Notes & caveats:

Some rates (e.g., union dues, insurance premiums, fire certificate) vary widely by location and risk class; you should treat these as placeholders and update as per your branch's local council schedule or insurance provider.

Local council levies (business levy, personal levy, property rates, etc) differ by council. ERIK must support configuration per legal entity branch (city, district) with correct rates/fee-schedules.

[Penalties for many local council levies are prescribed in by-laws and vary. For the national acts \(e.g., Personal Levy Act, VAT Act\) the penalty formulas are clearer. zambialaws.com+1](#)

Where "due date" is approximate (~10th of following month for payroll-tax remittances) you should check each regulation or Authority's published schedule; ERIK should store rules per year/version.

Some items (e.g., union fees) are not "statutory tax" in the same sense as PAYE or VAT but are still employer obligations/deductions and need tracking for compliance.
