

ERIK ERP SYSTEM — DELIVERABLES DOCUMENT

1. Multi-Channel Registration, Full Access, and Security Module

Deliverables:

- **Multi-channel access** — registration and login via:
 - Web portal (browser-based)
 - Mobile app (Android & iOS)
 - API and partner systems
 - Desktop client (optional)
 - **User authentication options:**
 - Email, phone number, or corporate ID login
 - Multi-factor authentication (MFA)
 - Biometric login (fingerprint/face recognition where supported)
 - **Role-Based Access Control (RBAC)** — define granular permissions for:
 - Departments
 - Teams
 - User groups
 - Contractors or auditors (limited guest access)
 - **Advanced security:**
 - Encryption (AES-256 for data, SSL/TLS for connections)
 - Auto-session timeout & IP/device whitelisting
 - Login geo-restrictions and access logs
 - Comprehensive **audit trail** and **activity monitoring**
 - **Single Sign-On (SSO) and OAuth2 integration**
 - **Full admin console** for managing:
 - User roles
 - Access policies
 - Account recovery and user verification flows
-

2. Export/Import Database Tool

Deliverables:

- Seamless **data migration assistant** for onboarding and backups.
- **Supported formats:**
 - CSV, XLSX, JSON, XML, SQL dump, and API sync
- **Features:**

- One-click import/export of:
 - Financial transactions
 - HR records
 - Inventory, sales, and procurement data
 - User and company configurations
 - Bulk upload tools with field mapping and validation
 - Export filtered or custom reports (PDF, Excel, CSV)
 - Automated scheduled backups to:
 - Cloud storage (Google Drive, OneDrive, AWS S3)
 - Local or hybrid storage
 - **Data integrity checker** and rollback system for failed imports
-

3. ZRA Integration and Smart Invoicing

Deliverables:

- **Zambia Revenue Authority (ZRA) API integration** for:
 - Smart invoicing and e-receipting
 - Automated VAT and tax reporting submission
 - Real-time verification of taxpayer and invoice status
 - **Smart invoice system:**
 - QR-code compliant invoices and receipts
 - E-signature verification
 - Invoice tracking (issued, paid, pending, cancelled)
 - **Tax computation engine** for all applicable taxes:
 - VAT
 - Turnover Tax
 - PAYE
 - Withholding Tax
 - Income Tax
 - Rental Tax
 - Tourism Levy
 - Skills Development Levy
 - NAPSA, NHIMA, and other statutory deductions
 - **Automatic report submission** to ZRA via secure channels
 - **Audit-ready storage** of all e-invoices and tax filings
-

4. Full Finance Module

Deliverables:

- **Core Financials:**
 - General Ledger
 - Accounts Payable/Receivable
 - Bank Reconciliation
 - Budgeting & Forecasting
 - Fixed Asset Register
- **Tax Reports:**
 - VAT
 - Turnover Tax
 - Income Tax
 - Withholding Tax
 - Rental Tax
 - Tourism Levy
 - PAYE
 - Skills Development Levy
 - Royalty Tax
- **Inventory & Finance Reports:**
 - Stock Valuation
 - Cost of Goods Sold (COGS)
 - Profitability by branch, region, or product
- **Core Financial Statements:**
 - Balance Sheet
 - Income Statement
 - Cash Flow Statement
 - Trial Balance
 - Equity Statements
- **Time-Grain Reporting:**
 - Daily, Weekly, Monthly, Quarterly, Yearly summaries
 - Period comparisons and trend analytics
- **End-of-Year Financials:**
 - Automated closing entries
 - Consolidated branch and subsidiary reports
 - AI-assisted Executive Summary commentary generator
- **Consolidation Engine:**
 - Multi-company, multi-currency financial consolidation
 - Country, regional, or group-level financial aggregation

5. Multi-Sector, Multi-Entity & Consolidation Engine

Deliverables:

- Unified ERP supporting multiple:
 - **Entities** (companies, branches, subsidiaries)
 - **Sectors** (Agriculture, Education, Manufacturing, Retail, etc.)

