Supply

- Supplier & contract management (RFQ/RFP, SLAs, audits)
 - Raw materials & components (BOM-linked purchasing)
 - Indirect/MRO purchasing (spares, tooling, PPE)
 - Inbound logistics (ASN, dock scheduling, QC on receipt)
 - Vendor portals (orders, invoicing, scorecards)
-

2) Operations

Product & Engineering

- Item master, revisions, Document Management (DMS)
- BOMs (single-/multi-level), routings, work instructions
- Engineering Change Management (ECN/ECO)

Planning

- Demand planning (forecast, sales orders, CPFR)
- MPS/MRP/DRP (capacity & materials planning)
- Finite scheduling, sequence optimization, constraint mgmt

Production / Shop Floor

- Work orders (make-to-stock, make-to-order, ETO/CTO)
- MES integration (machine data, OEE, downtime codes)
- Labor tracking, Kanban, JIT, cellular manufacturing

Quality

- Incoming/In-process/Final QC, AQL sampling
- SPC, nonconformance (NCR), CAPA workflows
- Traceability (lot/batch/serial), COA/COC

Maintenance (TPM/EAM)

- Preventive & predictive maintenance, calibration
- Spares inventory, work orders, MTBF/MTTR tracking

EHS & Compliance

- Safety incidents, permits, hazardous materials (MSDS)
- Environmental monitoring (emissions, waste)

Warehousing & Internal Logistics

- WMS: put-away, picking, wave/batch, cycle counts
 - Barcodes/RFID, AGV/AMR integration, supermarket staging
 - Inter-plant/line transfers & kitting
-

3) Value Addition

- Design-to-cost & manufacturability (DFM/DFA)
 - Digital twin & simulation; IIoT/telematics for real-time insights
 - Additive manufacturing/prototyping cells
 - Vendor-managed inventory (VMI) & consignment stock
 - Energy optimization & carbon accounting
-

4) Sales & Distribution (Including Transfers)

- **Direct:** Finished goods to distributors/customers, e-commerce/B2B portals
 - **Internal Transfers:** Plant ↔ plant, warehouse ↔ lines, rework loops
 - **External:** 3PL/4PL, export documentation, global trade compliance
-

5) Cost & Profit Centres

Cost Centres

- Direct materials & labor, overhead absorption
- Machine time, utilities, maintenance, scrap/rework
- Quality costs (appraisal, prevention, failure)

Profit Centres

- Product lines/SKUs, custom/ETO projects, aftermarket & spares
- Premium service contracts (maintenance, calibration)

6) Reporting & Analytics

- OEE, throughput, cycle time, takt vs plan adherence
 - Plan attainment, schedule stability, capacity utilization
 - Costed BOMs, standard vs actual cost variances (material, labor, overhead)
 - Yield, scrap, rework, FPY (first pass yield)
 - On-time in-full (OTIF), order-to-cash cycle
 - Supplier scorecards (OTD, quality, cost)
 - Sustainability: energy per unit, waste & emissions KPIs
-

7) Visual ERP Flow (Text Representation)

MANUFACTURING ERP MODULE

PROCUREMENT & SUPPLY

Here's the **Professional Services ERP Module** (for consultancies, legal, audit, design & advisory firms) fully expanded in text.

Professional Services ERP Module

1. Procurement & Supply

- Office equipment & IT procurement (laptops, servers, software licenses)
 - Vendor management (stationery, utilities, outsourcing partners)
 - Knowledge resource subscriptions (journals, databases, SaaS tools)
 - Professional liability insurance contracts
 - Office leasing/maintenance contracts
-

2. Operations

Client Engagement & CRM

- Lead management (inquiries, referrals, proposals)
- Client database & segmentation (corporate, government, individual)
- Proposal & contract drafting (integrated templates, e-signature)
- Engagement lifecycle tracking (pitch → contract → delivery → renewal)

Project & Case Management

- Project scoping, deliverable definition, timelines
- Task allocation (consultants, lawyers, auditors, designers)
- Time-tracking & timesheets per project/client
- Document & knowledge management (case files, working papers, templates)
- Version control & audit trails

Service Delivery

- Consulting assignments (reports, strategies, designs, presentations)
- Legal case handling (pleadings, filings, hearings)
- Audit engagements (planning, fieldwork, working papers, reports)
- Creative deliverables (design drafts, revisions, approvals)

Billing & Contracts

- Hourly billing, milestone billing, or retainer billing models
- Contract management (renewals, amendments, SLAs)
- Expense reimbursements (travel, lodging, third-party costs)

Human Resources & Skills Tracking

- Consultant/faculty allocation based on expertise
 - Continuous Professional Development (CPD) tracking
 - Performance appraisal linked to client/project outcomes
-

3. Value Addition

- AI-powered proposal drafting & knowledge search
 - Client self-service portals (document sharing, project progress)
 - Benchmarking dashboards (compare client KPIs vs industry)
 - E-discovery for legal firms, audit analytics tools
 - Online collaboration platforms (Teams, Slack, integrated DMS)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Advisory fees, retainers, hourly billing, project-based billing
 - **Internal Transfers:** Shared consultants across practices/branches
 - **External:** Partner collaborations (law firms, auditors, design studios)
-

5. Cost & Profit Centres

Cost Centres

- Staff salaries (consultants, lawyers, auditors, designers)
- Office overheads (rent, utilities, IT licenses)
- Travel & subsistence for projects
- Subcontractor or expert witness fees

Profit Centres

- Advisory/consulting projects
 - Retainer contracts
 - Training & workshops delivered
 - Outsourced services (legal drafting, audit support, design packages)
-

6. Reporting & Analytics

- Utilization rate (billable vs non-billable hours)
 - Revenue per consultant / per service line
 - Client profitability & cost-to-serve analysis
 - Case/project turnaround time metrics
 - Win rate for proposals/tenders
 - Staff performance & CPD compliance reports
-

Financial & Insurance Services ERP Module

1. Procurement & Supply

- IT systems & licenses (core banking, insurance management, CRM, cybersecurity tools)
 - Vendor management (outsourced service providers, call centers, legal firms, brokers)
 - Branch/office infrastructure (ATMs, POS devices, servers, security systems)
 - Partnerships with payment processors, reinsurers, credit bureaus
 - Regulatory compliance subscriptions (AML/KYC, Basel, IFRS, Solvency standards)
-

2. Operations

Banking & Financial Services

- Account management (savings, current, deposits, loans)
- Payments & settlements (mobile money, cards, SWIFT, ACH, RTGS)
- Loan origination & credit scoring (retail, SME, corporate)
- Treasury operations (FX, liquidity, investment portfolios)
- Risk management (market, credit, operational)

Insurance Services

- Policy creation & management (life, health, property, auto, microinsurance)
- Premium billing & collection (recurring, one-time, group policies)
- Claims management (intake, assessment, approval, payout)
- Reinsurance contracts & settlements
- Actuarial & risk modeling

Wealth & Investment Services

- Portfolio management (stocks, bonds, mutual funds, pensions)
- Robo-advisory & AI-assisted investment planning
- Asset-liability management dashboards
- Custody & depository services

Customer Engagement

- Omnichannel CRM (branches, apps, call centers, chatbots)
- KYC/AML onboarding & compliance
- Complaint management & resolution tracking
- Client portals (account statements, policy updates, transaction history)

Back Office & Compliance

- HR & payroll for financial staff
 - Legal case/document tracking (litigation, compliance cases)
 - Audit trails & fraud detection systems
 - Regulator reporting (ZRA, SEC, Central Bank, Insurance Authority)
-

3. Value Addition

- Mobile & digital banking apps
 - Blockchain-based settlements & smart contracts
 - AI-driven fraud detection & credit scoring
 - Usage-based insurance models (telematics, IoT devices)
 - Financial literacy portals for clients
 - Green finance tracking (sustainability-linked loans, ESG reporting)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Loan disbursements, deposit products, insurance premiums, investment portfolios
 - **Internal Transfers:** Inter-branch funds, policy reassignments, internal settlements
 - **External:** Agency/broker networks, correspondent banks, reinsurers, fintech integrations
-

5. Cost & Profit Centres

Cost Centres

- Staff salaries (bankers, underwriters, claims officers, IT staff)
- Technology & infrastructure (data centers, cybersecurity, ATMs)
- Marketing & customer acquisition costs
- Regulatory & compliance costs
- Claims payouts & defaults

Profit Centres

- Loan interest income & fees
- Insurance premiums (net of claims)

- Investment returns (treasury, wealth products)
- Transaction fees (cards, digital payments)
- Advisory & brokerage services

6. Reporting & Analytics

- Financial ratios (ROA, ROE, NPL ratios, solvency margins)
 - Credit risk dashboards (loan defaults, portfolio health)
 - Claims ratios & turnaround times
 - Liquidity & capital adequacy reports
 - Customer profitability & lifetime value (CLV)
 - Fraud detection trends & compliance reports
 - Branch/agent profitability reports
-

ICT & Creative Services ERP Module

(IT companies, software firms, call centers/BPOs, marketing agencies, design/creative studios)

1. Procurement & Supply

- IT hardware & infrastructure (servers, laptops, workstations, networking)
 - Software licenses & SaaS subscriptions (development tools, CRM, design suites, cloud hosting)
 - Vendor management (freelancers, subcontractors, outsourcing partners)
 - Office leasing, internet & telephony services
 - Digital asset libraries & creative stock subscriptions
-

2. Operations

IT & Software Development

- Project lifecycle management (Agile, Scrum, Waterfall workflows)
- Code repositories & version control (Git, DevOps integrations)
- Bug/issue tracking systems
- QA/testing pipelines (manual & automated testing, CI/CD)
- Release management (staging, production, rollback)

Call Centers & BPO Services

- Inbound & outbound call management (IVR, ACD, CTI)
- Workforce management (rosters, agent scheduling, adherence)
- Script management & compliance tracking
- Ticketing & case management (customer queries, complaints, escalations)
- Knowledge base integration & training tools

Marketing Agencies & Creative Studios

- Campaign management (planning, approvals, execution, tracking)
- Content creation workflows (design, copy, video, animation)
- Client briefs & approval cycles
- Digital marketing operations (SEO, SEM, social media, email campaigns)
- Media buying & ad performance tracking

Resource & HR Management

- Time tracking & utilization by project/client
- Skill matrix & resource allocation
- Freelance/contractor onboarding & payments
- Payroll & benefits for creative/tech staff

Finance & Contracts

- Client contract drafting & billing (hourly, milestone, retainer)
 - Expense tracking (licenses, freelancers, campaigns)
 - Revenue recognition per project/client
 - Multi-currency invoicing (global clients)
-

3. Value Addition

- AI-assisted creative tools (design generation, content writing, ad optimization)
 - Automation of workflows (chatbots, RPA for repetitive tasks)
 - Cloud-based collaboration platforms (Slack, MS Teams, Trello, Figma)
 - Advanced analytics dashboards (project profitability, ad ROI, customer sentiment)
 - White-label service offerings (agencies reselling IT or creative solutions)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Project contracts, design packages, marketing retainers, BPO/outsourcing fees
 - **Internal Transfers:** Shared teams/resources between projects/agencies
 - **External:** Partnerships with media houses, ad networks, IT vendors, channel partners
-

5. Cost & Profit Centres

Cost Centres

- Staff & contractor wages
- IT infrastructure & licenses
- Marketing/ad spend (for clients & agency promotion)
- Office space & utilities
- Creative asset subscriptions

Profit Centres

- Software development projects

- Marketing retainers & campaign fees
- BPO & call center contracts
- Creative packages (design, branding, media production)
- SaaS products or white-label services

6. Reporting & Analytics

- Project profitability dashboards
- Resource utilization (staff vs contractors, billable vs non-billable)
- SLA adherence (BPO, IT support, client contracts)
- Campaign performance metrics (CTR, conversions, ROI)
- Customer satisfaction & feedback analytics
- Pipeline & revenue forecasting

7. Visual ERP Flow (Text Representation)

ICT & CREATIVE SERVICES ERP MODULE

⚡🗑️🚰 Utilities & Public Services ERP Module

(Electricity, water, telecoms, waste management, municipal councils)

1. Procurement & Supply

- Utility infrastructure & equipment (transformers, meters, pipes, towers, trucks)
 - IT systems (SCADA, billing platforms, GIS, CRM, ERP)
 - Vendor management (construction contractors, repair service providers)
 - Fuel & consumables (generators, chemicals, spare parts)
 - PPE & safety gear (linemen kits, sanitation staff gear)
 - Public-private partnerships (PPPs, outsourced services)
-

2. Operations

Service Delivery & Infrastructure

- Power generation, transmission & distribution management
- Water treatment, pumping, storage, and pipeline distribution
- Telecom network monitoring (towers, switches, fiber optics)
- Waste collection, recycling, landfill & treatment plant management

Customer Services

- New connections/registrations (power, water, telecom, waste pickup)
- Customer CRM (complaints, service requests, outages)
- Billing (fixed, consumption-based, prepaid/postpaid, subsidies)
- Collections (cash, mobile money, banks, agents)

Maintenance & Field Services

- Preventive maintenance schedules (power lines, pipes, towers)
- Mobile workforce management (crew dispatch, GPS tracking)
- Outage & incident response (fault logging, resolution tracking)
- Asset management (meters, transformers, vehicles, towers)

Regulatory & Compliance

- Tariff & rate regulation (government approvals)
- Environmental compliance (emissions, waste treatment, recycling)
- Safety & incident logging (injuries, accidents, audits)
- Reporting to regulators & councils

Administration

- HR & payroll for utility staff
 - Inventory of spares & consumables
 - Legal & contract management
 - Budgeting & subsidy allocation
-

3. Value Addition

- Smart meters & IoT sensors (real-time consumption monitoring)
 - GIS mapping of networks (fault detection, demand planning)
 - AI-based demand forecasting & outage prediction
 - Renewable energy integration (solar, wind, microgrids)
 - Citizen self-service apps (pay bills, log complaints, track outages)
 - Data-driven policy support for municipal councils
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Utility billing (electricity, water, telecom, sanitation)
 - **Internal Transfers:** Allocations between departments (generation vs distribution, water vs sanitation)
 - **External:** Cross-border power trade, roaming agreements, PPP services
-

5. Cost & Profit Centres

Cost Centres

- Infrastructure investments (plants, towers, pipelines, grids)
- Maintenance & workforce expenses
- Fuel & consumables
- Customer service & billing platforms
- Environmental & compliance costs

Profit Centres

- Utility sales (power, water, telecom services, sanitation fees)

- Infrastructure leasing (fiber leasing, tower sharing, power wheeling)
- Subsidy reimbursements (government grants, municipal allocations)
- Value-added services (internet bundles, recycling sales, waste-to-energy revenue)

6. Reporting & Analytics

- Consumption & demand dashboards (daily/weekly/monthly)
- Outage & downtime metrics
- Revenue collection efficiency
- Non-revenue water/power (losses, theft, leakages)
- Customer satisfaction & complaint resolution stats
- Regulatory compliance dashboards
- Environmental impact & sustainability metrics

7. Visual ERP Flow (Text Representation)

Education & Training Services ERP Module

(Training centers, academies, tutoring programs, skills development, professional certification bodies)

1. Procurement & Supply

- Learning resources (books, e-learning platforms, simulation tools)
 - Classroom/training infrastructure (projectors, smart boards, labs, online classrooms)
 - IT systems (LMS, student portals, exam platforms)
 - Vendor contracts (content providers, certification partners)
 - Facilities procurement (training halls, furniture, catering for workshops)
-

2. Operations

Admissions & Enrollment

- Course catalogs & schedules
- Online/offline enrollment & registration
- Fee payments, scholarships & sponsorships
- Batch allocation & trainer assignments

Learning Delivery

- Classroom & online class scheduling
- E-learning content delivery (videos, quizzes, simulations)
- Practical workshops & labs
- Continuous assessment & feedback collection

Examinations & Certifications

- Exam creation & scheduling (online/offline)
- Automated grading & evaluation
- Certificates & digital badges issuance
- External accreditation body integration

Trainer & Faculty Management

- Trainer recruitment & onboarding
- Time tracking & session logs
- Performance appraisal & feedback from learners
- CPD (Continuous Professional Development) tracking

Student Engagement & Support

- Attendance tracking
 - Learning progress dashboards
 - Discussion forums & peer collaboration
 - Counselling & career guidance services
-

3. Value Addition

- AI-driven adaptive learning paths
 - Mobile learning apps (offline/online)
 - Virtual & augmented reality training modules
 - Industry partnerships for internships/apprenticeships
 - Alumni networks & mentorship platforms
 - Gamified learning & leaderboards
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Course fees, training packages, certification fees
 - **Internal Transfers:** Shared trainers/resources across courses
 - **External:** Partnerships with companies, accreditation bodies, government training programs
-