- Consolidated reporting across:
 - Countries
 - Currencies
 - Departments and cost centers
 - **Cross-entity approvals** and shared resource management
 - **Intercompany transactions** with automatic reconciliation
-

6. Multi-Currency Management

Deliverables:

- Home currency selection per company or entity
 - Add unlimited foreign currencies
 - Manage exchange rates:
 - Manual entry or automatic daily rate fetch (via API)
 - Dual display of amounts:
 - Home currency vs. foreign currency
 - Currency revaluation and gain/loss accounting
 - Multi-currency consolidation for reports and payments
-

7. Procurement, Inventory & Manufacturing

Deliverables:

- **Procurement:**
 - Purchase requests, orders, receipts
 - Vendor management and evaluation
 - Quotation comparison and approval flows
 - **Inventory:**
 - Stock levels and warehouse management
 - Reorder alerts and batch/serial tracking
 - Inventory valuation (FIFO, LIFO, Weighted Average)
 - **Manufacturing:**
 - Bill of Materials (BOM)
 - Production orders and job costing
 - Material requirement planning (MRP)
 - Work order tracking and machine utilization
 - **Smart Inventory Automation:**
 - AI-based stock prediction and reorder optimization
-

8. Reporting, Analytics & Intelligence

Deliverables:

- **Centralized reporting engine**
 - Custom report builder (drag-and-drop)
 - Visual analytics dashboards
 - Predictive analytics and trend forecasting
 - AI-generated management summaries
 - Export reports to PDF, Excel, CSV, or API feed
 - Role-based analytics visibility (finance, HR, procurement, etc.)
-

9. Full HR & Payroll Module

Deliverables:

HR Core:

- Employee records and digital files
- Attendance, leave, timesheets
- Contracts, promotions, and transfers

Talent Development & Marketplace:

- Performance appraisals
- Learning & training portal
- Internal job market and talent pool

Employee Self-Service:

- Payslip access, leave requests, profile updates
- Mobile and web dashboards
- Engagement surveys and announcements

Payroll & Statutory Integrations:

- PAYE, NHIMA, NAPSA, SDL, WCF, Union dues
- Auto calculation and statutory report generation
- eSubmission-ready outputs for:
 - ZRA
 - NAPSA
 - NHIMA

Additional:

- Multi-branch payroll
 - Retroactive pay adjustments
 - Pension & benefits tracker
 - AI payroll anomaly detection
-

10. Banking, Payments & Financial Automations

Deliverables:

- **Bank integrations:**
 - ZANACO, ABSA, FNB, Stanbic, Atlas Mara, etc.
 - **Payment automations:**
 - Batch payments, reconciliations, and recurring payments
 - **Payment gateways:**
 - Visa, Mastercard, Airtel Money, MTN Money, Zamtel Money
 - **Auto-matching engine:**
 - Automated bank reconciliation and transaction mapping
 - **Alerts & Approval flows:**
 - Multi-level payment approvals
 - Real-time notifications
-

11. Pre-Loaded Industry Modules

Deliverables:

- **Initial focus:** Agriculture & Education
- Predefined templates and configurations for:
 - Chart of accounts
 - Workflows
 - Tax models
 - Standard reports
- Expandable to:
 - Manufacturing
 - Retail
 - Hospitality
 - Logistics
 - Healthcare
 - Construction
 - NGOs

- Industry-based best practices embedded by default
-

12. Communication & Collaboration Platform

Deliverables:

- In-system messaging and announcements
 - Department chat rooms and discussion boards
 - Task and project collaboration spaces
 - Document sharing and version control
 - Meeting scheduling and reminders
 - Video call & conference integration (Zoom, Teams, Meet)
 - Activity feed for cross-department updates
-

13. Bank Payments & API Integrations

Deliverables:

- Unified API gateway for:
 - Banks and payment processors
 - Mobile money providers
 - Government systems (ZRA, NAPSA, NHIMA)
 - RESTful and GraphQL APIs
 - Developer sandbox for third-party integrations
 - Webhooks for transaction updates and system events
-

14. AI Assistant (ERIK)

Deliverables:

- AI-powered in-app chatbot for:
 - Task automation (create invoices, reports, HR queries)
 - User support and training
 - Smart data insights and recommendations
 - Voice-enabled interface (optional)
 - Context-aware learning for personalized responses
-

15. AI, Automation & Document Intelligence

Deliverables:

- **AI automation layer:**
 - Predictive analytics for demand, sales, HR attrition
 - Automated approval routing
 - **Document intelligence:**
 - OCR (Optical Character Recognition) for receipts, invoices, IDs
 - Auto data extraction and entry
 - Document classification and tagging
 - **Workflow automation engine:**
 - Custom triggers and scheduled tasks
-

16. Marketplace Ecosystem

Deliverables:

ERP Marketplace Portal:

- Download and install plug-ins or add-ons
- Developer submission platform
- Rating and review system

HR Marketplace:

- Talent exchange between ERIK-powered companies
- Job posting, candidate sourcing, and matching

Report Marketplace:

- Buy, sell, or share custom reports and dashboards
- Templates for financial, HR, or inventory reports

Agent Portal:

- Partner and reseller management platform
 - Commission tracking and lead registration
 - White-label or franchise options
-

17. Compliance, Legal & Governance

Deliverables:

- **Regulatory Compliance Framework:**
 - Built-in templates and policies aligned with:
 - **ZRA (Zambia Revenue Authority)** standards
 - **NAPSA** and **NHIMA** reporting formats
 - **Bank of Zambia (BoZ)** data and payment standards
 - **Zambian Labour Laws** and **PAYE** regulations
 - Region-based configuration for other countries as ERIK expands.
- **Data Protection & Privacy:**
 - Compliance with:
 - **Zambia Data Protection Act (2021)**
 - **GDPR (EU)** and **POPIA (South Africa)** equivalents for cross-border clients
 - Secure user consent management and data retention policies.
- **Corporate Governance Controls:**
 - Board and audit dashboards for oversight
 - Automatic documentation of approvals, rejections, and changes
 - **Versioned audit trails** across all modules (Finance, HR, Inventory)
- **Legal Contracts & Document Management:**
 - Digital signing support (ZamSign, DocuSign, etc.)
 - Contract version tracking and expiry alerts
 - Automated compliance validation for vendor and employee contracts
- **Risk & Internal Control Tools:**
 - Configurable control frameworks (COSO, ISO 27001)
 - Built-in risk registers and escalation protocols
- **Reporting:**
 - Audit-ready compliance reports
 - Governance performance analytics (e.g., policy compliance rate)

A. Regulatory & Legal Compliance Framework

The ERIK ERP system includes a **compliance backbone** that aligns all modules with Zambia's statutory, financial, and data protection frameworks while supporting international best practices.

Key integrations and alignments include:

- **ZRA (Zambia Revenue Authority)** — Smart invoicing, PAYE, VAT, and withholding tax automation
- **PACRA (Patents and Companies Registration Agency)** — Corporate registration data validation and entity management integration
- **IFMIS (Integrated Financial Management Information System)** — Public sector interoperability support for ministries and government-linked entities

- **NAPSA (National Pension Scheme Authority)** — Automated pension contribution reporting and compliance dashboards
 - **NHIMA (National Health Insurance Management Authority)** — Employer and employee contribution synchronization
 - **Workers Compensation Fund Control Board** — Integrated levy calculation and electronic reporting
 - **CEEC (Citizens Economic Empowerment Commission)** — Optional business empowerment data integration for SMEs and cooperatives registered under empowerment programs
-

B. Data Protection & Privacy Compliance

ERIK ERP embeds a **privacy-by-design** architecture compliant with both local and global data protection standards.

Deliverables include:

- **Zambian ICT and Data Privacy Law Alignment:**
 - Compliance with Zambia's **Data Protection Act (2021)** and **Electronic Communications and Transactions Act (ECTA)**
 - User consent management and digital identity validation per ICT Authority guidelines
 - **GDPR-Style Compliance Controls:**
 - Explicit data consent collection and withdrawal
 - Data subject rights (access, rectification, erasure, portability)
 - Data anonymization and minimization features
 - **Automatic Data Retention & Archival System:**
 - Configurable retention schedules for each module (e.g., 7 years for financials, 5 years for HR records)
 - Auto-archival of inactive records
 - Secure purge and encryption of expired or redundant data
 - Regulatory-grade data destruction reports for audit compliance
-

C. Governance & Control Features

- **Role-Based Access Restriction (RBAC):**
 - Define user roles, departments, and data visibility
 - Control module and field-level permissions
 - Dual control and maker-checker approval systems for sensitive actions
- **Legal Disclaimers & System Policy Templates:**
 - Pre-loaded templates for:
 - Terms of Use

- Privacy Policy
 - Data Retention & Usage Policy
 - Employee and Vendor Code of Conduct
 - IT Acceptable Use Policy
 - Customizable with company branding and legal text
 - **Corporate Governance Dashboard:**
 - Board and Audit committee view of compliance metrics
 - Internal control scoring and breach alerts
 - Periodic certification reminders (e.g., statutory submissions)
-

D. Auditability & Traceability

- **Comprehensive Audit Logs:**
 - Automatically track all system actions (login, approvals, edits, deletions)
 - Timestamp, user ID, location/IP, and device capture
 - Immutable audit records for legal evidence
 - **Audit Report Generator:**
 - Downloadable logs filtered by module, date, or user
 - AI-assisted anomaly detection in audit trails
 - Secure export for internal or external auditors
-