5. Cost & Profit Centres

Cost Centres

- Trainer/faculty salaries
- Content development & licensing
- IT systems & infrastructure
- Marketing & student acquisition costs
- Facilities & utilities

Profit Centres

- Tuition & certification fees

- Corporate training contracts
 - Sponsored programs (NGO/government/CSR)
 - Alumni donations & fundraising events
-

6. Reporting & Analytics

- Enrollment & course completion rates
 - Student performance dashboards
 - Trainer performance & feedback scores
 - Financial reports (revenue vs costs per program)
 - Placement & career progression statistics
 - Accreditation & compliance reports
-

7. Visual ERP Flow (Text Representation)

Public Administration & Government Services ERP Module

(Government ministries, councils, regulators, development institutions, parastatals)

1. Procurement & Supply

- Public procurement & tendering workflows (RFPs, RFQs, bidding, evaluation)
 - Vendor/contractor registration & compliance checks
 - Asset acquisition (vehicles, IT systems, furniture, infrastructure projects)
 - Public-private partnership contracts (PPP projects, concessions)
 - Regulatory procurement compliance (PPDA Acts, audit requirements)
-

2. Operations

Citizen Services & Administration

- Civil registration (NRCs, birth/death/marriage certificates)
- Licensing & permits (business, land, construction, transport)
- Public service request management (applications, approvals, tracking)
- Grievance redressal portals

Policy, Planning & Development

- National & local planning dashboards (Vision 2030, SDGs alignment)
- CDF & development project tracking
- Budget allocations vs project outcomes
- Program monitoring & evaluation (M&E systems)

Regulatory & Compliance Oversight

- Policy enforcement & compliance checks
- Audit trails & inspector logs
- Legal & statutory document tracking
- Risk & fraud detection dashboards

HR & Payroll for Civil Servants

- Recruitment & onboarding
- Payroll & statutory deductions (PAYE, pensions, NAPSA, NHIMA)
- Performance appraisals & promotions
- Training & capacity building

Finance & Budgeting

- Budget preparation, approval & allocations
- Multi-year public sector accounting (IPSAS, IFRS, GAAP support)
- Grant & donor fund management
- Subsidy & social transfer disbursement tracking

Infrastructure & Facilities Management

- Public works project management (roads, bridges, utilities)
- Asset registry & depreciation (vehicles, offices, equipment)
- Maintenance requests & scheduling

3. Value Addition

- E-Government citizen portals (applications, payments, e-certificates)
- Digital signatures & e-notarization for legal/government docs
- Integration with **GSB (Government Service Bus)** for inter-agency data sharing
- AI-driven policy impact analysis & public finance forecasting
- Blockchain for transparent tendering & contract tracking
- GIS mapping for land management, disaster response, and urban planning

4. Sales & Distribution (Including Transfers)

- **Direct:** Licensing fees, permits, service charges, utility fees, tax collection
- **Internal Transfers:** Fund allocations between ministries/departments/councils
- **External:** Grants, loans, donor funding, PPP revenues

5. Cost & Profit Centres

Cost Centres

- Civil servant wages & pensions
- Infrastructure & public works expenditure
- IT systems & digital transformation costs
- Social services (education, health, subsidies)

- Compliance & audit costs

Profit Centres

- Taxes & levies (income, VAT, property, excise, customs)
- Licensing & permit fees
- PPP project revenues (concessions, tolls)
- Donor funds & grants

6. Reporting & Analytics

- Budget vs expenditure reports
- CDF tracking dashboards
- Tax compliance & collection efficiency
- Service delivery turnaround times
- Audit compliance & fraud detection
- Citizen satisfaction indexes
- National development indicators (Vision 2030, SDGs, GDP growth impact)

7. Visual ERP Flow (Text Representation)

PUBLIC ADMINISTRATION & GOVERNMENT SERVICES ERP MODULE

PROCUREMENT & SUPPLY

PUBLIC ADMINISTRATION & GOVERNMENT SERVICES ERP MODULE

☐☐☐ Citizen Services & Administration ERP Module

1. Procurement & Supply

- ICT systems for e-services (eGov portals, biometric systems, ticketing kiosks)
 - Public service office infrastructure (registries, service centers, mobile vans)
 - Vendor contracts (printing of IDs, card providers, courier delivery of documents)
 - Security equipment (document authentication, fraud detection tools)
 - Partnerships with local councils, ministries, and private service providers
-

2. Operations

Civil Registration & Records

- National ID, birth/death/marriage registration
- Centralized citizen database with biometric integration
- Certificate printing & e-document issuance
- Integration with health (births/deaths), courts (marriages/divorces), and immigration (passports)

Licensing & Permits

- Business licenses (SMEs, shops, industries)
- Construction permits (land use, zoning)
- Vehicle registration & driving licenses
- Event/market/trading permits

Public Service Requests

- Digital application submission (portals, mobile apps, SMS/USSD)
- Service request tracking & status updates
- Appointment scheduling (council offices, registries)
- Escalation workflow for delayed cases

Grievance Redressal & Helpdesk

- Citizen complaint portal (corruption, delays, service denial)

- Case routing to responsible departments
- SLA tracking for complaint resolution
- Feedback collection & citizen satisfaction scoring

Citizen Identity & Authentication

- Biometric authentication (fingerprint, facial, iris)
 - Digital ID wallets
 - E-signature services for government forms
-

3. Value Addition

- One-stop citizen portal (applications, payments, status tracking)
 - Mobile-first access (USSD, apps for rural outreach)
 - Blockchain for secure document verification
 - AI chatbots for FAQs & guided services
 - Multilingual support for inclusivity
 - Integration with national GSB (Government Service Bus) for data sharing
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Licensing fees, permit charges, ID fees, certificate fees
 - **Internal Transfers:** Shared services across ministries/departments (e.g., registry ↔ immigration)
 - **External:** PPP service providers (document printing, courier delivery)
-

5. Cost & Profit Centres

Cost Centres

- Infrastructure costs (registries, ICT systems, biometric kits)
- Staff wages & training
- Printing & logistics costs
- Maintenance of portals & kiosks

Profit Centres

- Licensing & permit revenues
- ID & registration fees
- PPP contracts (shared revenues from service providers)

6. Reporting & Analytics

- Volume of registrations & service requests
 - Revenue from permits, licenses, and IDs
 - SLA adherence (time taken per service)
 - Citizen satisfaction dashboards
 - Fraud detection & duplicate registration alerts
 - Geographic distribution of service access (urban vs rural)
-

7. Visual ERP Flow (Text Representation)

CITIZEN SERVICES & ADMINISTRATION ERP MODULE

PROCUREMENT & SUPPLY

- ICT Systems (portals, biometrics, kiosks)
- Service Centers & Registries
- Vendor Contracts (printing, courier)
- Security & Authentication Tools
- Partnerships (councils, ministries, PPPs)

OPERATIONS

- Civil Registration (IDs, birth/death/marriage, certificates, integration)
- Licensing & Permits (business, construction, vehicles, events)
- Public Service Requests (applications, tracking, appointments, escalations)
- Grievance Redressal (complaints, SLAs, feedback)
- Citizen Authentication (biometrics, digital ID, e-signatures)

VALUE ADDITION

- One-Stop Citizen Portal
- Mobile & Rural Access (apps, USSD)
- Blockchain Document Verification
- AI Chatbots for Services
- Multilingual Interfaces
- GSB Integration for Data Sharing

SALES & DISTRIBUTION (Including Transfers)

- Direct: Fees for IDs, Certificates, Permits, Licenses
- Internal: Shared Services across Ministries
- External: PPP Providers (printing, delivery)

COST & PROFIT CENTRES

- Costs: Infrastructure, Staff, Printing, ICT Maintenance
- Profits: Permit Fees, Licensing, Registrations, PPP Contracts

REPORTING & ANALYTICS

- Service Volume Dashboards
- Revenue from Permits & IDs
- SLA Adherence Metrics
- Citizen Satisfaction Index

- └─ Fraud/Identity Alerts
 - └─ Rural vs Urban Access Reports
-

Policy, Planning & Development ERP Module

(National & local planning, budgets, CDF, and monitoring & evaluation systems)

1. Procurement & Supply

- Planning & data systems (statistical tools, survey platforms, GIS)
 - Consultancy & research services (impact studies, economic modeling)
 - IT infrastructure (servers, cloud analytics, dashboards)
 - Vendor contracts (academic institutions, NGOs, think tanks)
 - Legal & compliance resources (policy frameworks, regulations)
-

2. Operations

Strategic Policy & Planning

- Long-term plans (Vision 2030, SDGs, NDPs)
- Medium-term frameworks (5-year/3-year development plans)
- Sectoral strategies (education, health, agriculture, energy)
- Cross-agency coordination workflows

Budgeting & Allocations

- National budget formulation & approval tracking
- Fund allocations by ministry, sector, region
- CDF (Constituency Development Fund) disbursements
- Donor fund integration & earmarked project allocations

Project & Program Management

- Project lifecycle mgmt (initiation → implementation → closure)
- KPIs & milestones tracking
- Resource assignment & contractor oversight
- Status updates & performance dashboards

Monitoring & Evaluation (M&E)

- Baseline surveys & target-setting
- Periodic progress monitoring (monthly, quarterly, annually)
- Impact evaluation (before/after policy rollout)
- Independent audits & oversight reporting

Policy Review & Feedback

- Public consultations (hearings, online feedback)
 - Impact assessments & lessons learned
 - Policy update cycles & amendments
-

3. Value Addition

- AI-driven policy simulations & forecasting
 - Data visualization dashboards for policymakers & public
 - GIS for regional development planning
 - Blockchain-enabled CDF/project transparency tracking
 - Citizen participation apps (budget voting, feedback tools)
 - Integrated national statistics hub
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Policy reports, published budgets, M&E reports
 - **Internal Transfers:** Budget reallocations between ministries & agencies
 - **External:** Donor funding flows, inter-governmental cooperation projects
-

5. Cost & Profit Centres

Cost Centres

- Research & consultancy fees
- IT systems & data platforms
- Public consultation activities
- Monitoring & audit costs
- Staff salaries & training

Profit Centres

- Donor grants & international development funding
- PPP development projects revenues
- Cost savings from efficient planning & resource allocations

6. Reporting & Analytics

- Budget vs expenditure reports
 - Policy outcome dashboards (SDGs, Vision 2030 indicators)
 - Project completion & delay statistics
 - Regional development comparison dashboards
 - CDF fund tracking & impact analysis
 - Citizen participation metrics
-

7. Visual ERP Flow (Text Representation)

POLICY, PLANNING & DEVELOPMENT ERP MODULE

PROCUREMENT & SUPPLY

- Planning & Data Systems (GIS, surveys, analytics)
- Consultancy & Research Vendors
- IT Infrastructure (dashboards, cloud, servers)
- Vendor Contracts (academia, NGOs, think tanks)
- Legal & Policy Frameworks

OPERATIONS

- Strategic Policy & Planning (long/medium-term, sectoral, coordination)
- Budgeting & Allocations (national budget, CDF, donor funds)
- Project Mgmt (lifecycle, KPIs, contractors, dashboards)
- Monitoring & Evaluation (surveys, progress, impact, audits)
- Policy Review & Feedback (consultations, impact studies, updates)

VALUE ADDITION

- AI Policy Simulations & Forecasting
- Visualization Dashboards
- GIS for Development Planning
- Blockchain Transparency (CDF/projects)
- Citizen Participation Apps
- National Statistics Hub

SALES & DISTRIBUTION (Including Transfers)

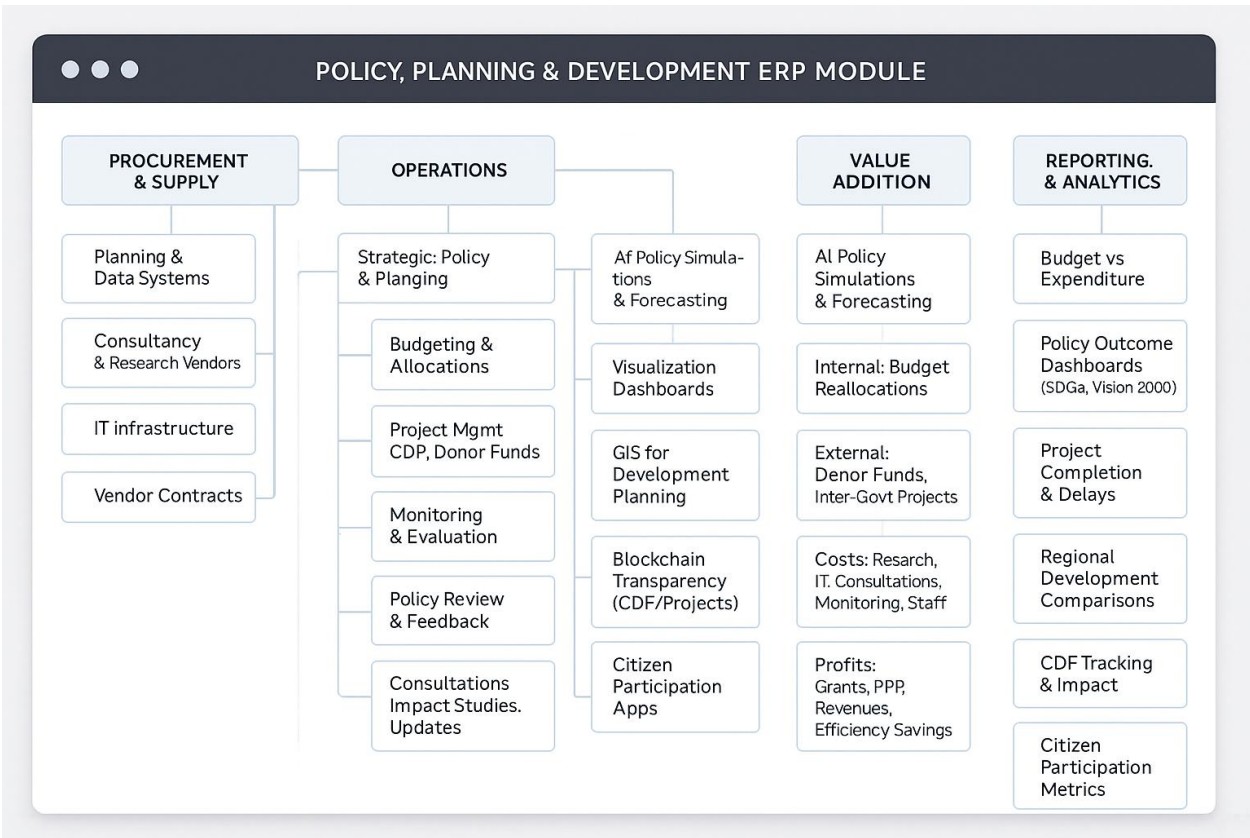

- Direct: Reports, Budgets, M&E Publications
- Internal: Budget Reallocations
- External: Donor Funds, Inter-Govt Projects

COST & PROFIT CENTRES

- Costs: Research, IT, Consultations, Monitoring, Staff
- Profits: Grants, PPP Revenues, Efficiency Savings

REPORTING & ANALYTICS

- Budget vs Expenditure
- Policy Outcome Dashboards (SDGs, Vision 2030)
- Project Completion & Delays
- Regional Development Comparisons
- CDF Tracking & Impact
- Citizen Participation Metrics

⚖️ Regulatory & Compliance Oversight ERP Module

(Audits, inspections, legal compliance, anti-corruption, fraud detection, statutory enforcement)

1. Procurement & Supply

- Compliance monitoring systems (audit software, case management tools)
 - Legal frameworks & statutory reference databases
 - IT infrastructure for inspectors (mobile devices, apps)
 - Vendor contracts (external auditors, legal consultants, compliance trainers)
 - Security & surveillance equipment (CCTV integrations, digital evidence storage)
-

2. Operations

Regulatory Enforcement

- Licensing & permit compliance verification
- Inspections scheduling & field reporting
- Violation recording & penalties issuance
- Blacklisting & suspension workflows

Audit & Oversight

- Internal audit trails (ministries, agencies, councils)
- External audits (donor funds, PPP projects, contractors)
- Real-time expenditure vs budget tracking
- Forensic accounting & fraud detection

Legal & Statutory Compliance

- Case management for legal disputes & regulatory actions
- Document & statutory filing repository
- Compliance calendars (filings, renewals, statutory deadlines)
- Litigation tracking (status, hearings, resolutions)

Risk & Fraud Management

- Fraud alerts (duplicate invoices, ghost workers, procurement manipulation)
- Whistleblower & complaints portal
- Risk scoring dashboards (financial, operational, legal risks)
- Automated anomaly detection using AI/ML

Reporting & Escalation

- Non-compliance escalation workflows
 - Referral to law enforcement or anti-corruption commissions
 - Public compliance dashboards (open data, transparency portals)
-

3. Value Addition

- Blockchain-based audit logs (immutable evidence trails)
 - AI/ML anomaly detection & fraud prediction models
 - Citizen whistleblower mobile apps (anonymous reporting)
 - Inter-agency compliance data exchange (GSB integration)
 - Predictive risk models for proactive interventions
 - Open data platforms for public transparency
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Compliance fees, penalties, fines, licensing revenues
 - **Internal Transfers:** Budget reallocations for compliance & oversight units
 - **External:** International donor funding for governance & anti-corruption projects
-

5. Cost & Profit Centres

Cost Centres

- Inspectorate staff salaries & training
- IT compliance tools & audit platforms
- Legal proceedings & litigation costs
- Investigations & surveillance expenses
- Public awareness & compliance campaigns

Profit Centres

- Licensing & compliance fee revenues
- Penalties & fines collected
- Donor funding for governance reforms

- PPP-funded compliance audits

6. Reporting & Analytics

- Audit completion & compliance rates
 - Number of inspections vs violations detected
 - Penalty & fine collection reports
 - Fraud detection & case closure rates
 - Regulatory compliance heatmaps (sectors, regions)
 - Transparency & governance scorecards
-

7. Visual ERP Flow (Text Representation)

HR & Payroll for Civil Servants ERP Module

1. Procurement & Supply

- HRM systems (civil service databases, e-recruitment portals)
 - Payroll software with statutory compliance (PAYE, pensions, NAPSA, NHIMA)
 - Biometric attendance & access systems
 - Training & capacity-building providers
 - Vendor contracts (medical cover, insurance, pension administrators)
-

2. Operations

Recruitment & Onboarding

- Vacancy announcements & applications (digital portals)
- Shortlisting, examinations, and interview workflows
- Background checks & reference verification
- Appointment letters, probation, and confirmation

Payroll & Compensation

- Salary processing (basic, allowances, overtime)
- Statutory deductions (PAYE, pensions, NAPSA, NHIMA)
- Employer contributions & benefits
- Arrears, back-pay, and adjustments
- Multi-currency support for donor/expat staff

Performance Management

- Annual performance appraisals (targets, KPIs)
- 360° feedback and supervisor reviews
- Promotion, demotion, and disciplinary actions
- Linking performance with training & career progression

Leave & Attendance

- Biometric/fingerprint attendance tracking

- Leave requests & approvals (sick, annual, study, maternity/paternity)
- Automated leave balances & carry-forwards
- Absenteeism tracking and alerts

Training & Capacity Development

- Training need analysis by ministry/department
- Scheduling workshops, courses, e-learning modules
- Tracking CPD credits and certifications
- Partnering with universities and institutes

Pensions & Retirement Benefits

- Pension contributions & employer matching
- Retirement eligibility tracking
- Gratuity, severance, and lump-sum processing
- Pensioner payroll & life certificates

3. Value Addition

- Self-service employee portal (pay slips, leave requests, training records)
- AI for workforce planning & succession management
- Integration with biometric/NRC databases for ghost worker elimination
- Mobile payroll alerts (SMS, mobile money disbursements)
- E-learning integration with government training academies
- Predictive analytics for retirement planning & staff turnover

4. Sales & Distribution (Including Transfers)

- **Direct:** Payroll services, pension contributions, training revenues (government academies)
- **Internal Transfers:** Budget allocations to ministries/departments for staff salaries
- **External:** Donor funds for capacity-building and training

5. Cost & Profit Centres

Cost Centres

- Salaries & wages
- HR system licenses & IT infrastructure
- Training & workshops costs

- Pension & insurance costs
- Compliance & audit expenses

Profit Centres

- Training fees (public sector academies)
- Pension fund investment returns
- Donor-sponsored HR development programs

6. Reporting & Analytics

- Workforce headcount by ministry/region
- Gender & diversity statistics
- Payroll variance reports (budget vs actual)
- Overtime & absenteeism analysis
- Pension fund sustainability reports
- Training effectiveness dashboards
- Ghost worker elimination reports

7. Visual ERP Flow (Text Representation)

HR & PAYROLL FOR CIVIL SERVANTS ERP MODULE

Finance & Budgeting ERP Module

(National budgets, subsidies, donor funds, public accounting & reporting)

1. Procurement & Supply

- Financial management systems (ERP, IPSAS/IFRS compliant software)
 - Vendor contracts (auditors, treasury consultants, financial advisors)
 - IT infrastructure (servers, secure payment gateways, cloud hosting)
 - Banking & treasury service providers (RTGS, ACH, central bank systems)
 - Regulatory tools (ZRA, SEC, IMF/World Bank reporting compliance)
-

2. Operations

Budget Preparation & Approvals

- Multi-year budgeting (annual, medium-term expenditure frameworks)
- Forecasting revenues (taxes, levies, donor funding)
- Allocations by ministry, sector, and program
- Parliament & council approval workflows

Fund Management & Allocations

- Allocation tracking (ministries, councils, agencies, CDF)
- Real-time fund disbursements & reconciliation
- Subsidy disbursement (farm input support, education bursaries, fuel subsidies)
- Donor/grant earmarking & tracking

Accounting & Treasury Operations

- Chart of accounts (public sector aligned)
- Daily cash management & liquidity control
- Central bank integrations (treasury single account, bond issuances)
- Journal entries, ledgers, trial balances, and consolidation
- Foreign exchange management

Expenditure Control & Compliance

- Budget vs actual expenditure variance tracking

- Multi-level approvals for payments & commitments
- Contract compliance verification (procurement-linked)
- Fraud detection (duplicate claims, misallocations)

Revenue Collection & Management

- Integration with tax authorities (VAT, PAYE, customs, excise)
 - Non-tax revenues (licenses, permits, service charges)
 - Loan/grant receipts tracking
 - Automated reconciliation with banking systems
-

3. Value Addition

- AI-powered budget forecasting & scenario modeling
 - Blockchain-based public expenditure tracking
 - Citizen budget transparency portals (open budget data)
 - Mobile money & fintech integration for collections & subsidies
 - Predictive analytics for debt sustainability & fiscal risks
 - Cross-border fund management (regional projects, AU, UN programs)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Taxes, fees, levies, fines, service charges
 - **Internal Transfers:** Allocations between ministries, programs, councils
 - **External:** Grants, loans, donor funds, international aid flows
-

5. Cost & Profit Centres

Cost Centres

- Salaries of finance staff & auditors
- IT financial systems & integrations
- Interest payments & debt servicing
- Subsidies & grants disbursements
- Compliance & audit costs

Profit Centres

- Tax revenues (direct & indirect)
- Non-tax revenues (licenses, permits, service charges)
- Donor/aid inflows

- Investment income (bonds, reserves, pension fund returns)

6. Reporting & Analytics

- Budget execution reports (quarterly, annual)
- Variance reports (budget vs actual)
- Debt sustainability dashboards
- Donor & grant utilization reports
- Fiscal deficit/surplus tracking
- Transparency & citizen accountability dashboards
- IMF/World Bank & SDG-linked compliance reporting

7. Visual ERP Flow (Text Representation)

FINANCE & BUDGETING ERP MODULE

PROCUREMENT & SUPPLY

- Financial Systems (ERP, IPSAS/IFRS)
- Vendor Contracts (auditors, advisors)
- IT Infrastructure (servers, gateways, hosting)
- Treasury & Banking Providers
- Regulatory Tools (ZRA, IMF, World Bank compliance)

OPERATIONS

- Budget Prep & Approvals (multi-year, forecasting, allocations, parliament approval)
- Fund Mgmt & Allocations (ministries, councils, subsidies, donors)
- Accounting & Treasury (cash mgmt, CB integrations, ledgers, FX)
- Expenditure Control (budget vs actual, approvals, fraud detection)
- Revenue Collection (taxes, non-tax, loans, reconciliation)

VALUE ADDITION

- AI Forecasting & Scenario Modeling
- Blockchain Expenditure Tracking
- Citizen Transparency Portals
- Mobile/Fntech Integrations
- Debt Sustainability Analytics
- Cross-border Fund Mgmt

SALES & DISTRIBUTION (Including Transfers)

- Direct: Taxes, Fees, Levies
- Internal: Allocations (ministries, councils, programs)
- External: Donor/Loan/Aid Flows

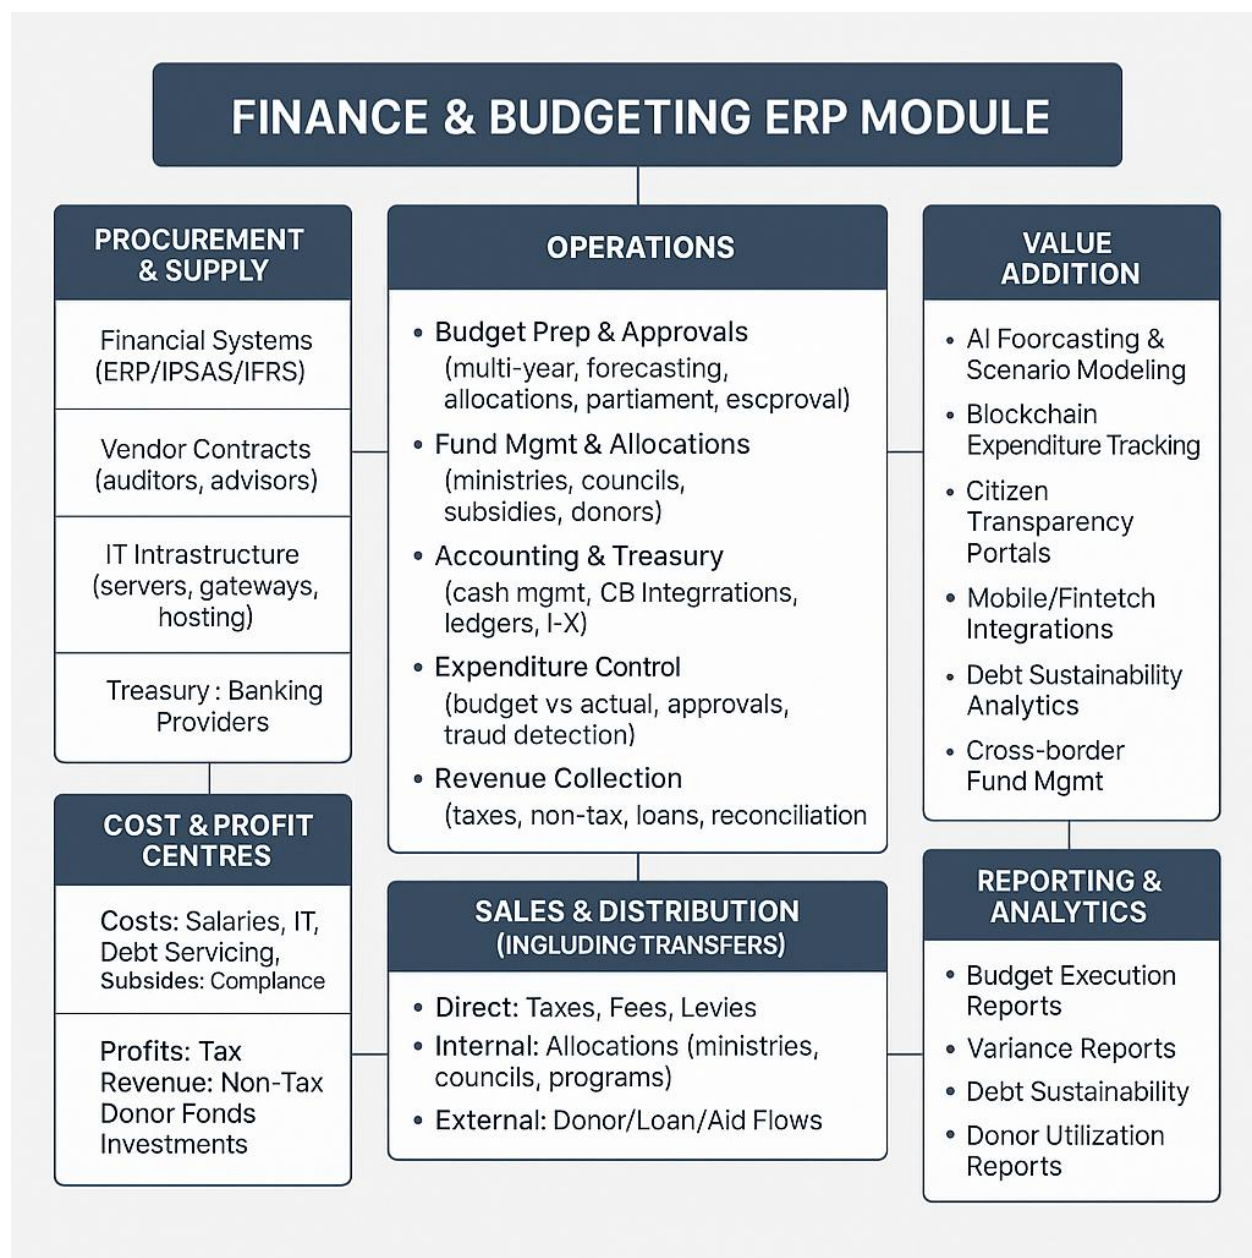

COST & PROFIT CENTRES

- Costs: Salaries, IT, Debt Servicing, Subsidies, Compliance
- Profits: Tax Revenue, Non-Tax, Donor Funds, Investments

Infrastructure & Facilities Management ERP Module

(Public works, government assets, maintenance, and facilities oversight)

1. Procurement & Supply

- Construction contracts (roads, bridges, schools, hospitals, utilities)
 - Vendor contracts (engineers, contractors, maintenance providers)
 - Materials & equipment (cement, steel, machinery, vehicles)
 - IT systems (asset registries, GIS mapping, facility management software)
 - PPP project agreements (concessions, leases, BOT contracts)
-

2. Operations

Public Works Project Management

- Project initiation (tenders, design approvals, budgeting)
- Contractor assignment & supervision
- Milestone tracking & payment certifications
- Infrastructure project dashboards (roads, utilities, schools, hospitals)

Asset Registry & Lifecycle Management

- Government-wide asset catalog (buildings, land, vehicles, equipment)
- Depreciation schedules & revaluation tracking
- Asset transfers across ministries/departments
- Disposal workflows (auctions, scrap, recycling)

Maintenance Management

- Preventive maintenance schedules (roads, utilities, facilities)
- Corrective maintenance requests & approvals
- Mobile field crew management (GPS tracking, work orders)
- Emergency response tracking (disaster damage, urgent repairs)

Facilities Oversight

- Government buildings (offices, courts, schools, hospitals)
- Utility usage tracking (electricity, water, telecom)
- Cleaning, security, and facility services contracts
- Space allocation (departments, councils, agencies)

Compliance & Safety

- Health & safety checks (worksites, public facilities)
- Environmental compliance (impact assessments, audits)
- Legal disputes over land/facilities
- Reporting to councils & regulators

3. Value Addition

- GIS-enabled infrastructure mapping
- IoT sensors for predictive maintenance (bridges, roads, water systems)
- Drone inspections for large public works projects
- AI-based project risk modeling & fraud detection
- Citizen reporting apps (damaged roads, broken utilities, unsafe facilities)
- Blockchain-enabled contract management for PPP projects

4. Sales & Distribution (Including Transfers)

- **Direct:** Rental income from government facilities, tolls, concessions
- **Internal Transfers:** Asset allocations between ministries & councils
- **External:** PPP project revenues, leasing public land/facilities, donor-funded infrastructure projects

5. Cost & Profit Centres

Cost Centres

- Construction costs & contractor payments
- Maintenance & facility management costs
- Equipment procurement & leasing costs
- IT systems for asset/facility management
- Health, safety, and environmental compliance costs

Profit Centres

- Rental/lease income from government facilities
- Concession/toll collections from PPP projects
- Donor & PPP infrastructure project inflows
- Revenue from asset disposals & auctions

6. Reporting & Analytics

- Infrastructure project completion rates
- Budget vs actual expenditure on public works
- Asset utilization & depreciation dashboards
- Maintenance backlog & downtime statistics

- Facility usage efficiency reports
- PPP performance dashboards
- Environmental & compliance reports

7. Visual ERP Flow (Text Representation)

⚖️ Judiciary & Legal Services ERP Module

(Courts, tribunals, public prosecutors, legal aid, law enforcement integration)

1. Procurement & Supply

- Court management systems (case filing, scheduling, e-courts)
 - Legal information systems (law libraries, statutory databases, precedent repositories)
 - IT infrastructure (video conferencing for hearings, digital transcription tools)
 - Vendor contracts (legal aid firms, forensic experts, interpreters)
 - Security & evidence management systems (chain-of-custody tools, e-document storage)
-

2. Operations

Case Management & Court Administration

- E-filing of cases (civil, criminal, constitutional, commercial)
- Case allocation (judges, magistrates, tribunals)
- Hearing scheduling & courtroom assignments
- Digital case tracking for lawyers, citizens, and institutions