E. Legal Entity & Compliance Mapping

- Centralized **compliance registry** within ERIK ERP that maintains:
 - PACRA registration details
 - Taxpayer Identification Numbers (TPIN)
 - Regulatory certificates (ZRA, NAPSA, NHIMA, CEEC)
 - License expiry and renewal alerts
 - Integration-ready APIs for validation and synchronization with government databases
-

F. Risk Management & Internal Controls

- Built-in **risk assessment matrix** for:
 - Financial, operational, and compliance risk scoring
 - Automated flagging of high-risk transactions or overdue submissions
 - Integration with **COSO** and **ISO 27001** frameworks for internal control and security governance
 - Escalation and resolution workflows for compliance exceptions
-

G. Reporting & Legal Assurance

- **Compliance Reports:**
 - Statutory reports (ZRA, NAPSA, NHIMA)
 - Corporate governance performance analytics
 - Internal audit summaries
- **Legal Assurance Layer:**
 - Digital signature support (ZamSign, DocuSign)
 - Legally admissible digital document storage
 - Blockchain-ready architecture for tamper-proof audit verification (future roadmap feature)

Outcome

ERIK ERP's Compliance, Legal, and Governance suite ensures that every transaction, document, and report adheres to the **laws of Zambia** while meeting **international corporate and data governance standards**.

It provides organizations with:

- **End-to-end regulatory visibility**
 - **Secure and legally valid audit trails**
 - **Automated compliance reporting**
 - **Peace of mind during audits or inspections**
-

18. Sustainability & Green Initiative

Deliverables:

- **Sustainability Dashboard:**
 - Tracks company's environmental, social, and governance (ESG) metrics
 - Monitors energy use, paper savings, and waste reduction linked to ERP usage
- **Digital Transformation Drive:**
 - Paperless workflows and e-signature integration
 - Automated digital receipts and online record storage
- **Green Hosting:**
 - Cloud deployment on energy-efficient, carbon-offset data centers (AWS/Azure)
 - Optimization for low energy consumption in processing
- **Sustainable Procurement:**
 - Vendor scoring on sustainability metrics
 - Reports showing carbon footprint and ethical sourcing
- **CSR Integration:**

- Ability to track and report on Corporate Social Responsibility activities
 - ESG compliance reporting aligned with **UN SDGs**
 - **AI Green Recommender:**
 - Intelligent suggestions for resource optimization (e.g., reduce paper printouts, optimize transport routes, lower idle energy consumption)
-

19. Administration & Control Features

Deliverables:

- **Centralized Admin Console:**
 - Manage all modules, users, branches, and integrations in one place
 - **Super-Admin Controls:**
 - Master override, user lockout, data visibility control
 - Impersonation for troubleshooting (with audit tracking)
 - **Company & Department Setup:**
 - Multi-company structure with distinct settings per branch or subsidiary
 - **Policy Management:**
 - Configure approval hierarchies, access levels, and document workflows
 - **Automation Controls:**
 - Enable/disable system automations like auto-reports, reminders, and tax updates
 - **Health Monitoring Dashboard:**
 - View ERP uptime, database performance, API status, and error logs
 - **Data Governance:**
 - Retention policies, anonymization, and archival tools
 - **Admin Alerts:**
 - Auto notifications for license expiry, failed backups, and security breaches
-

20. Developer, API & Integration Toolkit

Deliverables:

- **Developer Portal:**
 - Centralized documentation, sample code, and sandbox environments
- **API Gateway:**
 - RESTful and GraphQL APIs for full ERP module access
 - OAuth2.0 and API key authentication
- **SDKs & Libraries:**
 - Python, JavaScript, PHP, and .NET SDKs for 3rd-party development
- **Webhooks & Event Listeners:**
 - Trigger real-time actions (e.g., notify apps when invoice is paid)

- **Integration Hub:**
 - Connectors for:
 - Banks & Payment Gateways
 - ZRA, NAPSA, NHIMA APIs
 - E-commerce platforms (Shopify, WooCommerce)
 - CRMs and external HR systems
 - **Low-Code Automation Builder:**
 - Graphical interface for creating workflows using triggers and actions
 - **Testing & Debugging Tools:**
 - API call logs, sandbox data, and versioning system
 - **Developer Marketplace Access:**
 - Monetize plugins, apps, or analytics tools within the ERIK ecosystem
-

21. Mobile & Multi-Device Access

Deliverables:

- **Cross-Platform Apps:**
 - Native Android and iOS applications
 - Progressive Web App (PWA) for cross-browser access
 - **Adaptive User Interface:**
 - Responsive layouts for phones, tablets, laptops, and large displays
 - **Offline Mode:**
 - Access data and complete transactions offline, sync when online
 - **Push Notifications:**
 - Alerts for approvals, payments, messages, and task reminders
 - **Biometric Login:**
 - Fingerprint/Face unlock for secure quick access
 - **Mobile Modules:**
 - Mini dashboards for Finance, HR, Inventory, and CRM
 - GPS-based attendance, expense claims, and field reports
 - **Multi-Device Sync:**
 - Real-time synchronization between desktop, tablet, and mobile sessions
-

22. Hosting, Infrastructure & Integration

Deliverables:

- **Flexible Deployment Models:**
 - **Cloud-based (SaaS):** Managed by ERIK team
 - **On-premise:** For government or large enterprises

- **Hybrid:** Cloud backup with local data caching
 - **Hosting Partners:**
 - AWS, Azure, Google Cloud, and local Zambian data centers
 - **Infrastructure:**
 - Auto-scaling containers (Docker/Kubernetes)
 - Load balancing and failover redundancy
 - Real-time monitoring and backup automation
 - **Data Security & Recovery:**
 - End-to-end encryption (in transit & at rest)
 - Daily/weekly backups with point-in-time restore
 - DR (Disaster Recovery) environment
 - **Integration Framework:**
 - Connect seamlessly with:
 - Government systems (ZRA, NAPSA, NHIMA)
 - Banks and Fintech APIs
 - Communication tools (Teams, Slack, WhatsApp)
 - IoT devices for smart factory/warehouse management
 - **Multi-region Support:**
 - Data segregation per country or region
 - Compliant with local sovereignty laws
-

23. Intelligence & Forecasting

Deliverables:

- **AI-Powered Analytics Engine:**
 - Predictive financial modeling
 - Cash flow and expense forecasting
 - HR attrition prediction
 - Sales trend analysis
- **AI Advisory Assistant (ERIK Intelligence):**
 - Interprets reports and gives management recommendations
 - Generates natural-language financial commentary
- **Predictive Procurement:**
 - Suggests optimal reorder times and supplier selections
- **Demand Forecasting:**
 - Uses machine learning for sales, inventory, and production projections
- **Fraud & Anomaly Detection:**
 - AI monitors transactions for irregularities
- **Sentiment & Engagement Insights:**
 - Employee satisfaction analytics from HR data
- **Scenario Simulation:**
 - “What-if” modeling for budgeting, taxation, and strategy planning
- **Executive AI Reports:**

- Auto-generated dashboards and voice summaries
-

24. Additional System-Level Deliverables

Deliverables:

- **Offline support & sync engine** for power/internet disruptions
 - **Multi-language & multi-country support**
 - **Mobile apps (Android/iOS)** with full sync capabilities
 - **Deployment options:**
 - Cloud (SaaS)
 - On-premise
 - Hybrid
 - **Comprehensive documentation:**
 - Admin guide
 - Developer API guide
 - User manuals per module
 - Regulatory compliance addendums
 - **Scalability & Hosting:**
 - Ready for AWS, Azure, or local hosting environments
 - Auto-scaling, monitoring, and load balancing
-

25. Future Expansion Plans & Roadmap

Deliverables:

Short-Term:

- Completion of base modules (Finance, HR, Procurement, Inventory)
- Full ZRA and NAPSA/NHIMA integration
- Mobile apps release (Android/iOS)
- ERP Marketplace and Agent Portal rollout
- AI document intelligence expansion (OCR 2.0)
- Smart Invoice & Smart Payroll enhancements

Mid-Term:

- Launch of new sector-specific modules:
 - Healthcare, Construction, Real Estate, Transport, NGOs
- Integration with regional tax authorities (SADC markets)
- Blockchain-based audit ledger

- Expansion of AI assistant (voice + predictive insights)
- ERP “Lite” version for SMEs and cooperatives
- Native integration with IoT devices and POS terminals

Long-Term:

- Establish **ERIK Cloud** as a regional ERP hosting platform
 - Open international developer marketplace
 - AI-led autonomous accounting and HR systems
 - Full integration with banking ecosystems for auto-payments
 - Sustainability analytics and carbon offset marketplace
 - ERIK Global Connect — linking entities across borders for trade, payments, and compliance
-

Summary Statement

The **ERIK ERP System** represents a next-generation, AI-driven, multi-entity enterprise resource platform designed to transform how African and global businesses operate. It unites **finance, HR, procurement, intelligence, sustainability, and governance** into a single adaptive ecosystem that grows with the organization.

Built with **compliance, connectivity, and community in mind**, ERIK will evolve into not just an ERP but an **intelligent business operating system** — empowering industries, governments, and people through automation, insight, and inclusion.