Legal Aid & Public Defender Services

- Citizen legal aid application portals
- Case assignment to public defenders
- Pro bono case tracking & reporting
- Integration with bar associations and NGOs

Prosecution & Investigations

- Case intake from police and investigative agencies
- Evidence management & digital chain of custody
- Coordination between prosecutors, police, and forensic units
- Plea bargain & settlement management

Courtroom & Hearing Support

- Digital transcription & stenography services
- Real-time video conferencing & remote hearings

- Multilingual interpretation services
- Secure digital evidence display systems

Judicial HR & Administration

- Judge and magistrate roster management
 - Staff payroll and performance monitoring
 - Judicial training programs & continuous professional development
 - Judicial transfers and promotion workflows
-

3. Value Addition

- AI-assisted legal research (case law, precedents, statutory interpretation)
 - Blockchain-based evidence authentication & timestamping
 - Citizen justice portals (case status, judgments, e-filing, court fees)
 - Alternative dispute resolution (ADR) modules (arbitration, mediation)
 - Mobile-first access for rural citizens (SMS/USSD legal aid services)
 - Predictive analytics on case outcomes and backlog reduction
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Court fees, filing fees, licensing of advocates, fines
 - **Internal Transfers:** Budget allocations across courts, tribunals, and departments
 - **External:** Donor/legal reform program funds, PPPs for e-justice systems
-

5. Cost & Profit Centres

Cost Centres

- Judicial staff wages & allowances
- IT infrastructure & system licenses
- Forensic and investigation support costs
- Legal aid & public defender expenses
- Court building maintenance & utilities

Profit Centres

- Court filing & case fees
- Licensing and accreditation fees (lawyers, interpreters, arbitrators)
- Penalty and fine revenues
- Donor and reform program inflows

6. Reporting & Analytics

- Case backlog vs disposal rate dashboards
 - Case duration & turnaround time metrics
 - Legal aid utilization reports
 - Fine & fee collection reports
 - Judicial performance reports (per court, per judge)
 - Access to justice indexes (urban vs rural, gender, income groups)
-

7. Visual ERP Flow (Text Representation)

JUDICIARY & LEGAL SERVICES ERP MODULE

PROCUREMENT & SUPPLY

- Court Management Systems
- Legal Databases & Libraries
- IT Infrastructure (video, transcription)
- Vendor Contracts (legal aid, forensic, interpreters)
- Evidence Mgmt & Security Tools

OPERATIONS

- Case Mgmt (e-filing, allocation, scheduling, tracking)
- Legal Aid Services (applications, assignments, pro bono, NGOs)
- Prosecution & Investigations (intake, evidence, coordination, plea bargains)
- Courtroom Support (transcription, video, interpretation, evidence display)
- Judicial HR/Admin (rosters, payroll, training, transfers)

VALUE ADDITION

- AI Legal Research
- Blockchain Evidence Authentication
- Citizen Justice Portals
- ADR Modules (arbitration, mediation)
- Mobile Legal Aid (USSD, SMS)
- Predictive Analytics for Backlog Reduction

SALES & DISTRIBUTION (Including Transfers)

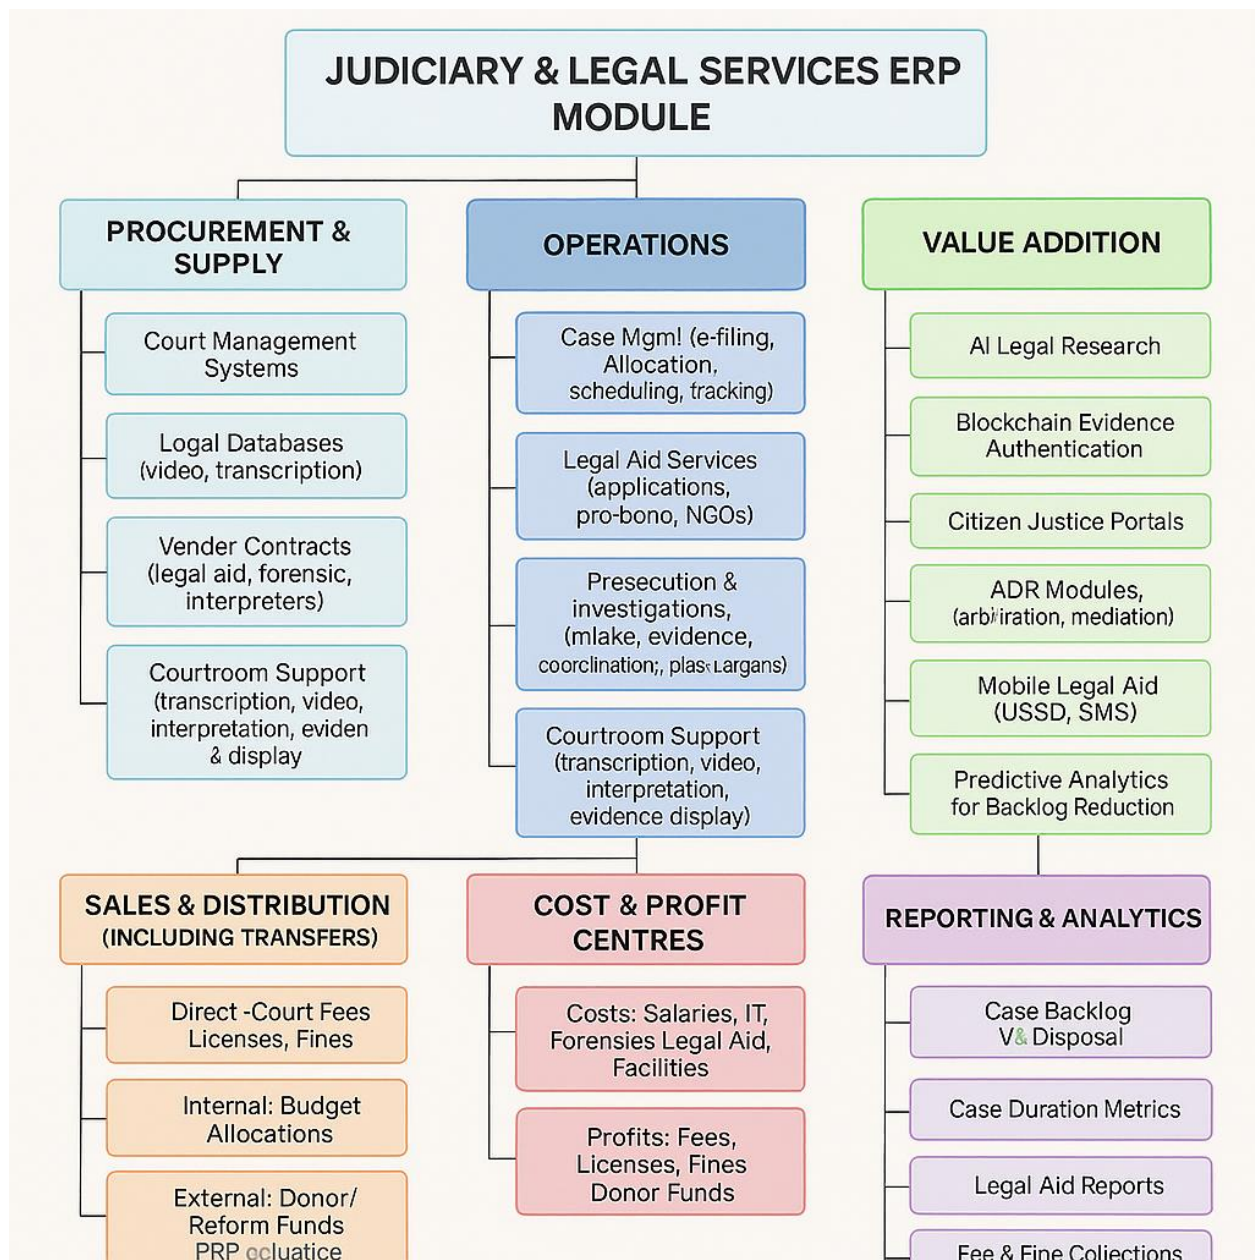

- Direct: Court Fees, Licenses, Fines
- Internal: Budget Allocations
- External: Donor/Reform Funds, PPP e-justice

COST & PROFIT CENTRES

- Costs: Salaries, IT, Forensics, Legal Aid, Facilities
- Profits: Fees, Licenses, Fines, Donor Funds

REPORTING & ANALYTICS

- Case Backlog vs Disposal
- Case Duration Metrics
- Legal Aid Reports
- Fee & Fine Collections

Transport & Logistics ERP Module

(Public transport, roads, rail, air, sea, and logistics coordination)

1. Procurement & Supply

- Fleet acquisition (buses, trains, ferries, aircraft, service vehicles)
 - Road, rail, port, and airport infrastructure contracts
 - Vendor contracts (fuel suppliers, parts dealers, logistics partners)
 - IT systems (fleet mgmt, ticketing, GPS tracking, traffic systems)
 - PPP agreements (private bus operators, logistics outsourcing, tolls)
-

2. Operations

Public Transport Management

- Route planning & scheduling (buses, trains, ferries)
- Ticketing systems (cash, smart cards, mobile payments)
- Passenger information systems (real-time updates, apps)
- Fleet tracking & dispatch management

Traffic & Road Management

- Intelligent transport systems (traffic lights, cameras, sensors)
- Road maintenance schedules & monitoring
- Toll collection systems (manual, RFID, ANPR)
- Parking management (smart meters, parking lots, permits)

Logistics & Freight Management

- Cargo bookings (rail, sea, air, road freight)
- Warehouse & storage facility management
- Customs & clearance integration
- Last-mile delivery scheduling

Transport Safety & Compliance

- Vehicle inspections & certification (roadworthiness, emissions)
- Driver licensing & compliance monitoring

- Accident & incident reporting systems
- Insurance & claims integration

Infrastructure Oversight

- Road/rail/port/airport project management
 - Asset registry of infrastructure (roads, bridges, depots, terminals)
 - Maintenance requests & service history
 - Land acquisition & compensation tracking
-

3. Value Addition

- Smart transport apps (ticketing, routing, journey planning)
 - IoT-enabled sensors (fleet diagnostics, cargo monitoring)
 - AI-based traffic & logistics optimization
 - Blockchain for cargo & customs tracking
 - Integration with smart city platforms
 - Green initiatives (EV fleets, carbon tracking, renewable-powered transport)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Passenger fares, toll fees, cargo bookings, parking charges
 - **Internal Transfers:** Budget allocations between transport agencies
 - **External:** PPP revenues, donor funding for infrastructure projects
-

5. Cost & Profit Centres

Cost Centres

- Fleet purchase & maintenance
- Road/rail/port/airport infrastructure costs
- IT systems & ticketing platforms
- Fuel, parts, and consumables
- Safety & compliance expenses

Profit Centres

- Passenger fares & ticketing revenue
- Toll collections & parking fees
- Cargo & logistics service charges
- PPP revenues & donor grants

6. Reporting & Analytics

- Fleet utilization dashboards (per route, per mode)
 - Passenger ridership & revenue reports
 - Traffic congestion & flow analytics
 - Accident & incident reporting trends
 - Logistics KPIs (delivery times, cargo volumes, customs clearance times)
 - Carbon footprint & green transport analytics
-

7. Visual ERP Flow (Text Representation)

Social Services & Welfare ERP Module

(Social protection, subsidies, grants, pensions, community welfare programs)

1. Procurement & Supply

- Beneficiary registration systems (databases, biometric kits, mobile outreach)
 - IT platforms for subsidy/grant disbursement (cash transfer platforms, mobile money, banks)
 - Vendor contracts (NGOs, social service providers, aid distributors)
 - Partnerships with local councils, clinics, and schools for outreach
 - Procurement of welfare goods (food packs, medicines, educational kits, disability aids)
-

2. Operations

Beneficiary Enrollment & Verification

- Social registry (citizens eligible for welfare)
- Biometric & ID verification (NRC, fingerprints, face recognition)
- Household surveys for eligibility
- Duplicate/fraud checks

Program Management

- Cash transfer programs (social cash transfer, child support, old-age pensions)
- Food distribution programs (vouchers, rations, school feeding)
- Health welfare (free/subsidized treatment, disability care)
- Education welfare (bursaries, school materials, subsidies)

Fund Disbursement

- Multi-channel transfers (banks, mobile money, post offices, NGOs)
- Conditional cash transfers (linked to school attendance, vaccinations, health checkups)
- Subsidy management (fuel, fertilizer, housing, utilities)
- Payment reconciliation & grievance redress

Community & NGO Engagement

- NGO and CBO integration for last-mile delivery

- Public-private partnerships in service provision
- Volunteer and social worker management
- Beneficiary feedback mechanisms

Monitoring & Compliance

- Spot checks & audits on disbursements
 - Fraud and ghost beneficiary detection
 - Program impact assessments
 - Donor & government compliance reporting
-

3. Value Addition

- AI-driven poverty mapping & beneficiary targeting
 - Mobile-first welfare platforms (apps, USSD, SMS notifications)
 - Blockchain for secure welfare fund disbursement & traceability
 - GIS-enabled distribution tracking (geography-based reach)
 - Integration with national ID/GSB for unified beneficiary records
 - Predictive analytics for demand forecasting (food, subsidies, health services)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Government subsidies, grants, welfare packages
 - **Internal Transfers:** Fund allocations between ministries/councils/programs
 - **External:** Donor funds, NGO/CBO partnerships, CSR contributions
-

5. Cost & Profit Centres

Cost Centres

- Subsidy & grant disbursements
- Welfare goods procurement (food, medicine, education kits)
- NGO contracts & administrative costs
- IT & outreach systems
- Staff & volunteer expenses

Profit Centres (*non-traditional, impact-focused*)

- Donor funds & grants
- PPP/CSR funding inflows
- Efficiency savings from fraud elimination

- Long-term social ROI (higher productivity, education outcomes)

6. Reporting & Analytics

- Beneficiary dashboards (active, new, exited)
 - Gender & age distribution of welfare recipients
 - Program reach & geographic coverage
 - Disbursement vs budget utilization
 - Fraud detection reports
 - Impact analytics (poverty reduction, education enrollment, health outcomes)
-

7. Visual ERP Flow (Text Representation)

SOCIAL SERVICES & WELFARE ERP MODULE

PROCUREMENT & SUPPLY

- └─ Beneficiary Systems (databases, biometrics)
- └─ IT Platforms (cash transfers, mobile money, banks)
- └─ Vendor Contracts (NGOs, aid distributors)
- └─ Local Partnerships (schools, clinics, councils)
- └─ Welfare Goods Procurement (food, meds, education kits)

OPERATIONS

- └─ Enrollment & Verification (registries, biometrics, surveys, fraud checks)
- └─ Program Mgmt (cash transfers, food, health, education)
- └─ Fund Disbursement (banks, mobile, conditional transfers, subsidies)
- └─ Community/NGO Engagement (PPPs, volunteers, feedback)
- └─ Monitoring & Compliance (audits, fraud detection, impact, donor reports)

VALUE ADDITION

- └─ AI Poverty Mapping & Targeting
- └─ Mobile-First Platforms (apps, USSD, SMS)
- └─ Blockchain Disbursement & Traceability
- └─ GIS Distribution Tracking
- └─ GSB/ID Integration
- └─ Predictive Analytics (demand forecasting)

SALES & DISTRIBUTION (Including Transfers)

- └─ Direct: Subsidies, Grants, Welfare Packages
- └─ Internal: Program Fund Allocations
- └─ External: Donor Funds, NGO/CSR Partnerships

COST & PROFIT CENTRES

- └─ Costs: Subsidies, Procurement, NGO Admin, IT, Staff
- └─ Profits/Impact: Donor Funds, PPPs, Efficiency Savings, Social ROI

REPORTING & ANALYTICS

- └─ Beneficiary Dashboards
- └─ Gender & Age Stats

- Geographic Reach
 - Budget vs Disbursements
 - Fraud Detection Reports
 - Impact Analytics (poverty, education, health)
-

Environmental & Natural Resources ERP Module

(Forestry, water resources, wildlife, land, mining oversight, climate action)

1. Procurement & Supply

- Environmental monitoring systems (satellite/GIS, drones, IoT sensors)
 - Vendor contracts (environmental consultants, forestry contractors, rangers, NGOs)
 - Conservation equipment (vehicles, patrol kits, fire-fighting gear, water testing kits)
 - IT platforms (climate dashboards, biodiversity databases, compliance systems)
 - PPP agreements (carbon credit markets, eco-tourism, mining concessions)
-

2. Operations

Forestry & Wildlife Management

- Forest inventory & reforestation programs
- Logging permits & compliance tracking
- Poaching prevention (ranger patrols, GPS tracking)
- Wildlife sanctuaries, game parks & eco-tourism management

Water Resource Management

- Catchment area protection
- Irrigation schemes & dam management
- Water usage permits & monitoring (agriculture, industry, households)
- Quality testing & pollution control

Mining & Land Use Oversight

- Mining permits & concession allocations
- Environmental impact assessments (EIAs)
- Land degradation monitoring (soil, vegetation, erosion)
- Rehabilitation & resettlement programs

Climate Change & Environmental Programs

- Carbon emission monitoring & reporting
- Renewable energy project management (solar, wind, hydro)
- Disaster risk reduction & climate resilience projects
- International treaty compliance (Paris Agreement, SDGs)

Compliance & Enforcement

- Environmental inspection & audits
 - Fines & penalties for violations (illegal logging, pollution, overuse of water)
 - Citizen complaint & reporting systems (hotlines, mobile apps)
 - Cross-border resource management (shared rivers, forests)
-

3. Value Addition

- AI predictive models for climate/weather forecasting
 - Blockchain for carbon credits & conservation funding
 - Mobile apps for citizen reporting (wildlife sightings, pollution, illegal activities)
 - Drone-based ecosystem monitoring
 - IoT for water/air quality tracking
 - Integration with national & global sustainability dashboards
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Permits & licenses (logging, mining, water usage), eco-tourism revenues, fines
 - **Internal Transfers:** Budget allocations for conservation & compliance
 - **External:** Donor funding, carbon credit sales, climate finance, NGO/PPP projects
-

5. Cost & Profit Centres

Cost Centres

- Conservation & reforestation projects
- Wildlife sanctuary operations
- Environmental monitoring systems
- Anti-poaching operations & ranger salaries
- Climate adaptation & disaster response programs

Profit Centres

- Permits & licensing fees (logging, water, mining, eco-tourism)
- Carbon credit sales & trading

- Donor funds & international climate finance
 - PPP revenues from eco-tourism & renewable energy projects
-

6. Reporting & Analytics

- Deforestation & reforestation dashboards
 - Wildlife population & poaching statistics
 - Water quality & consumption dashboards
 - Carbon emissions & climate impact analytics
 - Mining activity & land rehabilitation reports
 - Environmental compliance indexes
-

7. Visual ERP Flow (Text Representation)

ENVIRONMENTAL & NATURAL RESOURCES ERP MODULE

PROCUREMENT & SUPPLY

- Monitoring Systems (satellite, drones, IoT)
- Vendor Contracts (consultants, rangers, NGOs)
- Conservation Equipment
- IT Platforms (climate, biodiversity, compliance)
- PPP Agreements (carbon, eco-tourism, mining)

OPERATIONS

- Forestry & Wildlife (permits, patrols, parks, tourism)
- Water Mgmt (catchments, dams, permits, quality control)
- Mining & Land Use (permits, EIAs, monitoring, rehab)
- Climate Programs (emissions, renewable energy, resilience, treaties)
- Compliance & Enforcement (audits, penalties, citizen reporting, cross-border)

VALUE ADDITION

- AI Climate/Weather Prediction
- Blockchain Carbon Credits
- Mobile Reporting Apps
- Drone Ecosystem Monitoring
- IoT Water/Air Quality
- Sustainability Dashboards

SALES & DISTRIBUTION (Including Transfers)

- Direct: Permits, Eco-Tourism, Fines
- Internal: Conservation Budgets
- External: Donor Funds, Carbon Credits, PPPs

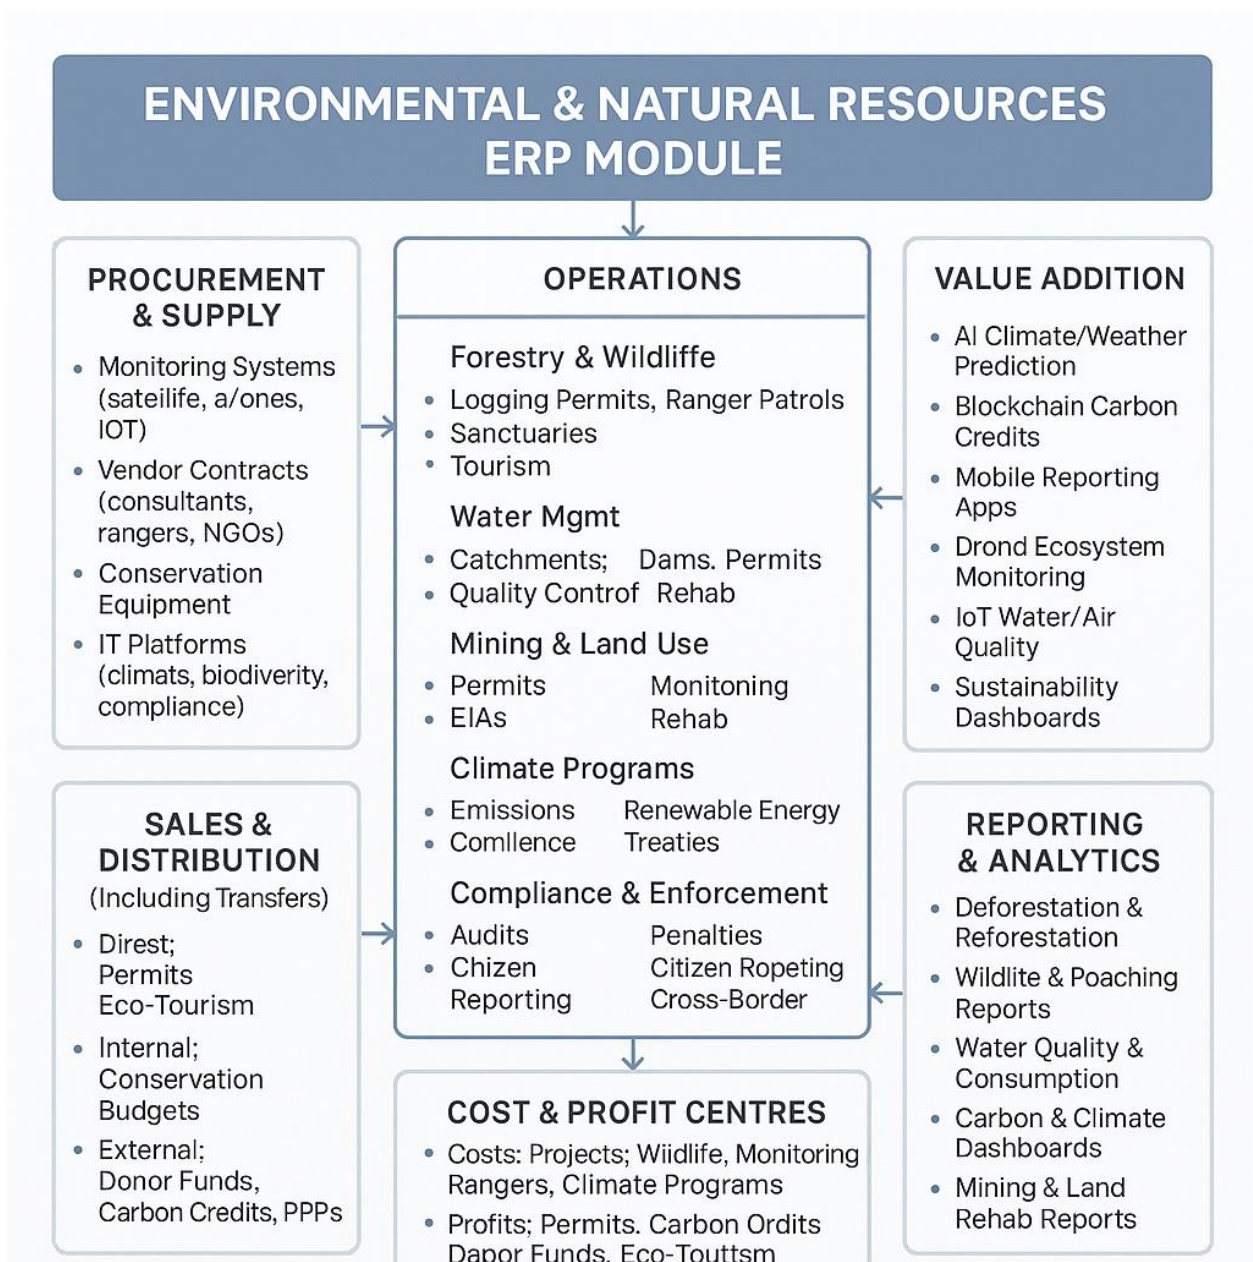

COST & PROFIT CENTRES

- Costs: Projects, Wildlife, Monitoring, Rangers, Climate Programs
- Profits: Permits, Carbon Credits, Donor Funds, Eco-Tourism

REPORTING & ANALYTICS

- Deforestation & Reforestation

- Wildlife & Poaching Reports
- Water Quality & Consumption
- Carbon & Climate Dashboards
- Mining & Land Rehab Reports
- Environmental Compliance Indexes

Forestry & Wildlife Management ERP Module

1. Procurement & Supply

- Forestry equipment (seedlings, nurseries, fire-fighting kits, patrol vehicles)
 - Wildlife conservation tools (GPS collars, drones, ranger gear, veterinary supplies)
 - Vendor contracts (eco-tourism operators, park service contractors, anti-poaching units)
 - IT platforms (forest inventory systems, wildlife census tools, GIS mapping)
 - PPP agreements (eco-tourism lodges, safari concessions, conservation PPPs)
-

2. Operations

Forest Management

- Inventory of forest resources (species, coverage, density)
- Reforestation & afforestation programs
- Logging permits & harvesting quotas
- Fire monitoring & disaster response

Wildlife Protection & Management

- Poaching prevention patrols & ranger deployments
- Tracking endangered species (satellite & GPS monitoring)
- Wildlife census & biodiversity monitoring
- Veterinary services & rehabilitation for injured animals

Eco-Tourism & Parks Management

- Ticketing & visitor management for parks and reserves
- Concession management (lodges, safari operators)
- Community engagement programs for conservation
- Revenue-sharing models with local communities

Conservation Projects

- Community-based conservation initiatives
- Protected area zoning & land use planning

- Partnerships with NGOs for species protection
 - International conservation project integration (e.g., UNESCO biosphere reserves)
-

3. Value Addition

- AI for forest fire prediction & early warning
 - Drone-based forest canopy & wildlife surveys
 - Blockchain for eco-tourism revenue sharing transparency
 - Citizen mobile apps (wildlife sightings, illegal logging reports)
 - IoT sensors for monitoring illegal logging and intrusion
 - Carbon credit systems linked to forest preservation
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Park entry fees, safari permits, logging licenses
 - **Internal Transfers:** Revenue allocations across forestry, parks, and wildlife units
 - **External:** Donor funds, conservation grants, eco-tourism PPP revenues
-

5. Cost & Profit Centres

Cost Centres

- Ranger patrols & anti-poaching operations
- Nursery & reforestation projects
- Park maintenance & visitor facilities
- Veterinary & rehabilitation services
- Fire prevention & disaster management

Profit Centres

- Eco-tourism ticketing & concessions
 - Logging license revenues (sustainable quotas only)
 - Donor funding for conservation programs
 - Carbon credits from preserved forests
-

6. Reporting & Analytics

- Deforestation vs reforestation dashboards
- Biodiversity health indicators (species counts, extinction risks)

- Poaching incidents & ranger patrol metrics
 - Park visitor statistics & tourism revenue reports
 - Carbon sequestration & credit reports
 - Community impact analytics (employment, shared revenue)
-

7. Visual ERP Flow (Text Representation)

FORESTRY & WILDLIFE MANAGEMENT ERP MODULE

PROCUREMENT & SUPPLY

- Forestry Equipment (seedlings, nurseries, fire kits, vehicles)
- Wildlife Tools (GPS, drones, ranger gear, veterinary supplies)
- Vendor Contracts (eco-tourism, anti-poaching, NGOs)
- IT Platforms (forest inventory, wildlife census, GIS)
- PPP Agreements (eco-lodges, safaris, conservation)

OPERATIONS

- Forest Mgmt (inventory, reforestation, logging permits, fire mgmt)
- Wildlife Protection (patrols, tracking, census, veterinary services)
- Eco-Tourism & Parks (ticketing, concessions, community engagement, revenue sharing)
- Conservation Projects (community-based, protected areas, NGO partnerships, UNESCO)

VALUE ADDITION

- AI Fire Prediction
- Drone Forest & Wildlife Surveys
- Blockchain Tourism Transparency
- Citizen Apps (wildlife/illegal logging reporting)
- IoT Logging Intrusion Sensors
- Carbon Credit Systems

SALES & DISTRIBUTION (Including Transfers)

- Direct: Entry Fees, Permits, Licenses
- Internal: Forestry/Parks Revenue Allocations
- External: Donor Funds, Grants, PPP Revenues

COST & PROFIT CENTRES

- Costs: Rangers, Nurseries, Park Mgmt, Veterinary, Fire Prevention
- Profits: Tourism, Licenses, Donor Funds, Carbon Credits

REPORTING & ANALYTICS

- Deforestation vs Reforestation
 - Biodiversity Indicators
 - Poaching & Patrol Metrics
 - Tourism Visitors & Revenue
 - Carbon Sequestration Reports
 - Community Impact Reports
-

Poaching & Patrol Metrics
Tourism Visitors & Revenue

💧 Water Resource Management ERP Module

1. Procurement & Supply

- Hydrological monitoring systems (IoT water sensors, flow meters, GIS mapping)
 - Dams, irrigation, and reservoir construction contracts
 - Vendor contracts (water treatment companies, pump suppliers, civil contractors)
 - IT platforms (water usage registries, billing systems, compliance software)
 - PPP agreements (water utilities, agricultural cooperatives, hydropower plants)
-

2. Operations

Catchment Protection & Management

- Watershed & river basin protection programs
- Afforestation around catchments
- Floodplain zoning & protection
- Water conservation campaigns

Irrigation & Agricultural Water Use

- Irrigation scheme planning & scheduling
- Monitoring agricultural water usage
- Water allocation quotas for cooperatives & commercial farms
- Efficiency monitoring (drip irrigation, recycling systems)

Urban & Industrial Water Supply

- Licensing for industrial water extraction
- Municipal water treatment & distribution oversight
- Leak detection & water loss management
- Public-private partnerships in urban water supply

Permits & Usage Monitoring

- Licensing for boreholes, wells, dams, and bulk usage
- Monitoring of water abstraction against quotas

- Compliance dashboards for industries and municipalities
- Cross-border water-sharing agreements

Water Quality Monitoring

- Lab testing (chemical, biological, physical quality indicators)
 - IoT-enabled real-time water quality monitoring
 - Pollution control enforcement (industrial, agricultural, domestic)
 - Citizen water quality reporting portals
-

3. Value Addition

- AI-powered demand forecasting (agriculture, industry, domestic)
 - Blockchain for transparent water rights trading
 - Mobile platforms for water permit applications & reporting leaks
 - IoT-based early flood/drought warning systems
 - Integration with smart city dashboards for urban utilities
 - Climate-linked water availability modeling
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Water tariffs, industrial licensing fees, irrigation charges
 - **Internal Transfers:** Allocations to municipalities, irrigation boards, water utilities
 - **External:** Donor funds, PPP inflows, international water treaties
-

5. Cost & Profit Centres

Cost Centres

- Dam & irrigation scheme construction/maintenance
- Water quality testing labs & IoT infrastructure
- Staff, inspectors & catchment managers
- Urban supply infrastructure (pipes, pumps, treatment)
- Compliance enforcement costs

Profit Centres

- Tariffs from households & industries
- Irrigation charges from farms
- Industrial licensing & usage fees
- PPP water supply revenues

- Donor & international funding inflows

6. Reporting & Analytics

- Catchment health & conservation dashboards
- Irrigation water usage vs quotas reports
- Urban vs rural supply dashboards
- Water quality heatmaps & pollution tracking
- Revenue collection vs leakage/loss reports
- Flood/drought risk prediction reports

7. Visual ERP Flow (Text Representation)

WATER RESOURCE MANAGEMENT ERP MODULE

PROCUREMENT & SUPPLY

- └─ Hydrological Systems (IoT, GIS, meters)

WATER RESOURCE MANAGEMENT ERP MODULE

💧 Water Resource Management ERP Module

1. Procurement & Supply

- **Hydrological Monitoring Systems:** IoT water sensors, flow meters, GIS mapping tools
 - **Infrastructure Contracts:** Dams, reservoirs, pipelines, irrigation schemes
 - **Vendor Contracts:** Water treatment firms, pump suppliers, civil works contractors
 - **IT Platforms:** Water usage registries, billing & revenue systems, compliance dashboards
 - **Public-Private Partnerships (PPP):** Utilities, agricultural cooperatives, hydropower plants
-

2. Operations

Catchment & Watershed Management

- Protection of river basins and watersheds
- Afforestation and conservation around catchments
- Floodplain zoning and disaster prevention
- Awareness campaigns for water conservation

Irrigation & Agricultural Water Use

- Planning and scheduling of irrigation schemes
- Monitoring water allocations for cooperatives and commercial farms
- Usage quota enforcement to prevent over-extraction
- Efficiency monitoring (drip irrigation, recycling systems)

Urban & Industrial Water Supply

- Licensing and regulation of industrial extraction
- Oversight of municipal water treatment & distribution
- Leak detection and non-revenue water management
- PPP partnerships for urban/industrial supply

Permits & Usage Oversight

- Licensing for boreholes, wells, dams, and bulk water use

- Monitoring abstraction volumes against quotas
- Dashboards for industrial and municipal compliance
- Cross-border water resource agreements

Water Quality Control

- Laboratory testing for physical, chemical, and biological indicators
 - IoT-enabled real-time water quality monitoring
 - Pollution control enforcement (industrial, agricultural, domestic)
 - Citizen reporting platforms for water quality issues
-

3. Value Addition

- AI-driven demand forecasting across agriculture, industry, and domestic use
 - Blockchain-based water rights trading and transparency
 - Mobile applications for permit applications, reporting leaks, and water complaints
 - IoT early warning systems for floods and droughts
 - Integration with smart city dashboards for utilities
 - Climate-linked water availability modeling
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Household tariffs, industrial licensing fees, irrigation charges
 - **Internal Transfers:** Allocations to municipalities, irrigation boards, utilities
 - **External:** Donor funding, PPP project revenues, cross-border treaty inflows
-

5. Cost & Profit Centres

Cost Centres

- Dam and irrigation scheme construction/maintenance
- Laboratory testing facilities & IoT monitoring equipment
- Staff salaries (inspectors, engineers, managers)
- Urban water supply infrastructure (pipes, pumps, treatment plants)
- Compliance enforcement activities

Profit Centres

- Household & industrial tariff collections
- Irrigation service fees
- Licensing revenue for water abstraction

- PPP income from utilities & water projects
 - Donor & international water program inflows
-

6. Reporting & Analytics

- Catchment health and conservation dashboards
 - Irrigation water usage vs allocation reports
 - Urban vs rural water supply efficiency dashboards
 - Water quality heatmaps with pollution alerts
 - Revenue vs leakage/loss reports
 - Flood and drought risk prediction dashboards
-

7. Visual ERP Flow (Text Representation)

WATER RESOURCE MANAGEMENT ERP MODULE

PROCUREMENT & SUPPLY

- Water Quality Heatmaps
- Revenue vs Leakage
- Flood/Drought Risk Predictions

Mining & Land Use ERP Module

1. Procurement & Supply

- **Permitting & Licensing Systems:** Digital platforms for mining concessions, small-scale permits, artisanal mining oversight
 - **Environmental Monitoring Tools:** Satellite mapping, IoT air/water quality sensors, drones for site inspection
 - **Vendor Contracts:** Mining contractors, blasting companies, rehabilitation service providers
 - **IT Platforms:** EIA compliance tracking, geological data systems, mineral production reporting tools
 - **PPP Agreements:** Joint ventures for large-scale mining, land leasing for industrial/mining zones
-

2. Operations

Mining Permits & Concessions

- Digital applications for large-scale, small-scale & artisanal mining licenses
- Allocation of concessions with transparency (auction systems)
- Tracking production quotas & royalties
- Renewal & compliance workflows

Environmental Impact Assessments (EIA)

- Digital EIA submission, review & approval
- Continuous environmental monitoring (air, water, soil)
- Community consultation tracking
- EIA-linked conditional permits

Land Use Management

- Mapping of land allocated to mining, agriculture, industry & conservation
- Zoning compliance and urban planning integration
- Land acquisition, compensation & resettlement systems
- Dispute resolution for land use conflicts

Mining Operations Oversight

- Daily/weekly reporting of mineral output
- Tracking safety compliance (OSHA, mining regulations)
- Monitoring worker welfare & labor standards
- Smuggling & illegal mining detection

Rehabilitation & Closure

- Mine closure plans linked to permits
- Land rehabilitation workflows (tree planting, soil stabilization, water treatment)
- Resettlement & compensation tracking
- Post-closure monitoring for compliance

3. Value Addition

- AI for predictive analysis of mineral deposits
- Blockchain for mineral traceability (avoiding conflict minerals)
- Mobile-first platforms for artisanal miners (permit applications, reporting)
- IoT-enabled safety monitoring (toxic gas sensors, vibration alerts)
- Integration with financial systems for royalty & tax compliance
- Drone-based monitoring of mining sites and illegal activities

4. Sales & Distribution (Including Transfers)

- **Direct:** Mining royalties, license fees, land leases
- **Internal Transfers:** Revenue allocation across ministries, local councils & regulatory agencies
- **External:** Donor funding for sustainable mining, PPP revenues, international mineral trade agreements

5. Cost & Profit Centres

Cost Centres

- Licensing & inspection operations
- EIA monitoring & enforcement
- Community resettlement & compensation
- Rehabilitation & closure project costs
- IT systems for tracking & compliance

Profit Centres

- Royalties from mineral production
- Licensing revenues (large-scale & small-scale mining)
- Land lease payments
- PPP project inflows
- International trade revenues from mineral exports

6. Reporting & Analytics

- Mining revenue dashboards (royalties, licenses, exports)
 - EIA compliance tracking & violation reports
 - Land use allocation dashboards (mining vs agriculture vs conservation)
 - Worker safety & welfare metrics
 - Rehabilitation progress & compliance dashboards
 - International trade analytics (exports by mineral, destination countries)
-

7. Visual ERP Flow (Text Representation)

MINING & LAND USE ERP MODULE

PROCUREMENT & SUPPLY

- └─ Permitting Systems (licenses, concessions, artisanal oversight)
- └─ Monitoring Tools (satellite, IoT, drones)
- └─ Vendor Contracts (contractors, blasting, rehabilitation)
- └─ IT Platforms (EIA, geological, production)
- └─ PPP Agreements (joint ventures, land leasing)

OPERATIONS

- └─ Mining Permits & Concessions (applications, allocations, quotas, renewals)
- └─ EIA Mgmt (digital submissions, monitoring, consultations, linked permits)
- └─ Land Use Mgmt (zoning, acquisition, resettlement, disputes)
- └─ Mining Oversight (output reports, safety, labor, smuggling detection)
- └─ Rehabilitation & Closure (closure plans, rehab, compensation, monitoring)

VALUE ADDITION

- └─ AI Mineral Prediction
- └─ Blockchain Mineral Traceability
- └─ Mobile Platforms for Artisanal Miners
- └─ IoT Safety Sensors
- └─ Financial System Integration
- └─ Drone Site Monitoring

SALES & DISTRIBUTION (Including Transfers)

- └─ Direct: Royalties, Licenses, Leases
- └─ Internal: Revenue Allocation (ministries, councils)
- └─ External: Donor Funds, PPPs, Trade Agreements

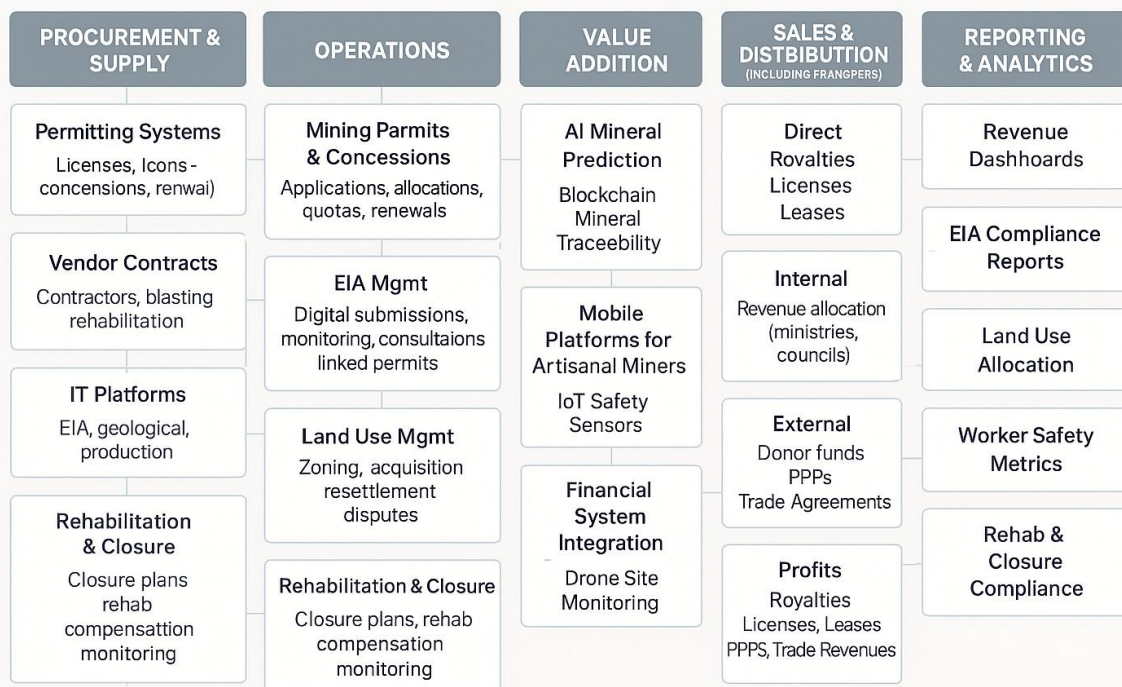

COST & PROFIT CENTRES

- Costs: Licensing, EIA, Resettlement, Rehab, IT
- Profits: Royalties, Licenses, Leases, PPPs, Trade Revenues

REPORTING & ANALYTICS

- Revenue Dashboards
- EIA Compliance Reports
- Land Use Allocation
- Worker Safety Metrics
- Rehab & Closure Compliance
- Export & Trade Analytics

MINING & LAND USE ERP MODULE

Climate Change & Environmental Programs ERP Module

1. Procurement & Supply

- **Monitoring Systems:** IoT climate sensors, weather stations, carbon monitoring satellites
 - **Project Equipment:** Solar panels, wind turbines, hydro equipment, biofuel systems
 - **Vendor Contracts:** Renewable energy contractors, disaster relief providers, NGOs
 - **IT Platforms:** Climate dashboards, emissions registries, disaster response systems
 - **PPP Agreements:** Joint ventures for renewable energy, carbon markets, disaster preparedness projects
-

2. Operations

Emissions Monitoring & Reporting

- National carbon inventory tracking
- Industrial emissions monitoring (factories, energy plants, transport)
- Greenhouse gas (GHG) reporting compliance
- Integration with international climate reporting (UNFCCC, Paris Agreement)

Renewable Energy & Sustainability Projects

- Solar, wind, hydro, and geothermal project management
- Community-based renewable initiatives (mini-grids, biofuel)
- Carbon credit project certification & trading
- Public-private renewable partnerships

Disaster Risk Reduction & Climate Resilience

- Flood, drought, and storm risk monitoring
- Early warning system management (IoT + satellite data)
- Emergency response logistics (relief supply chains, shelters)
- Climate-resilient infrastructure planning (roads, dams, housing)

Climate Adaptation Programs

- Sustainable agriculture programs (drought-resistant crops, irrigation)

- Water harvesting and conservation systems
- Urban green projects (tree planting, green buildings)
- Health programs (heatwave preparedness, climate-linked diseases)

International Treaty & Donor Compliance

- Paris Agreement & SDG-linked reporting
 - Donor project tracking (World Bank, UN, regional funds)
 - Climate finance utilization reports
 - Cross-border collaboration on renewable and adaptation projects
-

3. Value Addition

- AI-based climate forecasting & predictive disaster modeling
 - Blockchain for carbon credit tracking & transparent climate finance
 - Mobile-first citizen apps (carbon footprint calculators, alerts, green tips)
 - Drone-based disaster impact assessments
 - IoT-based resilience monitoring (soil moisture, air quality, ocean levels)
 - Integration with national/global sustainability dashboards
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Carbon credit sales, renewable energy revenues, green certification fees
 - **Internal Transfers:** Budget allocations for adaptation & disaster response programs
 - **External:** Donor funds, climate finance flows, PPP renewable revenues
-

5. Cost & Profit Centres

Cost Centres

- Climate monitoring & IT platforms
- Renewable project equipment & maintenance
- Disaster response logistics
- Research & development for climate adaptation
- Staff training & international compliance costs

Profit Centres

- Carbon credit sales & trading
- Renewable energy sales (solar, wind, hydro, biomass)
- Donor & climate finance inflows

- PPP revenues from green projects

6. Reporting & Analytics

- National emissions dashboards
- Renewable energy capacity & performance reports
- Disaster impact and response time analytics
- Climate adaptation progress dashboards
- Donor compliance & fund utilization reports
- Global treaty alignment tracking

7. Visual ERP Flow (Text Representation)

CLIMATE CHANGE & ENVIRONMENTAL PROGRAMS ERP MODULE

PROCUREMENT & SUPPLY

- └─ Monitoring Systems (IoT, weather stations, satellites)
- └─ Project Equipment (solar, wind, hydro, biofuel)

- └─ Profits: Carbon Credits, Renewable Sales, Donor Funds, PPPs

REPORTING & ANALYTICS

- Emissions Dashboards
- Renewable Energy Performance
- Disaster Impact Reports
- Adaptation Progress
- Donor & Fund Utilization
- Treaty Alignment Tracking

Compliance & Enforcement ERP Module

1. Procurement & Supply

- **Inspection Equipment:** Vehicles, drones, air/water quality meters, GPS devices
 - **IT Platforms:** Compliance dashboards, inspection scheduling, digital case management
 - **Vendor Contracts:** Third-party auditors, testing labs, enforcement agencies
 - **Legal Tools:** Digital law libraries, fine/tariff calculation engines
 - **PPP Agreements:** Outsourced inspection services, compliance certification bodies
-

2. Operations

Environmental & Resource Inspections

- Field inspections (forests, mines, water utilities, industries)
- Remote monitoring via drones and IoT sensors
- Random vs scheduled audits
- Chain-of-custody tools for samples and evidence

Compliance Audits

- Periodic compliance checks (permits, licenses, EIAs, emissions)
- Industry self-reporting verification
- Cross-agency collaboration for high-risk sectors
- Automated audit trail generation

Penalties & Enforcement

- Fine calculation & issuance (pollution, illegal extraction, overuse)
- License suspension/termination workflows
- Legal case management system (environmental courts, tribunals)
- Collection of penalties & integration with finance modules

Citizen Engagement & Whistleblowing

- Mobile/web apps for reporting violations (pollution, illegal logging, poaching)
- Hotline & SMS reporting channels

- Community watchdog programs
- Reward/incentive systems for whistleblowers

Cross-Border & Inter-Agency Cooperation

- Joint enforcement programs for rivers, forests, and shared resources
 - Regional enforcement databases (permits, violations, sanctions)
 - Data exchange with customs & border agencies
 - International treaty-linked compliance reporting
-

3. Value Addition

- AI-powered risk detection & compliance scoring
 - Blockchain-based tamper-proof audit records
 - Predictive analytics for enforcement hotspots
 - Automated penalty tracking & recovery systems
 - Integration with satellite & GIS for real-time enforcement
 - Public transparency portals for compliance status
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Fines, penalties, compliance certification fees
 - **Internal Transfers:** Revenue allocations across regulatory agencies & councils
 - **External:** Donor support for compliance reforms, PPP contracts for inspection services
-

5. Cost & Profit Centres

Cost Centres

- Inspection logistics & staff salaries
- Monitoring equipment & IT platforms
- Legal processes & case management
- Community engagement programs
- International treaty compliance costs

Profit Centres

- Fines & penalty collections
- Licensing & compliance certification fees
- PPP service contracts
- Donor-funded enforcement programs

6. Reporting & Analytics

- Inspection coverage dashboards (by sector, by region)
 - Violation heatmaps & trends
 - Penalty collection & recovery reports
 - License suspension/revocation statistics
 - Citizen complaints & whistleblowing trends
 - Treaty compliance & international reporting dashboards
-

7. Visual ERP Flow (Text Representation)

COMPLIANCE & ENFORCEMENT ERP MODULE

PROCUREMENT & SUPPLY

- Inspection Equipment (vehicles, drones, sensors, GPS)
- IT Platforms (dashboards, scheduling, case mgmt)
- Vendor Contracts (auditors, labs, enforcement)
- Legal Tools (law libraries, fine engines)
- PPP Agreements (outsourced inspections, certifications)

OPERATIONS

- Inspections (field, remote, audits, evidence tracking)
- Compliance Audits (permits, licenses, emissions, cross-agency)
- Penalties & Enforcement (fines, suspensions, legal case mgmt, collections)
- Citizen Engagement (apps, hotlines, watchdogs, incentives)
- Cross-Border Cooperation (joint enforcement, customs, treaties)

VALUE ADDITION

- AI Risk Detection
- Blockchain Audit Records
- Predictive Enforcement Analytics
- Automated Penalty Systems
- GIS/Satellite Integration
- Public Transparency Portals

SALES & DISTRIBUTION (Including Transfers)

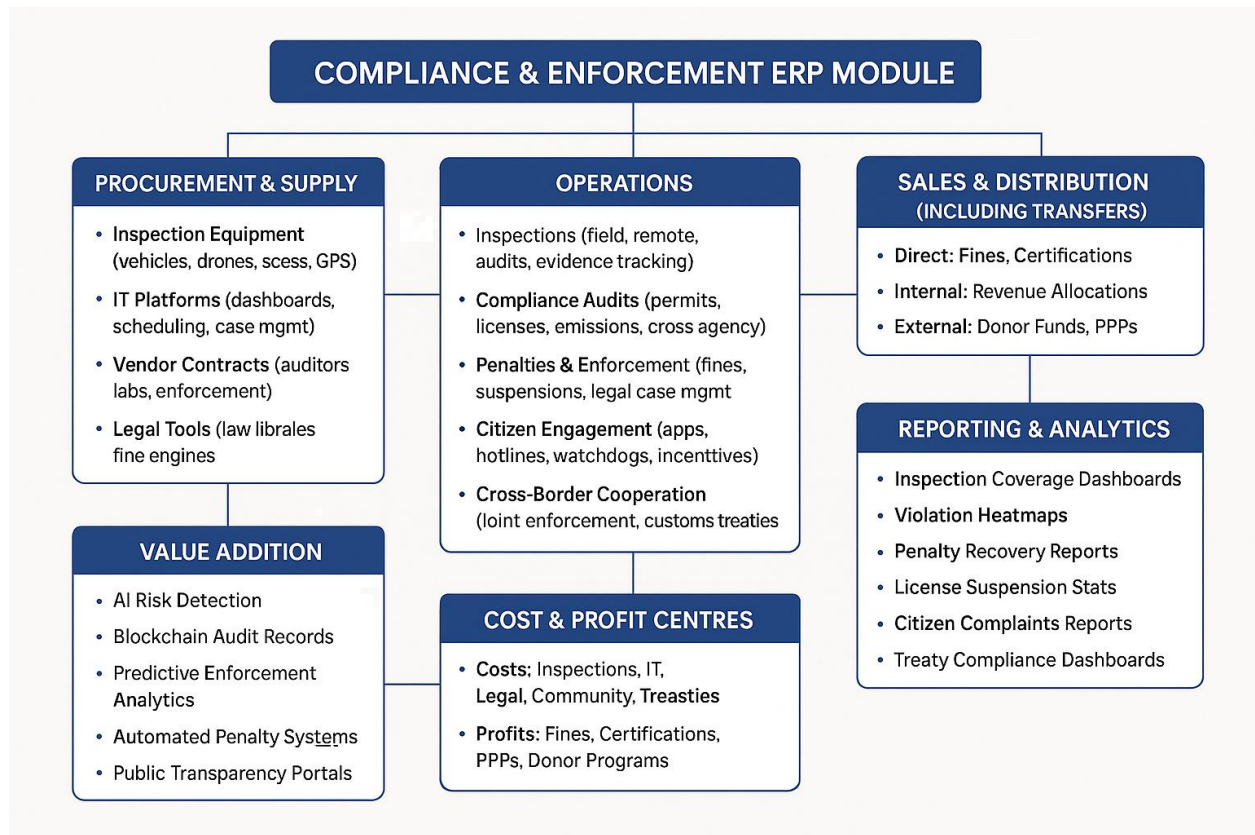

- Direct: Fines, Certifications
- Internal: Revenue Allocations
- External: Donor Funds, PPPs

COST & PROFIT CENTRES

- Costs: Inspections, IT, Legal, Community, Treaties
- Profits: Fines, Certifications, PPPs, Donor Programs

REPORTING & ANALYTICS

- Inspection Coverage Dashboards
- Violation Heatmaps
- Penalty Recovery Reports
- License Suspension Stats
- Citizen Complaints Reports

Education ERP Module

1. Procurement & Supply

- **Learning Infrastructure:** Classroom construction, furniture, smart boards, ICT labs
 - **Educational Materials:** Books, e-learning content, assessment tools
 - **Vendor Contracts:** Publishers, EdTech providers, catering & boarding service providers
 - **IT Platforms:** Student information systems, LMS (Learning Management Systems), e-libraries
 - **PPP Agreements:** University-industry partnerships, donor-funded school programs
-

2. Operations

Student Lifecycle Management

- Admissions & enrollment workflows
- Attendance tracking & digital roll calls
- Academic performance monitoring
- Student transfers & alumni tracking

Curriculum & Learning Management

- Centralized curriculum repository
- Integration of e-learning & blended learning tools
- Timetable & course scheduling
- Continuous assessment & grading systems

Teacher & Staff Management

- Recruitment & onboarding workflows
- Payroll, allowances, and benefits management
- Professional development tracking
- Teacher performance analytics

Examination & Certification

- Digital exam registration & scheduling
- Online & in-person exam administration
- Secure grading & moderation workflows

- Automated certificate generation & verification

Institutional Management

- School/college/university asset management
 - Boarding & hostel management
 - Cafeteria & nutrition programs
 - Facility scheduling (libraries, labs, sports grounds)
-

3. Value Addition

- AI-powered adaptive learning & student performance prediction
 - Mobile-first student/parent portals (grades, attendance, fees, progress reports)
 - Blockchain-based tamper-proof certificates & transcripts
 - Virtual classrooms & VR/AR-based immersive learning
 - Integration with national education portals & accreditation systems
 - Data-driven policy insights (dropout rates, teacher-student ratios, resource allocation)
-

4. Sales & Distribution (Including Transfers)

- **Direct:** Tuition fees, boarding fees, exam fees, certification charges
 - **Internal Transfers:** Allocations to schools, departments, faculties, regional offices
 - **External:** Donor grants, PPP revenues, government subsidies, scholarships
-

5. Cost & Profit Centres

Cost Centres

- Teacher & staff salaries
- Infrastructure & facility maintenance
- Learning materials & IT systems
- Exam administration & certification costs
- Boarding & welfare services

Profit Centres

- Tuition & other student fees
- Certification & training programs
- Research grants & partnerships
- PPPs & industry collaboration revenues

6. Reporting & Analytics

- Enrollment trends & demographic breakdowns
 - Student performance dashboards
 - Teacher productivity & training impact reports
 - Institutional financial performance
 - National education indicators (literacy rates, pass rates, dropout trends)
 - Accreditation & compliance reports
-

7. Visual ERP Flow (Text Representation)

EDUCATION ERP MODULE

PROCUREMENT & SUPPLY

- Learning Infrastructure (classrooms, ICT labs)
- Educational Materials (books, e-learning)
- Vendor Contracts (publishers, EdTech, catering)
- IT Platforms (SIS, LMS, e-libraries)
- PPP Agreements (industry partnerships, donor programs)

OPERATIONS

- Student Lifecycle (admissions, attendance, performance, alumni)
- Curriculum & Learning Mgmt (repository, e-learning, timetables, grading)
- Teacher & Staff Mgmt (recruitment, payroll, training, analytics)
- Examinations & Certifications (registration, exams, grading, certificates)
- Institutional Mgmt (assets, boarding, cafeteria, facilities)

VALUE ADDITION

- AI Adaptive Learning
- Mobile Student/Parent Portals
- Blockchain Certificates
- Virtual/AR Classrooms
- Accreditation Integration
- Policy & Resource Analytics

SALES & DISTRIBUTION (Including Transfers)

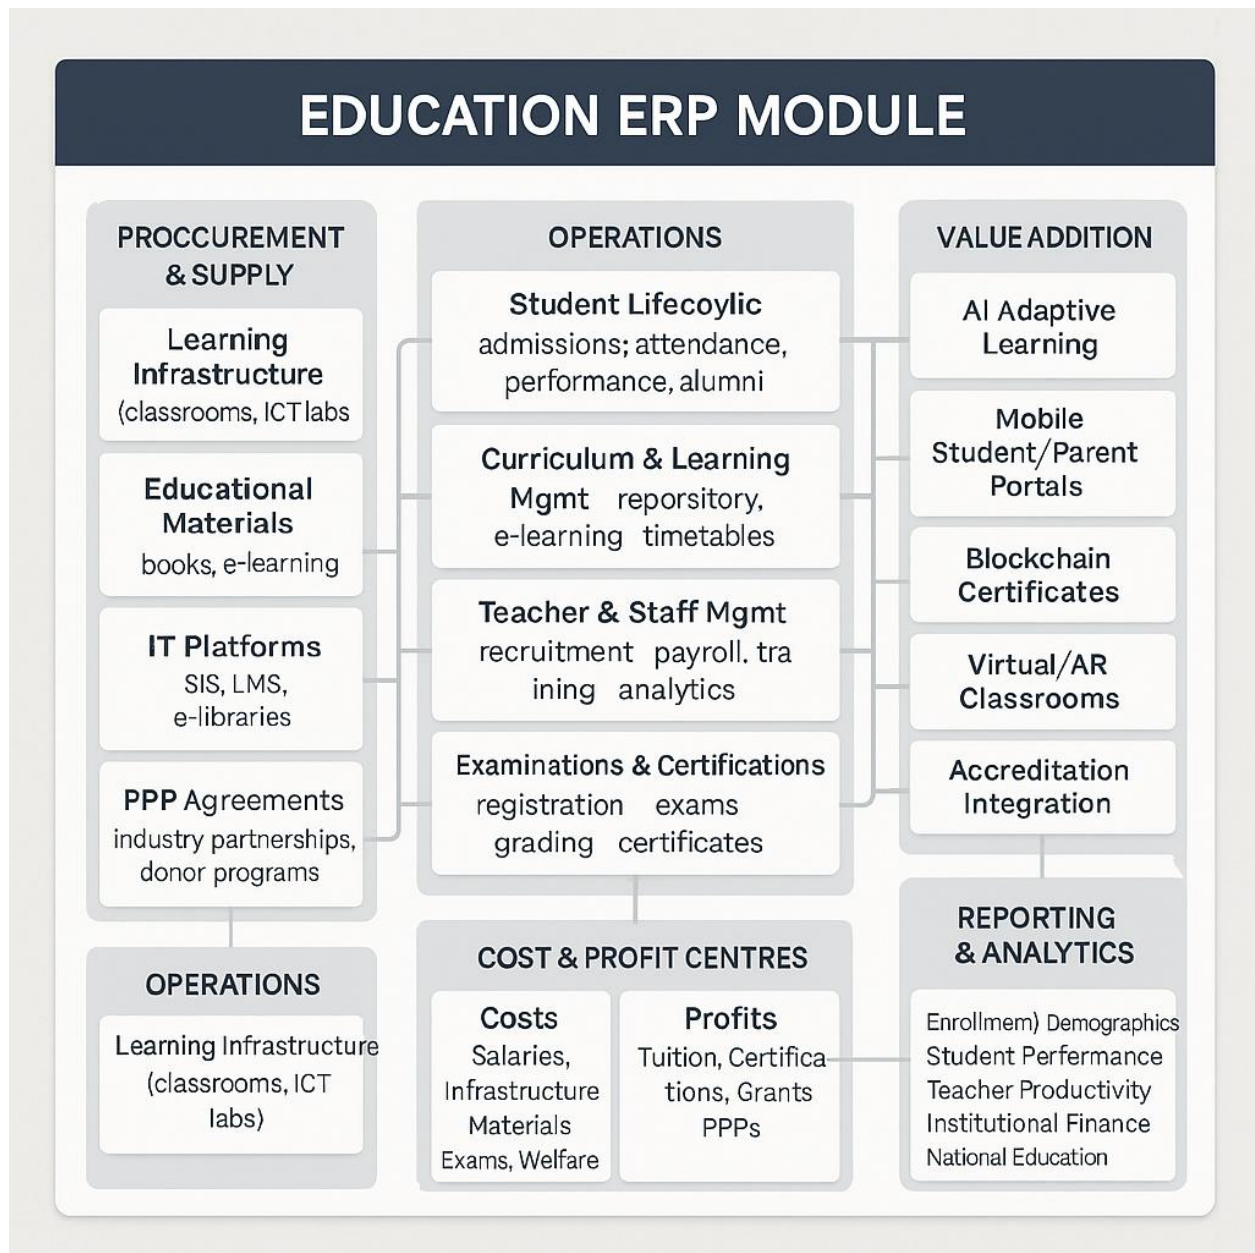

- Direct: Tuition, Boarding, Exams, Certifications
- Internal: Allocations to Schools/Departments
- External: Donor Grants, Subsidies, PPP Revenues

COST & PROFIT CENTRES

- Costs: Salaries, Infrastructure, Materials, Exams, Welfare
- Profits: Tuition, Certifications, Grants, PPPs

REPORTING & ANALYTICS

- Enrollment & Demographics
- Student Performance
- Teacher Productivity
- Institutional Finance
- National Education Indicators

Primary Education ERP Module

1. Procurement & Supply

- **School Infrastructure:** Classrooms, playgrounds, desks, chalkboards, ICT kits for early grades
 - **Learning Materials:** Textbooks, storybooks, stationery, digital content for literacy & numeracy
 - **Vendor Contracts:** Publishers, school feeding program providers, transport services
 - **IT Platforms:** Student attendance systems, teacher portals, e-learning apps for young learners
 - **PPP Agreements:** Donor-funded literacy initiatives, NGO-supported feeding/health programs
-

2. Operations

Admissions & Enrollment

- Digital enrollment linked to national education ID systems
- Age-based class assignment (Grade 1–7)
- Student transfer tracking

Attendance & Classroom Management

- Daily attendance (biometric or teacher-led)
- Classroom timetables & lesson plans
- Teacher-subject allocation

Curriculum Delivery

- Core subjects: Literacy, numeracy, social studies, science, arts, PE
- Digital/interactive learning (smartboards, tablets for early reading)
- Continuous assessment tools for progress monitoring

Teacher Management

- Recruitment, onboarding, and posting workflows
- Payroll and benefits for primary teachers
- Teacher training & certification tracking

- Teacher-student ratio monitoring

School Feeding & Welfare Programs

- Nutrition tracking (school meals, donor-supported feeding schemes)
 - Child welfare services (health checks, psychosocial support)
 - Inclusive education for special needs students
-

3. Value Addition

- Mobile apps for parents (attendance, progress, fee notifications)
 - AI-driven literacy & numeracy assessments
 - E-learning gamification for children (interactive learning apps)
 - Integration with national literacy campaigns
 - Blockchain-based primary school certificate validation
 - Digital storytelling & cultural content preservation
-

4. Sales & Distribution (Including Transfers)

- **Direct:** School fees (where applicable), examination fees
 - **Internal Transfers:** Government/NGO funding allocations to schools
 - **External:** Donor support, PPP education programs, CSR contributions
-

5. Cost & Profit Centres

Cost Centres

- Teacher salaries & training
- Infrastructure maintenance & school feeding programs
- Learning materials & ICT systems
- Welfare & inclusion programs

Profit Centres (*impact-driven, not purely financial*)

- Fees collected (private schools)
 - Donor & NGO contributions
 - CSR partnerships
 - Efficiency savings from reduced dropout rates
-

6. Reporting & Analytics

- Enrollment dashboards (by age, gender, region)
 - Attendance & dropout tracking
 - Teacher-student ratio reports
 - Literacy & numeracy progress indicators
 - School feeding & welfare coverage dashboards
 - Primary exam results & transition rates to secondary
-

7. Visual ERP Flow (Text Representation)

PRIMARY EDUCATION ERP MODULE

PROCUREMENT & SUPPLY

- Infrastructure (classrooms, playgrounds, ICT kits)
- Learning Materials (books, stationery, digital content)
- Vendor Contracts (publishers, feeding, transport)
- IT Platforms (attendance, teacher portals, e-learning)
- PPP Agreements (donors, NGOs)

OPERATIONS

- Admissions & Enrollment (digital ID-linked, transfers)
- Attendance & Classroom Mgmt (attendance, timetables, teacher allocation)
- Curriculum Delivery (subjects, interactive tools, assessments)
- Teacher Mgmt (recruitment, payroll, training, ratios)
- Welfare (feeding, health, inclusion programs)

VALUE ADDITION

- Parent Mobile Apps
- AI Literacy & Numeracy Assessments
- Gamified E-Learning
- Literacy Campaign Integration
- Blockchain Certificates
- Digital Storytelling

SALES & DISTRIBUTION (Including Transfers)

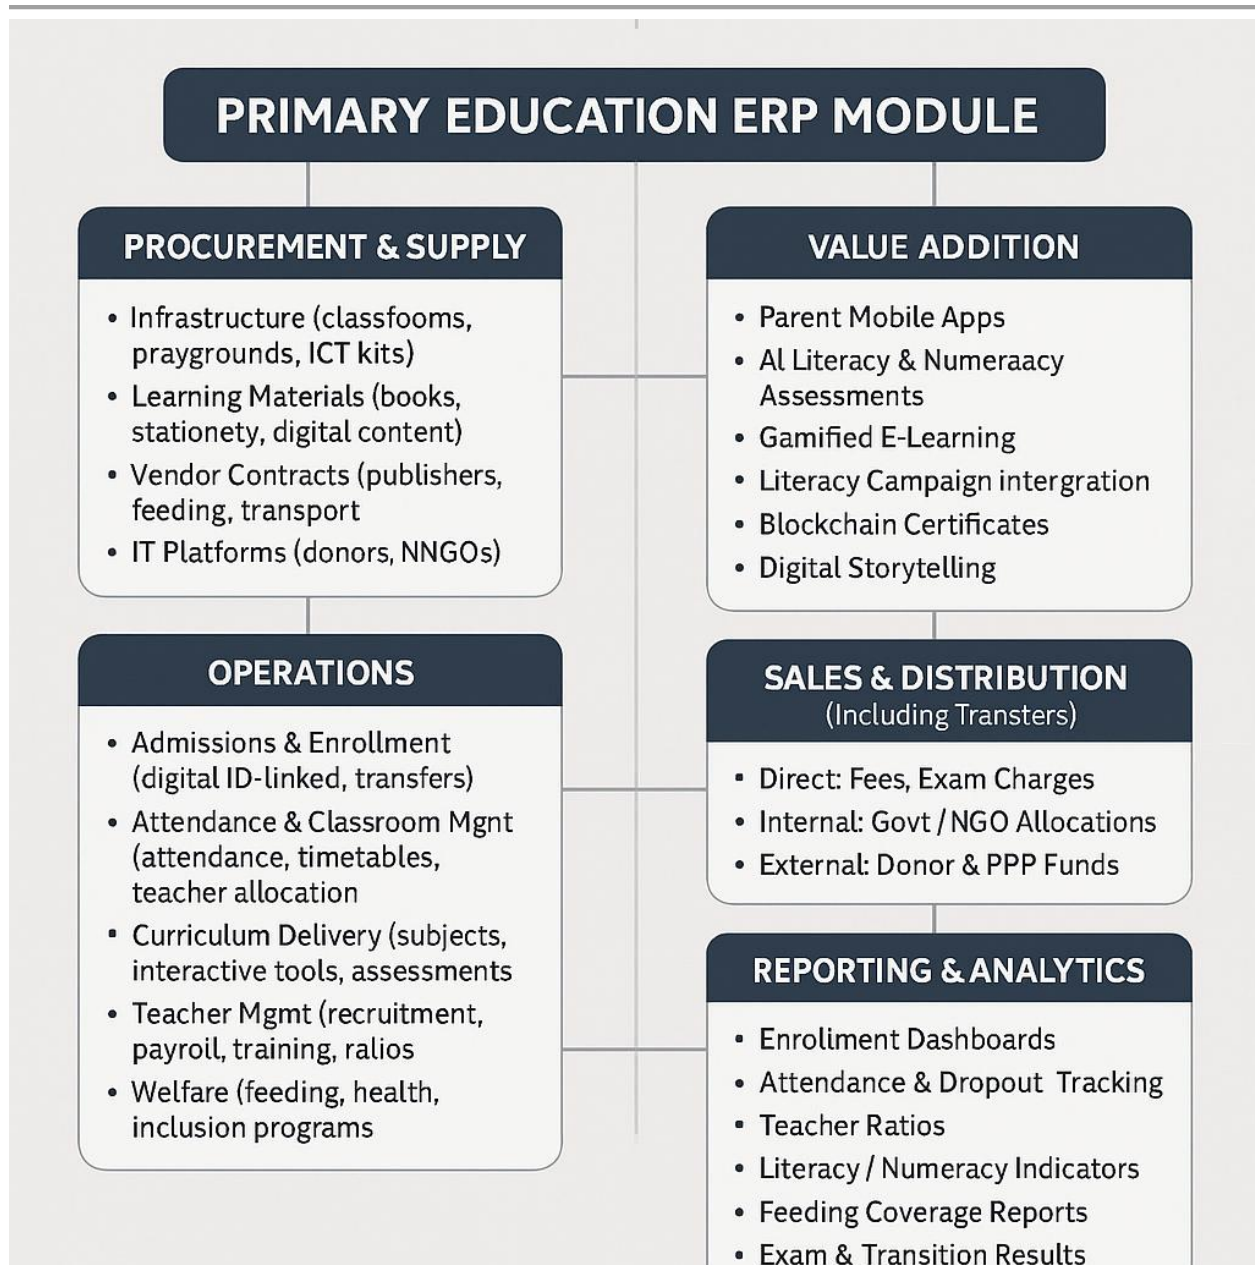

- Direct: Fees, Exam Charges
- Internal: Govt/NGO Allocations
- External: Donor & PPP Funds

COST & PROFIT CENTRES

- Costs: Salaries, Infrastructure, Feeding, ICT
- Profits/Impact: Fees, Donor Funds, CSR, Dropout Reduction

REPORTING & ANALYTICS

- Enrollment Dashboards
- Attendance & Dropout Tracking
- Teacher Ratios
- Literacy/Numeracy Indicators
- Feeding Coverage Reports
- Exam & Transition Results

Secondary Education ERP Module

1) Procurement & Supply

- **Infrastructure:** Classrooms, labs (science/ICT), libraries, workshops, sports facilities
- **Learning Materials:** Textbooks, lab kits/consumables, e-content, exam prep resources
- **Vendors:** Publishers, lab suppliers, transport & security, extracurricular coaches

- **IT Platforms:** SIS, LMS/VLE, assessment & proctoring tools, e-library, device MDM
- **PPP/Programs:** Industry mentorships, STEM initiatives, donor scholarships

2) Operations

Admissions & Enrollment

- Applications, placement/streaming (arts, science, tech, commercial), transfers
- Scholarships/bursaries assignment; boarding allocations

Timetabling & Classroom Management

- Smart timetables (teachers, rooms, labs), substitute scheduling, duty rosters
- Attendance (biometric/app), behavior & discipline logs

Curriculum & Learning

- Core & elective subjects (STEM, humanities, arts, TVET strands)
- Practical/lab scheduling, experiment logs & safety checklists
- Continuous assessment, projects & coursework repositories
- Inclusive education plans (IEPs), counseling & guidance

Teacher & Staff Management

- Recruitment, workload & contact hours tracking
- Performance appraisals (observation rubrics, targets, CPD)
- Payroll, allowances, housing/boarding duties

Exams & Certifications

- Internal exams (midterms, mocks) and national exam registration
- Digital assessment/proctoring, moderation & remark workflows
- Results publishing, transcripts & certificate verification

Student Life & Welfare

- Boarding/hostel management, meals & health clinic
- Clubs, sports, music/drama, debate, competitions
- Career services, internships & university entrance support
- Safeguarding & incident management

3) Value Addition

- AI learning analytics (risk-of-dropout, subject mastery, interventions)
- Adaptive learning paths & personalized revision plans
- Parent & student mobile portals (fees, results, attendance, homework)

- VR/AR labs & simulations; maker-space/robotics integrations
- Digital credentialing (blockchain-secured transcripts & co-curricular badges)

4) Sales & Distribution (Including Transfers)

- **Direct:** Tuition/boarding, exam fees, extracurricular fees, transport
- **Internal Transfers:** Department/faculty budgets, boarding vs day allocations
- **External:** Donor grants, corporate sponsorships, PPP STEM programs

5) Cost & Profit Centres

Cost Centres

- Staff salaries & CPD, lab consumables & safety, ICT & licenses
- Facilities/boarding operations, transport & security, exam administration

Profit Centres

- Tuition/boarding, exam services, facility hire, clubs/sports events
- Sponsorships & grants, alumni/booster contributions

6) Reporting & Analytics

- Enrollment & retention; attendance & discipline trends
- Academic performance by subject/teacher/stream
- National exam performance & value-added scores
- Teacher workload vs outcomes; CPD impact
- Financial dashboards (collections, arrears, cost per learner)
- Co-curricular participation & wellbeing metrics

7) Visual ERP Flow (Text Representation)

SECONDARY EDUCATION ERP MODULE

PROCUREMENT & SUPPLY

- └ Infrastructure (labs, libraries, workshops, sports)
- └ Learning Materials (textbooks, lab kits, e-content)
- └ Vendors (publishers, lab suppliers, transport)
- └ IT Platforms (SIS, LMS, proctoring, e-library, MDM)
- └ PPP/Programs (STEM, mentorships, scholarships)

OPERATIONS

- └ Admissions & Enrollment (streams, bursaries, boarding)
- └ Timetabling & Classroom (smart schedules, attendance, discipline)
- └ Curriculum & Learning (core/electives, labs, assessment, IEPs)
- └ Teacher Mgmt (workload, appraisal, payroll, CPD)
- └ Exams & Certifications (registration, proctoring, results, verification)
- └ Student Life & Welfare (boarding, health, clubs, careers, safeguarding)

VALUE ADDITION

- └ AI Learning Analytics & Interventions
- └ Adaptive Learning Paths
- └ Parent/Student Mobile Portals
- └ VR/AR Labs & Maker-spaces
- └ Blockchain Credentials & Badges

SALES & DISTRIBUTION (Including Transfers)

- └ Direct: Tuition, Boarding, Exams, Activities, Transport
- └ Internal: Departmental/Boarding Allocations
- └ External: Grants, Sponsorships, PPPs

COST & PROFIT CENTRES

- └ Profits: Tuition, Boarding, Facility Hire, Events, Sponsorships

REPORTING & ANALYTICS

- └ Enrollment/Retention
 - └ Attendance/Discipline
 - └ Subject & Exam Performance
 - └ Teacher Workload vs Outcomes
 - └ Financial Collections & Costs
 - └ Co-curricular & Wellbeing
-

SECONDARY EDUCATION ERP MODULE

PROCUREMENT & SUPPLY

Infrastructure (labs, libraries, workshops, sports)
Learning Materials (textbooks, lab kits; e-content)
Vendors (publishers, lab suppliers; transport)
IT Platforms (SIS: LMS, proctoring; e-library; MDM)
PPP/Programs (STEM, mentorships; scholarships)

OPERATIONS

Admissions & Enrollment (streams; bursaries; boarding)
Timetabling & Classroom (smart schedules, attendance, discipline)
Curriculum & Learning (core/electives; labs, assessment, IEPs)
Teacher Mgmt (workload, appraisal, payroll CPD)
Exams & Certifications

VALUE ADDITION

- AI Learning Analytics & Interventions
- Adaptive Learning Paths
- Parent/Student Mobile Portals
- VR/AR Labs & Maker-spaces,
- Blockchain Credentials & Badges

SALES & DISTRIBUTION

- Direct: Tuition, Boarding, Exams
Activities: Transport
- Internal: Departmental/Boarding Allocations
- External: Grants; Sponsorships, PPPs

COST & PROFIT CENTRES

- Costs: Salaries, Labs, ICT, Facilities, Transport, Exams
- Profits: Tuition, Boarding, Facility Hire, Events; Sponsorships

REPORTING & ANALYTICS

- Enrollment/Retention

Tertiary/University ERP Module

1) Procurement & Supply

- **Campus Infrastructure:** Lecture theatres, labs, libraries, clinics, residences, sports, transport
- **Academic Equipment:** Lab instruments, research gear, studio/workshop tools, HPC/servers
- **Vendors & Services:** Publishers, catering/hostel operators, security, transport, cleaners
- **IT Platforms:** SIS, LMS/VLE, research repository, e-library, identity/SSO, MDM, proctoring
- **Partnerships/Grants:** Industry MoUs, exchange programs, donor grants, PPP facilities

2) Operations

Admissions & Enrollment

- Program applications (UG/PG), selection, offers & acceptance
- Credit transfer/RPL, international student workflows, visas
- Fee assessment & sponsorship/scholarship assignment

Academic Programs & Curriculum

- Program structures, prerequisites, electives, caps/minors
- Timetabling (rooms, labs, instructors), attendance capture
- Curriculum review cycles and accreditation alignment

Teaching & Learning

- LMS courses, content & assessments; hybrid/online delivery
- Practical/lab scheduling & compliance (safety sheets, logs)
- Academic integrity tools (plagiarism, proctoring)

Exams & Certification

- Exam timetables, invigilation rosters, special accommodations
- Grading, moderation, external examiners, appeal workflows
- Transcripts, degree audit, graduation & digital credentials

Research & Innovation

- Grant calls, proposals, ethics approvals, IRB tracking

- Project & budget management, milestones, publication repository
- IP management (patents, NDAs, licensing), spin-outs & incubators

Faculty & HR

- Recruitment, contract types (adjunct, tenure-track), workload
- CPD & sabbaticals, appraisal, promotion & tenure dossiers
- Payroll, benefits, leave & teaching substitution

Student Services & Welfare

- Residences/hostels, meal plans, clinic/insurance
- Counseling & disability services, student conduct
- Clubs/societies, careers office, internships & placements

Finance & Fees

- Tuition & ancillary fees (lab, library, graduation)
- Payment plans, collections, refunds, bursaries/scholarships
- Research funds, endowments, donor gifts & alumni giving

Campus & Facilities

- Asset registry, preventive/corrective maintenance
- Space management (classrooms, labs, events)
- Campus transport & parking, security & access control

3) Value Addition

- AI academic risk & progression analytics; advisor nudges
- Personalized learning paths & recommended electives
- Digital wallets & ID cards (access, payments, attendance)
- Blockchain-secured transcripts, micro-credentials, badges
- Research analytics (grant hit-rates, h-indices, collaboration maps)
- Student mobile super-app (timetable, fees, results, tickets)

4) Sales & Distribution (Including Transfers)

- **Direct:** Tuition, residence & meal fees, exam & graduation fees, executive education
- **Internal Transfers:** Faculty/department budget allocations, overhead recoveries
- **External:** Grants, endowments, contract research, PPP facilities, alumni/CSR

5) Cost & Profit Centres

Cost Centres

- Academic departments, libraries & labs
- Residences, catering, transport & security
- IT platforms/licensing, facilities OPEX & capex
- Research administration & ethics/IRB

Profit Centres

- Tuition & executive/continuing education
- Contract research & consultancy, IP licensing
- Residences/hostels & facility hire (venues, conferencing)
- Endowment returns & alumni giving

6) Reporting & Analytics

- Enrollment, retention & graduation rates (by program/cohort)
- Teaching load vs outcomes; student satisfaction & NSS scores
- Financial dashboards (collections, cost per student, margins)
- Research KPIs (grants, publications, citations, commercialization)
- Accreditation readiness (evidence mapping, closure of recommendations)
- Space utilization & maintenance SLAs; safety & incident metrics

7) Visual ERP Flow (Text Representation)

TERTIARY / UNIVERSITY ERP MODULE

PROCUREMENT & SUPPLY

- └ Campus Infrastructure (theatres, labs, residences, sports)
- └ Academic Equipment (instruments, HPC, studios)
- └ Vendors/Services (publishers, catering, security, transport)
- └ IT Platforms (SIS, LMS, repo, e-library, SSO, proctoring)
- └ Partnerships/Grants (MoUs, exchanges, donors, PPPs)

OPERATIONS

- └ Admissions & Enrollment (UG/PG, intl, visas, fees)
- └ Programs & Curriculum (structures, timetables, accreditation)
- └ Teaching & Learning (LMS, labs, integrity)
- └ Exams & Certification (grading, moderation, transcripts)
- └ Research & Innovation (grants, ethics, IP, incubators)
- └ Faculty & HR (recruitment, workload, promotion/tenure)
- └ Student Services (residences, health, counseling, careers)
- └ Finance & Fees (billing, aid, collections, gifts)
- └ Campus & Facilities (assets, maintenance, space, security)

VALUE ADDITION

- └ AI Progression & Risk Analytics
- └ Personalized Learning Paths
- └ Digital ID/Wallet (access & payments)
- └ Blockchain Credentials & Micro-badges
- └ Research Analytics & Collaboration
- └ Student Super-App

SALES & DISTRIBUTION (Including Transfers)

- └ Direct: Tuition, Residences, Exams, Exec Ed
- └ Internal: Faculty/Dept Allocations, Overheads
- └ External: Grants, Endowments, Contract Research, PPPs

COST & PROFIT CENTRES

- └ Costs: Departments, Libraries/Labs, Facilities, IT, Research Admin
- └ Profits: Tuition, Exec Ed, Contract Research/IP, Residences, Endowments

REPORTING & ANALYTICS

- └ Enrollment/Retention/Graduation
- └ Teaching Load & Outcomes, Satisfaction
- └ Financial Margins & Collections
- └ Research KPIs & Commercialization
- └ Accreditation Readiness
- └ Space Utilization & Safety SLAs
